Form 10-K

- ☒ Annual Report Pursuant to Section 13 or 15(d) of the Securities Exchange Act of 1934 for the fiscal year ended December 31, 2015.
- ☐ Transition Report Pursuant to Section 13 or 15(d) of the Securities Exchange Act of 1934 for the transition period from to .

Commission file number: 001-33626

GENPACT LIMITED
(Exact name of registrant as specified in its charter)

Bermuda
(State or other jurisdiction of incorporation or organization)

98-0533350
(I.R.S. Employer Identification No.)

Canon’s Court
22 Victoria Street
Hamilton HM 12
Bermuda
(441) 295-2244

(Address, including zip code, and telephone number, including area code, of registrant’s principal executive office)

Securities registered pursuant to Section 12(b) of the Act:	
Title of Each Class	Name of Exchange on Which Registered
Common shares, par value \$0.01 per share	New York Stock Exchange

Securities registered pursuant to Section 12(g) of the Act: None

Indicate by check mark if the registrant is a well-known seasoned issuer, as defined in Rule 405 of the Securities Act. Yes ☒ No ☐

Indicate by check mark if the registrant is not required to file reports pursuant to Section 13 or 15(d) of the Act. Yes ☐ No ☒

Indicate by check mark whether the registrant (1) has filed all reports required to be filed by Section 13 or 15(d) of the Securities Exchange Act of 1934 during the preceding 12 months (or for such shorter period that the registrant was required to file such reports), and (2) has been subject to such filing requirements for the past 90 days. Yes ☒ No ☐

Indicate by check mark whether the registrant has submitted electronically and posted on its corporate Web site, if any, every Interactive Data File required to be submitted and posted pursuant to Rule 405 of Regulation S-T (§232.405 of this chapter) during the preceding 12 months (or for such shorter period that the registrant was required to submit and post such files). Yes ☒ No ☐

Indicate by check mark if disclosure of delinquent filers pursuant to Item 405 of Regulation S-K (§229.405 of this chapter) is not contained herein, and will not be contained, to the best of registrant’s knowledge, in definitive proxy or information statements incorporated by reference in Part III of this Annual Report on Form 10-K or any amendment to this Annual Report on Form 10-K. ☒

Indicate by check mark whether the registrant is a large accelerated filer, an accelerated filer, a non-accelerated filer, or a smaller reporting company. See the definitions of “large accelerated filer,” “accelerated filer” and “smaller reporting company” in Rule 12b-2 of the Exchange Act. (Check one):
Large accelerated filer ☒ Accelerated filer ☐ Non-accelerated filer ☐ Smaller reporting company ☐
(Do not check if a smaller reporting company)

Indicate by check mark whether the registrant is a shell company (as defined in Rule 12b-2 of the Act). Yes ☐ No ☒

As of June 30, 2015, the aggregate market value of the common stock of the registrant held by non-affiliates of the registrant was \$3,386,124,894, based on the closing price of the registrant’s common shares, par value of \$0.01 per share, reported on the New York Stock Exchange on such date of \$21.33 per share. Directors, executive officers and significant shareholders of Genpact Limited are considered affiliates for purposes of this calculation, but should not necessarily be deemed affiliates for any other purpose.

As of February 19, 2016, there were 210,545,157 common shares of the registrant outstanding.

Documents incorporated by reference:

- The registrant intends to file a definitive proxy statement pursuant to Regulation 14A within 120 days of the end of the fiscal year ended December 31, 2015. Portions of the proxy statement are incorporated herein by reference to the following parts of this Annual Report on Form 10-K:
- Part III, Item 10, Directors, Executive Officers and Corporate Governance;
 - Part III, Item 11, Executive Compensation;
 - Part III, Item 12, Security Ownership of Certain Beneficial Owners and Management and Related Stockholder Matters;
 - Part III, Item 13, Certain Relationships and Related Transactions, and Director Independence; and
 - Part III, Item 14, Principal Accounting Fees and Services.

Special Note Regarding Forward-Looking Statements

We have made statements in this Annual Report on Form 10-K (the “Annual Report”) in, among other sections, Item 1—“Business,” Item 1A—“Risk Factors,” and Item 7—“Management’s Discussion and Analysis of Financial Condition and Results of Operations” that are forward-looking statements. In some cases, you can identify these statements by forward-looking terms such as “expect,” “anticipate,” “intend,” “plan,” “believe,” “seek,” “estimate,” “could,” “may,” “shall,” “will,” “would” and variations of such words and similar expressions, or the negative of such words or similar expressions. These forward-looking statements, which are subject to risks, uncertainties and assumptions about us, may include projections of our future financial performance, which in some cases may be based on our growth strategies and anticipated trends in our business. These statements are only predictions based on our current expectations and projections about future events. There are important factors that could cause our actual results, level of activity, performance or achievements to differ materially from those expressed or implied by the forward-looking statements. In particular, you should consider the numerous risks outlined under Item 1A—“Risk Factors” in this Annual Report. These forward-looking statements include, but are not limited to, statements relating to:

- our ability to retain existing clients and contracts;
- our ability to win new clients and engagements;
- the expected value of the statements of work under our master service agreements;
- our beliefs about future trends in our market;
- political, economic or business conditions in countries where we have operations or where our clients operate;
- expected spending on business process management and information technology services by clients;
- foreign currency exchange rates;
- our ability to convert bookings to revenue;
- our rate of employee attrition;
- our effective tax rate; and
- competition in our industry.

Factors that may cause actual results to differ from expected results include, among others:

- our ability to grow our business and effectively manage growth and international operations while maintaining effective internal controls;
- our dependence on revenues derived from clients in the United States and Europe and clients that operate in certain industries, such as the financial services industry;
- our dependence on favorable tax legislation and tax policies that may be amended in a manner adverse to us or be unavailable to us in the future;
- our ability to successfully consummate or integrate strategic acquisitions;
- our ability to maintain pricing and asset utilization rates;
- our ability to hire and retain enough qualified employees to support our operations;
- increases in wages in locations in which we have operations;

[Table of Contents](#)

- our relative dependence on the General Electric Company (GE);
- financing terms, including, but not limited to, changes in the London Interbank Offered rate, or LIBOR;
- restrictions on visas for our employees traveling to North America and Europe;
- fluctuations in exchange rates between the U.S. dollar, the euro, U.K. pound sterling, Chinese renminbi, Hungarian forint, Japanese yen, Indian rupee, Australian dollar, Philippines peso, Guatemalan quetzal, Mexican peso, Polish zloty, Romanian leu, South African rand, Hong Kong dollar, Singapore dollar, Arab Emirates dirham, Brazilian real, Swiss franc, Swedish krona, Danish krone, Kenyan shilling, Czech koruna, Canadian dollar, Saudi Arabian riyal, and Thai bhat;
- our ability to retain senior management;
- the selling cycle for our client relationships;
- our ability to attract and retain clients and our ability to develop and maintain client relationships on attractive terms;
- legislation in the United States or elsewhere that adversely affects the performance of business process outsourcing and information technology services offshore;
- increasing competition in our industry;
- telecommunications or technology disruptions or breaches, or natural or other disasters;
- our ability to protect our intellectual property and the intellectual property of others;
- our ability to maintain the security and confidentiality of personal and other sensitive data of our clients, employees or others;
- deterioration in the global economic environment and its impact on our clients, including the bankruptcy of our clients;
- regulatory, legislative and judicial developments, including the withdrawal of governmental fiscal incentives;
- the international nature of our business;
- technological innovation;
- our ability to derive revenues from new service offerings; and
- unionization of any of our employees.

Although we believe the expectations reflected in the forward-looking statements are reasonable at the time they are made, we cannot guarantee future results, level of activity, performance or achievements. Achievement of future results is subject to risks, uncertainties, and potentially inaccurate assumptions. Should known or unknown risks or uncertainties materialize, or should underlying assumptions prove inaccurate, actual results could differ materially from past results and those anticipated, estimated or projected. You should bear this in mind as you consider forward-looking statements. We undertake no obligation to update any of these forward-looking statements after the date of this filing to conform our prior statements to actual results or revised expectations. You are advised, however, to consult any further disclosures we make on related subjects in our Forms 10-Q and Form 8-K reports to the SEC.

PART I

Item 1. Business

Overview

Genpact stands for “generating business impact.” We are a global leader in digitally-powered business process management and services. We architect the Lean DigitalSM enterprise through our patented Smart Enterprise Processes (SEPSM) framework that reimagines our clients’ operating models end-to-end, including the middle and back offices. This creates Intelligent OperationsSM that we help design, transform, and run. The impact on our clients is a high return on transformation investments through growth, efficiency, and business agility. For two decades, first as a General Electric division and later as an independent company, we have been passionately serving our clients. Today, we generate impact for a few hundred strategic clients, including approximately one fifth of the Fortune Global 500, and have grown to over 70,000 people in 25 countries, with corporate offices in New York City. The resulting business process and industry domain expertise and experience running complex operations are a unique heritage and focus that help us drive the best choices across technology, analytics, and organizational design.

In 2015, we had net revenues of \$2.461 billion, of which \$2.001 billion, or 81.3%, was from clients other than GE, which we refer to as Global Clients, with the remaining \$460 million, or 18.7%, coming from GE.

Our business was initially conducted through various entities and divisions of GE. We began operating as an independent company in 2004, when GE placed our operations under a newly-formed Luxembourg company and sold indirect interests in us to our initial private equity investors. In 2007, we became a Bermuda company and completed our initial public offering. In 2012, affiliates of Bain Capital Investors, LLC, or Bain Capital, acquired the majority of our initial private equity investors’ interests. As of December 31, 2015, Bain Capital (through its affiliates) owned approximately 27% of our outstanding equity.

We use the terms “Genpact,” “Company,” “we” and “us” to refer to both our predecessor company and its subsidiaries, and Genpact Limited and its subsidiaries. Our registered office is located at Canon’s Court, 22 Victoria Street, Hamilton HM 12, Bermuda.

Our Solution

Our vision is to be the global leader in business process management, helping businesses make smarter decisions and realize better business outcomes through our digitally-driven solutions that draw on our deep domain expertise and understanding of process operations, analytics and advanced technology. We seek to build long-term client relationships with companies that wish to improve the ways in which they do business and to whom we can offer a full range of services. With our broad and deep capabilities and our global delivery platform, we deliver comprehensive and innovative solutions incorporating continuous process improvement to clients around the world.

Our business focuses on industry verticals in banking and financial services, insurance, capital markets, consumer product goods, life sciences, infrastructure, manufacturing and services, healthcare and high tech.

Our service offerings in these core verticals are driven by our broad end-to-end process expertise, including:

- finance and accounting (F&A) services;
- core industry operations services;
- analytics and research;
- business consulting and enterprise risk consulting;

[Table of Contents](#)

- transformation services;
- supply chain and procurement services;
- enterprise application services;
- IT infrastructure management services; and
- collections and customer services.

We seek to deliver significant business impact for our clients by designing, transforming and running a combination of processes, as well as providing solutions that combine elements of several of our service offerings. In providing services across our global delivery platform, we draw on core capabilities in process expertise, analytics capabilities and technology expertise, as well as the operational insight we have acquired from our experience in managing thousands of processes for our clients.

- *Process Expertise.* We have extensive experience in running a wide range of processes and use this expertise to continuously improve and update our patented Smart Enterprise Processes (SEPSM) proprietary framework. We believe we have built a science of process through SEPSM—a patented and highly granular approach to managing business processes. In addition to efficiency, SEPSM focuses on maximizing process effectiveness. We also apply the principles of Lean and Six Sigma to eliminate defects and variation and reduce inefficiency. Our Lean and Six Sigma process rigor also allows us to develop and track operational metrics to measure process performance as a means of monitoring service levels and enhancing productivity.
- *Analytics and Research Capabilities.* Our analytics and research capabilities are central to our ability to improve business processes. They enable us to work with our clients and identify weaknesses in business processes and redesign and transform them to create additional business value. The confluence of big data, regulatory changes and social media are causing a major shift in the way businesses operate. We help our clients harness data to identify trends and issues, uncover new insights, identify and prevent future risks and fine-tune operations to make smarter decisions and meet business goals. We also rigorously apply analytical methodologies, which we use to measure and enhance performance of our client services. In addition, we apply these methodologies to measure and improve our own internal functions, including recruitment and retention of personnel.
- *Technology Expertise.* Our information technology expertise includes extensive knowledge and integration of cloud-based advanced digital technologies, third-party hardware, partner solutions, network and computing infrastructure, and enterprise resource planning (ERP) and other software applications. We use technology to better manage the transition of processes, to automate and run processes more efficiently and to replace or redesign processes to enhance productivity. Our ability to combine our business process and IT expertise, along with our Lean and Six Sigma skills, helps our clients achieve the full potential of business intelligence platforms and web-based software platforms. Additionally, with the growing prevalence of digital technologies incorporated in our solutions, we are certifying a new group of digital black belts and digital master black belts.
- *Operational Insight.* Our operational insight enables us to make the best use of our core capabilities. Operational insight starts with the ability to understand the business context of a process. We place great value on understanding not only the industry in which a client operates, but also the business culture and institutional parameters within which a process is performed. Operational insight also requires the judgment to determine the best way to improve a process in light of the knowledge of best practices across different industries, as well as an appreciation of what solutions can be fully implemented in the context of the particular business environment.

Smart Enterprise Processes (SEPSM)

SEPSM is our patented and highly granular approach to dramatically improving the performance of business processes. In addition to efficiency, it focuses on maximizing process effectiveness.

SEPSM and its more recent evolution, Digital SEPSM, is based on work done in the Genpact Process Innovation Lab, where we leverage our exposure to thousands of business processes and hundreds of millions of client transactions to map and analyze end-to-end processes at a granular level. This enables us to test the effectiveness of a client's processes by measuring opportunities for improvement across the value chain using best-in-class benchmarks gleaned from within and across industries and to apply our innovative process design, effective, market-leading technology, and analytical skills and tools to improve them. The result is a client-specific road map for maximizing process effectiveness. Benefits are delivered by combining our deep domain knowledge of process, key insights and best practices with execution support including focused IT applications and technology, targeted analytics, transformation services and global delivery services.

Unlike other approaches, SEPSM focuses on measuring business outcomes, such as improving cash flow and margins, which make visible the effectiveness of a process in driving business results. The approach also takes an end-to-end, enterprise-wide view, working beyond traditional organizational silos.

Genpact Digital

Genpact's Digital practice helps clients reimagine their business operations with an innovative set of advanced technologies along with differentiated core IT services that drive transformative solutions for our clients. Our Systems of EngagementTM solutions provide an engagement layer of agile, nimble technologies that address end-to-end business processes and are built using social, mobility, big data and cloud-based technologies on our foundation of deep process experience and domain expertise.

We recently introduced Lean DigitalSM, our unique approach to reimaging companies' middle and back offices using the full power of digital. Our Lean DigitalSM solutions address what we view as the shortfalls that result from many companies either focusing their digital interventions only on front-end and customer-facing processes or digitizing broken or inadequate processes without considering enterprise-wide improvements and the related potential business outcomes. Leveraging our strong foundation in Lean and Six Sigma principles, Lean DigitalSM incorporates automation and digital technologies in an end-to-end approach that transforms and digitizes companies' middle and back-office processes, ensuring a seamless connection to the front end.

Our Strategic Client Model

We seek to create long-term relationships with our clients where they view us as an integral part of their organization and not just as a service provider. These relationships often begin with the outsourcing of discrete processes or with shorter-cycle engagements in analytics and research, business consulting, enterprise risk consulting or transformation services. Over time, these relationships typically expand to encompass multiple business processes across a broader set of functions and geographic areas. As clients adapt to constantly changing environments, many are increasingly turning to Genpact for support in transforming their operations to become more competitive and agile. These long-term transformative engagements are global and multi-tower, combining process, technology, and analytics. No matter how large or small the engagement, we strive to be a seamless extension of our client's operations. To achieve this goal, we developed the Genpact Virtual CaptiveSM model for service delivery, and we may implement all or some of its features in any given client relationship, depending on the client's needs. This approach provides clients with dedicated employees and management as well as dedicated infrastructure at our delivery centers to create virtual extensions of the client's own teams and environments. We train our personnel in the client's culture to be familiar not only with the process but with the business environment in which it is being executed.

Our Strategy

The specific elements of our strategy include the following:

Enhance Targeted Vertical Industry and Domain Expertise

Clients want partners who know their industry and processes at a granular level. We continue to enhance our industry and domain capabilities through acquisitions, strategic partnerships and by investing in experienced professionals in our targeted verticals and service areas to improve client intimacy and help us deliver end-to-end services that drive business impact.

Guide Global Enterprises to Best-in-Class

Our Smart Enterprise Processes (SEPSM) framework, built on the foundation of thousands of Lean Six Sigma-based improvement ideas and benchmarks around granular process performance, builds deeper client relationships and delivers measurable business impact over time. We have recently begun integrating new digital technologies and data analytics into these frameworks to develop new Digital SEPs. Our differentiated framework is critical not only to extending client contracts but also to creating an expansive partnership with our clients.

Differentiate our Solutions by Combining Process Expertise, Analytics and Technology

Clients face an environment of uncertainty and change, which requires them to better leverage existing costs and investments, and make more informed decisions that address challenges around regulations and risk, while they continue to drive top-line growth and profitability. The insights we derive from our experience and expertise, combining smarter processes, analytics and technology, help us provide a differentiated solution to these challenges.

Expand Geographically in Key Markets

We deliver our services and solutions from service delivery centers in 17 countries, including eight locations in the United States. We continue to expand and diversify our delivery capabilities globally in order to be closer to our clients.

Our Services

Our client solutions often combine several of our service offerings. We recognize that our clients are focused on achieving business outcomes, rather than on transferring particular processes or using particular platforms. Accordingly, we focus on understanding their business needs and the business context of their existing processes in order to design appropriate and comprehensive solutions.

Our core vertical activities for our clients include the following:

- *Banking and Financial Services.* Our banking and financial services core operations include application processing; mortgage loan origination; wealth management, risk management; omni-channel account servicing and set-up; collections and customer services; commercial lending, business banking, auto finance, and finance and accounting activities. We use our analytics capabilities to help our clients price products, estimate capital and reserve requirements, analyze and monitor portfolios, and manage risk. We also handle reporting and monitoring services for statutory and regulatory compliance, portfolio and performance review services and financial planning and tax services. Our services for financial services clients include investment banking support for deals, asset-backed finance surveillance, trade finance

support, payment and fraud operations support, Basel II/III support and risk analysis for derivatives and foreign exchange. Our wealth management services include brokerage and retirement offerings that provide end-to-end process services, including onboarding, reconciliations, plan administration, fund administration, and trade support.

- *Insurance.* Our insurance services include underwriting, claims management, risk and catastrophe modeling, customer segmentation and loyalty, and finance and accounting activities. We offer insurance services to several industry sectors—life and annuities, property and casualty, and reinsurance—and provide what we refer to as a “virtual insurance company” for our clients in the insurance industry. We cover many phases of insurance business processes including product development, finance, risk management, actuarial, sales and marketing, underwriting support, and claims and policy administration.
- *Capital Markets.* Our capital markets practice provides an end-to-end range of information technology services for the capital markets industry, including application development and maintenance; managed services such as quality assurance, testing and production support; business process outsourcing; domain knowledge-based consulting related to technology systems (domain consulting); and consulting not tied to a technology system (business consulting). Areas of domain focus within our capital markets practice include asset and wealth management; risk and compliance; client onboarding; Know Your Customer (KYC); collateral management; post trade processing; and data services, such as reference data and data scrubbing and reconciliation. We have also set up centers of excellence focusing on several technology platforms used by the financial services industry, including platforms focused on brokerage compliance, trade processing and portfolio accounting.
- *Consumer Product Goods.* Our consumer product goods services include trade promotion optimization, trade promotion management, order management, master data management, customer service, marketing optimization, supply chain decision services, marketing analytics, market mix modeling, and enterprise services such as finance and accounting, indirect procurement and IT operations. We also provide supplier risk management, supplier recovery audit, shopper analytics, store- and product-mix optimization services.
- *Life Sciences.* Our life sciences and pharmaceutical services include contract management for managed markets; regulatory affairs services, including lifecycle management, regulatory operations, Chemistry Manufacturing Controls (CMC) compliance, safety and pharmacovigilance, and regulatory information management; multi-channel customer experience for medical information, sales and marketing, direct-to-consumer support, patient assistance programs (access and reimbursement), and patient support programs; and enterprise services such as F&A, indirect procurement, IT operations, risk management and audit support. We also provide comprehensive analytics services including market research and competitive intelligence, patient level data analysis, physician and drug analysis, social media monitoring and data management.
- *Infrastructure, Manufacturing and Services.* Our infrastructure, manufacturing and services offerings include enterprise processes such as finance and accounting, indirect procurement and IT operations. Our industry specific solutions include industrial internet solutions, aftermarket services support, industrial asset optimization, engineering services covering the complete product lifecycle from concept to release and sustaining engineering, supply chain management, direct procurement and logistics services.
- *Healthcare.* Our healthcare expertise covers a full spectrum of services including end-to-end transactional processes, advanced technology, analytics and consultative and transformational solutions for payers, providers and pharmacy benefit managers. Our payer solutions help manage the end-to-end life cycle of a claim, from claims processing and adjudication to claims recovery and payment integrity. Our regulatory compliance solutions for both payers and providers encompass planning, business alignment systems change management, training and testing. Our FX suite of products, which is delivered using a business process as a service, or BPaaS, model, helps payers in the areas of ICD-10 transition,

[Table of Contents](#)

DRG shift analysis and payment neutrality. Our services for accountable care organizations provide support for setup, population health, revenue administration and performance management. Our provider services, including hospital optimization, clinical coding and revenue cycle management, help providers to deliver an optimal experience to patients, improve efficiency and reduce administrative costs.

- *High Tech.* Our high tech services include service support, including customer care service, technical product support and aftermarket services; lead-to-cash; sales force commission management; supply chain and consumer analytics; and enterprise services such as F&A, sourcing and procurement, and IT operations.

In addition to these vertical activities, our broad end-to-end process expertise spans a number of service areas, including F&A services, core industry operations services, analytics and research, business consulting and enterprise risk consulting, transformation services, supply chain and procurement services, enterprise application services, IT infrastructure management services, and collections and customer services.

Finance and Accounting (F&A)

We believe we are one of the world's premier providers of F&A services. Our services include Accounts Payable (AP), Order to Cash (OTC), Record to Report (R2R), and Enterprise Risk and Compliance services. Our AP services span the end-to-end AP function and include document management, invoice processing, approval and resolution management, and T&E processing. Our OTC services cover customer master data management, credit and contract management, fulfillment, billing, collections, and dispute management services. Our R2R services encompass accounting, closing and reporting, including SEC reporting, treasury, tax services, financial planning and analysis, and product cost accounting. Genpact Enterprise Risk and Compliance specializes in operational risk, SOX advisory, third-party risk management and regulatory compliance with services such as enterprise risk management, internal audits, FCPA and IT risk management.

In addition to managing our clients' finance and accounting processes, we help them design, transform, and run their finance operating models to achieve best-in-class performance. Genpact Systems of Engagement™ for F&A creates an agile technology layer that complements existing systems of record, providing continuity of information and operations across the enterprise. Our Systems of Engagement™ modules for OTC, AP, and R2R support smart processes, detailed analytics, and a host of agile technologies, including proprietary cloud-based technology platforms and bolt-on, best-of-breed solutions from our technology partners. Our F&A services also include SEPSM frameworks and solutions, which aim to significantly improve client processes.

Core Industry Operations Services

We help our clients design, transform and run core enterprise operations specific to their industries. On the foundation of domain expertise embedded in our SEPSM frameworks, we use our Lean DigitalSM approach to leverage Systems of EngagementSM technologies and specialized analytics to power what we refer to as Intelligent OperationsSM. We support our clients' core operations in retail and commercial banking, capital markets, insurance, healthcare, life sciences, manufacturing, consumer goods and high tech.

Analytics and Research

We offer analytics services both on a standalone basis and as an integrated part of our other service offerings. We help our clients re-imagine their business operations in the context of analytics and technology through the delivery of Genpact Intelligent OperationsSM fueled by our Lean DigitalSM approach. Using our Systems of Engagement™ approach, we have built what we refer to as the Genpact Intelligent Process Insights Engine, a process-aware platform that embeds technology and analytics to deliver purpose-built analytics applications. Through our Data-to-ActionSM Analytics approach, we help our clients harness data to assess business opportunities, mitigate risks, improve performance or otherwise help their businesses. Companies do not

[Table of Contents](#)

always recognize the inherent potential in data or do not have the capability to apply the rigorous analytical models that might reveal opportunities. Our domain-specific analytics prowess, along with a sophisticated innovation ecosystem, is increasingly embedded in all of our service offerings to help clients make timely, informed and fact-based decisions. By quantitatively and qualitatively scrutinizing data, we can deliver the insight necessary for our clients to assess new business opportunities, mitigate market risks, and make better business decisions. Our Smart Decision Lab was created to facilitate collaboration and innovation with clients and industry experts, leveraging the combination of data and analytics with process expertise. Our Smart Decision Lab was incubated to create new lines of competency, build solution prototypes, test new business use cases, and develop intelligent technology applications.

Business Consulting and Enterprise Risk Consulting

We partner with our clients through the lifecycle of designing, transforming and running a broad range of their processes. Our consulting groups help clients design the right strategy and target operating model for their functions. We help clients develop transformation roadmaps that deliver a target operating model vision and implement process-level improvements. Our business and enterprise risk consulting teams support our clients through transformation delivery, including enhanced regulatory compliance. We improve risk and control environments across operational and regulatory processes while preserving value and mitigating risk exposure. Our consulting business is built on our deep understanding of the complete enterprise operating model and draws on our expertise in process, state-of-the-art technology, organizational structures, compliance, and risk-mitigation strategies. We combine a design-thinking approach with our industry and domain expertise to create client offerings that apply cutting-edge digital technologies and analytics with a goal of driving fundamental shifts in clients' business performance.

Transformation Services

Our transformation services help clients realize cost savings and/or increased revenues by improving or re-engineering business processes that are underperforming or designing processes that are needed to meet growth objectives. Clients engage our transformation teams to provide an end-to-end view of their organization and help determine business process needs at a strategic level as well as at the execution level. Strategically, we help clients achieve a comprehensive assessment of how well their enterprise-level processes, such as source-to-pay, order-to-cash, record-to-report, inquiry-to-order, new product introduction and sales force effectiveness, perform against industry benchmarks and best practices. At the execution level, we institutionalize the recommendations by deploying resources to train the client team and drive sustainable best practices.

Supply Chain and Procurement

Our supply chain and procurement services include direct and indirect strategic sourcing, category management, spend analytics, procurement operations, master data management, and other procurement and supply chain advisory services. We work with our clients to design, transform and run sourcing strategies across expense categories, drive process compliance, and realize significant cost reduction in their businesses. This includes sourcing and procurement process transformation, inventory planning and optimization, value transformation, and process automation. We integrate disparate technology systems and provide dynamic digital dashboard reporting while transforming business operations and improving service productivity. We leverage our technology expertise in delivering our services in this area, particularly in automating order management processes and optimizing the supply chain. We have competency in many of the custom platforms used by our clients and are not tied to any single platform or vendor.

Enterprise Application Services

Our information technology approach focuses on business outcomes and related business processes. Equipped with industry and functional expertise and guided by our proprietary Lean DigitalSM approach, we aim

[Table of Contents](#)

to create Intelligent OperationsSM that execute efficiently and effectively, and continuously learn to adapt. Our focused approach is designed to maximize the impact that business processes have on business outcomes while limiting capital expenditures, risk, complexity, and time-to-benefit. Our solutions include business intelligence and data services, enterprise resource planning, quality assurance and technology integration. We also have significant expertise in Hyperion, SAS and Cognos, and platform support for ERP systems such as Oracle, SAP and Microsoft.

IT Infrastructure Management Services

Our IT infrastructure management services consist of end user computing, infrastructure management services, application production support and database management services. We provide support in more than 25 languages with a global footprint of native speakers. We provide monitoring and management of clients' data centers, servers, storage, emails, networks, databases, applications and end user devices. We use a network of Remote Operations Centers to provide 24/7 infrastructure monitoring and management. Along with Information Technology Infrastructure Library (ITIL) ISO 20000, we use Six Sigma and Lean principles to address technology problems and to enable our clients to align their IT to business priorities and at the same time reduce technology costs. We use our proprietary SEPSM framework Service Disruption to Restore (D2R), along with our accelerators and IP frameworks, to continuously reduce defects. We also provide cloud enablement services, ITIL implementation services and comprehensive BPaaS services.

Collections and Customer Services

Our collections and customer services are provided primarily in the areas of consumer banking, business-to-business finance and mortgage servicing. Our collections services include collections strategy design through smart analytics and a full range of accounts receivable management services, such as early to late stage collections, skip-tracing, refunds and other specialized services. In our collections services, we act as an agent only; we do not acquire debts for our own account or handle debtor payments. Our customer services include account servicing and customer care services such as handling customer queries, general servicing and dispute resolution. We provide multi-channel voice and non-voice services, and we also provide origination and order management support.

Our Clients

Our clients include some of the best known companies in the world, many of which are leaders in their respective industries.

GE has been our largest client since our inception and accounted for approximately 18.7% of our 2015 revenues. We currently provide services to most of GE's business units, including GE Capital, Power and Water, Oil and Gas, Energy Management, Renewables, Aviation, Healthcare, Transportation, Current, Digital and Corporate. The services we currently provide to GE are broad in their nature and are drawn from all of our service offerings. Although we have a single master services agreement, or MSA, with GE, we have many statements of work, or SOWs, with GE that cover in more detail the nature of the work we will perform and the amounts we will bill for the relevant services. Currently, as a general matter, each GE business unit makes its own decisions as to whether to enter into a SOW with us and as to the terms of any such SOW. Therefore, although some decisions may be made centrally at GE, our revenues from GE are generally attributable to a number of different businesses each with its own leader responsible for decision-making regarding our services.

We have over 700 clients spread across a variety of industries and geographies. Our net revenues from Global Clients have grown rapidly in the last five years, from approximately \$780 million in 2010 to approximately \$2 billion in 2015, a compound annual growth rate of 20.7%. Our net revenues from Global Clients as a percentage of total net revenues increased from 62.0% in 2010 to 81.3% in 2015. See Item 7—"Management's Discussion and Analysis of Financial Condition and Results of Operations—Classification of

[Table of Contents](#)

Certain Net Revenues.” The majority of our Global Clients are based in the United States, and we also have Global Clients in Europe, Asia and Australia.

Our contracts with our clients generally take the form of an MSA, which is a framework agreement that is then supplemented by SOWs. Our MSAs specify the general terms applicable to the services we will provide. For a description of our MSAs and SOWs, see Item 7—“Management’s Discussion and Analysis of Financial Condition and Results of Operations—Overview—Revenues.”

We serve about one fifth of the Global Fortune 500, including AstraZeneca, Boeing, Citigroup, GE, GlaxoSmithKline, Heineken, Honeywell, Merck, Mondelez, Nissan, Walgreens and Wells Fargo.

Our People

Our people are critical to the success of our business. Our Chief Executive Officer and other members of our senior leadership team have been involved in our business since its commencement under GE resulting in an experienced and cohesive leadership team. Many members of our leadership team developed their management skills working within GE and many of them were involved in the founding of our business. They have built our business based on the experience gained in helping GE meet a wide range of challenges. As a result, we are an institutional embodiment of much of the wisdom and experience GE developed in improving and managing its own business processes.

We have created, and constantly reinforced, a culture that emphasizes teamwork, constant improvement of our processes and, most importantly, dedication to the client. We manage this challenge through innovative human resource practices. These include broadening the employee pool by opening delivery centers in diverse locations, using innovative recruiting techniques to attract the best employees, emphasizing ongoing training, instilling a vibrant and distinctive culture and providing well-defined, long-term career paths. We also have programs modeled on GE management training programs to develop the next generation of leaders and managers of our business.

As of December 31, 2015, we had approximately 72,000 employees. We monitor and manage our attrition rate very closely, and believe it is one of the lowest in the industry. We attribute this to our reputation, our ability to attract high quality applicants, our emphasis on maintaining our culture and the breadth of exposure, experience and opportunity for advancement that we provide to our employees.

Lean and Six Sigma Methodologies

Lean is a methodology for reducing waste or inefficiency in a process. Among other things, it is designed to measure and eliminate overproduction, over-processing and waiting, and to improve the flow of a process. Six Sigma is a method for improving process quality by removing variation, defects and their causes from business activities. We have Lean Six Sigma programs that train, test and grade employees in Lean and Six Sigma principles and award them Lean Six Sigma certifications. We recently launched a simplified transformation framework – ProDGSM, a four-step method focused on driving outcomes leveraging Lean Six Sigma, transformation, change management, digital and design thinking tools. The rankings of Lean Six Sigma qualifications from lowest to highest are green belt, black belt and master black belt.

As of December 31, 2015, we had more than 15,000 employees with Six Sigma green belt training, over 600 employees with Six Sigma black belt training, and more than 42,000 Lean-trained employees. This large number of employees with Lean Six Sigma training helps infuse our organization with a disciplined, analytical approach to everything we do.

Recruiting

We face meaningful competition for skilled employees in every jurisdiction in which we operate. We have refined our talent acquisition strategy by organizing our recruiting teams by industry vertical and utilizing an

internal executive recruiting team, social media platforms, online job portals and professional search firms to recruit globally. Our internal employee referral program has also become a key recruiting vehicle for us. We believe that our focus on our employees' career development makes us attractive to candidates beyond our delivery center locations. As part of our global diversity and inclusion efforts, we have launched Career 2.0, a program to attract top female leaders who have just returned from the workforce after an extended break.

Training and Development

We believe in extensive and continuous training of our employees. We have the infrastructure to train approximately 5,200 people at any one time with 234 trainers. In 2015, we had more than 16,000 employees enrolled in part-time professional degree, e-learning and other non-degree programs provided internally or by universities and other third parties. Our training programs are designed to transfer the industry-specific knowledge and experience of our industry leaders to our employees to ensure we maintain our deep process and domain expertise across the industries and processes in which we work. Our training programs cover a large number of topics, including specific service offerings, key technical and IT skills, our different clients' workplace cultures and Lean and Six Sigma methodologies. A large part of our continuous training is designed to impart the skills and knowledge required by our employees to move to positions of increasing responsibility within Genpact.

Retention

In order to meet our growth and service commitments, we are constantly striving to attract and retain employees. There is significant turnover of employees in the business process management and information technology sectors generally, particularly in India where the majority of our employees are currently based. Our attrition rate for all employees who have been employed by us for one day or more was 27% in 2015. We believe this rate is relatively low for our industry based on statistics published by industry associations such as NASSCOM. We attribute this low attrition rate to a number of factors, including our effective recruiting measures, extensive training and a strong culture of providing opportunities for growth and learning. Approximately 13% of our employees were promoted in 2015, and we filled a majority of new positions internally.

We also take aggressive action to monitor and minimize potential attrition. Using Six Sigma principles we have developed an early warning system that tracks employees and gives us an insight into which employees are most likely to resign. These employees are automatically highlighted to management who can take action such as relocating the employee or enrolling the employee in continuing education programs to increase the likelihood of retention.

As another measure designed to minimize attrition, we "right-skill" our employees to the tasks assigned to them. This means that we match the level of services required to the experience and qualification of the employee concerned and we avoid having over-qualified people in any particular job. This allows us to give our highly qualified and experienced people higher-value jobs and, coupled with the practice of up-skilling, ensures better career paths for all of our employees.

Corporate Social Responsibility

Genpact's approach to Corporate Social Responsibility focuses on three pillars that reflect our strengths and core expertise as well as causes that our employees are passionate about:

- Education and employability
- Environment and sustainability
- Inclusion and community outreach

[Table of Contents](#)

We have institutionalized a culture of giving and volunteering through a number of global platforms, programs, projects and social initiatives. Our more than 14,000 employee volunteers have, among other things, helped underprivileged children and women to develop vocational skills, worked on environmental initiatives such as rejuvenating urban forest land and participating in cleaning drives, and participated in programs that address the health and nutritional needs of the poor. Additionally, more than 15,000 of our employees have participated in our payroll-based charitable donation programs.

Our Alliances

We have entered into and continue to pursue partnerships or alliances with companies whose capabilities complement ours in an effort to enhance our existing solutions or create new solutions to address market needs. Such alliances may be transaction or deal-specific, may be for the development of joint capabilities in a service line or may take the form of enterprise-wide transformational partnerships. For example, we have a joint venture with Markit Limited, KYC.com, to create a streamlined service to manage “Know-Your-Customer” information for clients in our capital markets vertical.

We recently launched an incubation program designed to enrich our Lean DigitalSM solutions by nurturing partnerships with established and emerging players and start-ups that specialize in leading-edge disruptive digital technologies. Our goal is to quickly transform business processes and operations to create a step change in companies’ competitiveness. A key ingredient in this ecosystem is our extensive work with our many clients across industries. Our innovation center will combine our partners’ solutions with our expertise and hands-on practical experience.

Sales and Marketing

We market our services to both existing and potential clients through our business development team. Members of this team are based around the globe, including in the United States, Europe, Australia and Asia, and dedicate their time to expanding the services we provide to our existing clients as well as acquiring new clients.

We have designated client partners or global relationship managers for each of our strategic relationships. The relationship manager is supported by process improvement, quality, transition, finance, human resources, information technology and industry/product subject matter expert teams to ensure the best possible solution is provided to our clients. We constantly measure our client satisfaction levels to ensure that we maintain high service levels for each client, using measures such as the Net Promoter Score. Our sales force is primarily organized by industry vertical teams that are supported by horizontal service offerings.

The length of our selling cycle varies depending on the type of engagement. The sales cycle for project work is much shorter than the sales cycle for a large business process engagement. Our efforts may begin in response to our lead generation program, a perceived opportunity, a reference by an existing client, a request for proposal or otherwise. In addition to our business development personnel, the sales effort involves people from the relevant service areas, people familiar with that prospective client’s industry, business leaders and Six Sigma resources. We may expend substantial time and resources in securing new business. See Item 7—“Management’s Discussion and Analysis of Financial Condition and Results of Operations—Overview—Revenues.”

As our relationship with a client grows, the time required to win an engagement for additional services often gradually declines. In addition, as we become more knowledgeable about a client’s business and processes, our ability to identify opportunities to create value for the client typically increases. For example, productivity benefits and greater business impact can often be achieved by applying our SEPSM methodology, by focusing on processes that are “upstream” or “downstream” from the processes we initially handle, or by applying our analytical and IT capabilities to re-engineer processes. In addition, clients often become more willing over time to turn over more complex and critical processes to us as we demonstrate our capabilities.

We also strive to foster relationships between our senior leadership team and our clients' senior management. These "C-level" relationships ensure that both parties are focused on establishing priorities, aligning objectives and driving client value from the top down. High-level executive relationships have been particularly constructive as a means of increasing business from our existing clients. It also provides us with a forum for addressing client concerns. Our governance methodology is designed to ensure that we are well connected at all levels of our clients' organizations (executive, management and operations).

Significant new business opportunities are reviewed by business and sales leaders from the applicable industry vertical, operations personnel, and members of our finance department. If they determine that the new business is aligned with our strategic objectives and a good use of our resources, then our business development team is authorized to pursue the opportunity.

Global Delivery Platform

A key differentiator for us is our global network of 72 delivery centers in 17 countries. We also have a number of employees who work directly in client locations or provide services from a virtual environment which offers flexibility for both clients and employees. Our presence in locations around the world provides us with multi-lingual capabilities, access to a larger talent pool, "near-shoring" capabilities to take advantage of time zones, as well as the ability to provide services from the United States. With this network, we manage complex processes in multiple geographic regions. We use different locations for different types of services depending on the specific client needs and the mix of skills and cost of employees available in each location. We choose the location of our delivery centers based on a number of factors, which include the available talent pool, infrastructure, government support and operating costs, as well as client demand.

We have been a pioneer in our industry in opening centers in several cities in India as well as in some of the other countries in which we operate. We were one of the first companies in our industry to establish operating centers in certain locations, including Dalian, Foshan and Huaqiao in China; Bucharest, Romania; and Gurgaon, Hyderabad, Jaipur and Kolkata in India. We constantly evaluate new locations, including new countries and new cities within countries in which we currently operate, as potential sites for delivery centers and offices. Our delivery centers are located in Brazil, China, the Czech Republic, Guatemala, India, Japan, Kenya, Mexico, the Netherlands, the Philippines, Poland, Romania, Slovakia, South Africa, the United Arab Emirates, the United Kingdom, and the United States. As of December 31, 2015, we provided services in more than 30 languages.

The large number of different countries from which we serve our clients differentiates us from a number of our competitors and enables us to take advantage of different languages and time zones which, in turn, enhances our ability to serve our clients.

Intellectual Property

Increasingly, the solutions we offer our clients include a range of proprietary methodologies, software, and reusable knowledge capital. We also develop intellectual property in the course of our business and our agreements with our clients regulate the ownership of such intellectual property. We regularly apply for patents, trademarks, service marks, copyrights and domain names to protect our intellectual property. Some of our intellectual property rights are trade secrets and relate to proprietary business process enhancements.

At times, we use third-party software platforms and the software systems of our clients to provide our services. Our agreements with our clients normally include a license to use the client's proprietary systems to provide our services. Clients authorize us to access and use third party software licenses held by the client so that we may provide our services.

It is our practice to enter into agreements with our employees and independent contractors that:

- ensure that all new intellectual property developed by our employees or independent contractors in the course of their employment or engagement is assigned to us;
- provide for employees' and independent contractors' cooperation in intellectual property protection matters even if they no longer work for us; and
- include a confidentiality undertaking by our employees and independent contractors.

Competition

We operate in a highly competitive and rapidly evolving global market. We have a number of competitors offering services that are the same as or similar to ours. Our competitors include:

- large multinational service providers, such as Accenture plc, Capgemini S.A. and International Business Machines Corporation, and large multinational accounting firms, such as Deloitte Consulting LLP and PricewaterhouseCoopers LLP;
- companies that are primarily business process service providers operating from low-cost countries, most commonly India, such as ExlService Holdings, Inc. and WNS Holdings Limited;
- companies that are primarily information technology service providers with some business process service capabilities, such as Cognizant Technology Solutions, Infosys Technologies Limited, Tata Consultancy Services Limited and Wipro Limited;
- smaller, niche service providers that provide services in a specific geographic market, industry or service area; and
- in-house departments of companies that use their own resources rather than engage an outside firm for the types of services and solutions we provide.

Our revenues are derived primarily from *Fortune* Global 500 and *Fortune* 1000 companies. We believe that the principal competitive factors in our industry include:

- skills and capabilities;
- technical and industry expertise;
- innovative service and product offerings;
- ability to add value, including through continuous process improvement;
- reputation and client references;
- contractual terms, including competitive pricing;
- scope of services;
- quality of services and solutions;
- ability to sustain long-term client relationships; and
- global reach and scale.

Our clients typically retain us on a non-exclusive basis.

Regulation

We are subject to regulation in many jurisdictions around the world as a result of the complexity of our operations and services, including at the federal, state and local level, particularly in the countries where we have operations and where we deliver services. We are also subject to regulation by regional bodies such as the European Union, or EU.

In addition, the terms of our service contracts typically require that we comply with applicable laws and regulations. In some contracts, we are contractually required to comply even if such laws and regulations apply to our clients, but not to us. In some of our service contracts, our clients require us to take specific steps intended to make it easier for our clients to comply with requirements that are applicable to them. In some of our other service contracts, our clients undertake the responsibility to inform us about laws and regulations that may apply to us in jurisdictions in which they are located.

If we fail to comply with any applicable laws and regulations, we may be restricted in our ability to provide services, and may also be the subject of civil or criminal actions involving penalties, any of which could have a material adverse effect on our operations. Our clients generally have the right to terminate our contracts for cause in the event of regulatory failures, subject to notice periods. See Item 1A—“Risk Factors—Risks Related to our Business—Our global operations expose us to numerous and sometimes conflicting legal and regulatory requirements, and violations of these laws and regulations could harm our business.” If we fail to comply with contractual commitments to facilitate our clients’ compliance, we may be liable for contractual damages, and clients in regulated industries may be less willing to use our services.

In the United States, we are either directly subject to, or contractually required to comply or facilitate our clients’ compliance with, laws and regulations arising out of our work for clients operating there, especially in the area of banking, financial services and insurance, such as the Financial Modernization Act (sometimes referred to as the Gramm-Leach-Bliley Act), the Fair Credit Reporting Act, the Fair and Accurate Credit Transactions Act, the Right to Financial Privacy Act, the USA PATRIOT Act, the Bank Service Company Act, the Home Owners Loan Act, the Electronic Funds Transfer Act, the Equal Credit Opportunity Act, the Real Estate Settlement Procedures Act and the Troubled Assets Relief Program, as well as regulation by U.S. agencies such as the SEC, the Federal Reserve, the Federal Deposit Insurance Corporation, the National Credit Union Administration, the Commodity Futures Trading Commission, the Federal Financial Institutions Examination Council, the Office of the Comptroller of the Currency, and the Consumer Financial Protection Bureau. We are also subject to regulation under the Health Insurance Portability and Accountability Act, the Federal Trade Commission Act, the Family Educational Rights and Privacy Act, the Communications Act, the Electronic Communications Privacy Act and applicable regulations in the area of health and other personal information that we process as part of our services.

Because of our debt collections work in the United States, we are also regulated by laws such as the Truth in Lending Act, the Fair Credit Billing Act and the Fair Debt Collection Practices Act and related regulations. We are currently licensed to engage in debt collection activities in all jurisdictions in the United States where licensing is required.

Because of our mortgage origination activities in the United States, in addition to the applicable regulations listed above, we are subject to laws such as the S.A.F.E. Mortgage Licensing Act, the Bank Secrecy Act, the Equal Credit Opportunity Act, the Fair and Accurate Credit Transactions Act, the Fair Housing Act, the Homeowners Protection Act, the Truth in Lending Act, the Real Estate Settlement Procedures Act, and the Home Mortgage Disclosure Act and by regulatory bodies such as the U.S. Department of Housing and Urban Development. We currently hold mortgage related licenses in 48 states and the District of Columbia and are regulated by each applicable state regulatory agency.

Because of our insurance processing activities, we are currently licensed as a third party administrator in 41 states and are regulated by the department of insurance in each such state. In two other states, we qualify for regulatory exemption from licensing based on the insurance processing activities we provide.

[Table of Contents](#)

We are affected by laws in the United States, the United Kingdom and the EU that are intended to limit the impact of outsourcing on employees in those countries. See Item 1A—“Risk Factors—Risks Related to our Business—Future legislation in the United States and other jurisdictions could significantly affect the ability or willingness of our clients and prospective clients to utilize our services.”

We are also subject to laws and regulations on direct marketing, such as the Telemarketing Consumer Fraud and Abuse Prevention Act and the Telemarketing Sales Rule, the Telephone Consumer Protection Act and rules promulgated by the Federal Communications Commission, and the CAN-SPAM Act.

We are subject to laws and regulations governing foreign trade, such as the Arms Export Control Act, as well as by government bodies such as the Commerce Department’s Bureau of Industry and Security, the State Department’s Directorate of Defense Trade Controls and the Treasury Department’s Office of Foreign Assets Control.

Several of our service delivery centers, primarily located in India, China, the Philippines and Guatemala, benefit from tax incentives or concessional rates provided by local laws and regulations. The Indian Special Economic Zones Act of 2005, or SEZ legislation, introduced a tax holiday in certain situations for operations established in designated “special economic zones,” or SEZs. The SEZ tax benefits are available only for new business operations that are conducted at qualifying SEZ locations. We cannot predict what percentage of our operations or income in India or other jurisdictions in future years will be eligible for a tax holiday. See Item 7—“Management’s Discussion and Analysis of Financial Condition and Results of Operations—Overview—Income Taxes.” In addition to the tax holidays described above, certain benefits are also available to us under certain Indian state laws. These benefits include rebates and waivers in relation to payments for the transfer or registration of property (including for the purchase or lease of premises), waivers of conversion fees for land, exemption from state pollution control requirements, entry tax exemptions, labor law exemptions and commercial usage of electricity.

Our hedging activities and currency transfer are restricted by regulations in certain countries, including India, Romania and China.

Certain Bermuda Law Considerations

As a Bermuda company, we are also subject to regulation in Bermuda. Among other things, we must comply with the provisions of the Companies Act 1981 regulating the declaration and payment of dividends and the making of distributions from contributed surplus.

We are classified as a non-resident of Bermuda for exchange control purposes by the Bermuda Monetary Authority. Pursuant to our non-resident status, we may engage in transactions in currencies other than Bermuda dollars. There are no restrictions on our ability to transfer funds in and out of Bermuda or to pay dividends to United States residents that are holders of our common shares.

Under Bermuda law, “exempted” companies are companies formed for the purpose of conducting business outside Bermuda from a principal place of business in Bermuda. As an exempted company, we may not, without a license granted by the Minister of Economic Development, participate in certain business transactions, including transactions involving Bermuda landholding rights and the carrying on of business of any kind, for which we are not licensed in Bermuda.

Available Information

We file current and periodic reports, proxy statements, and other information with the SEC, copies of which can be obtained from the SEC’s Public Reference Room at 100 F Street, NE., Washington, D.C. 20549. Information on the operation of the Public Reference Room can be obtained by calling the SEC at 1-800-SEC-0330.

[Table of Contents](#)

The SEC maintains an Internet site that contains reports, proxy and information statements, and other information regarding issuers that file electronically with the SEC, at www.sec.gov. We make available free of charge on our website, www.genpact.com, our Annual Report on Form 10-K, Quarterly Reports on Form 10-Q, Current Reports on Form 8-K and amendments to those reports filed or furnished pursuant to Section 13(a) or 15(d) of the Securities Exchange Act of 1934, as amended, as soon as reasonably practicable after we electronically file such material with, or furnish it to, the SEC. The contents of our website are not incorporated by reference into this Annual Report.

Executive Officers

The following table sets forth information concerning our executive officers as of February 15, 2016:

<u>Name</u>	<u>Age</u>	<u>Position(s)</u>
N.V. Tyagarajan	54	President, Chief Executive Officer and Director
Edward Fitzpatrick	49	Chief Financial Officer
Patrick Cogny	49	Senior Vice President, Infrastructure, Manufacturing and Services
Victor Guaglianone	60	Senior Vice President and General Counsel
Piyush Mehta	47	Senior Vice President, Human Resources
Arvinder Singh	51	Senior Vice President, Capital Markets and IT Services
Mohit Thukral	50	Senior Vice President, Banking, Financial Services and Insurance

N.V. Tyagarajan has served as our President and Chief Executive Officer since June 2011. From February 2009 to June 2011, he was our Chief Operating Officer. From February 2005 to February 2009, he was our Executive Vice President and Head of Sales, Marketing and Business Development. From October 2002 to January 2005, he was Senior Vice President, Quality and Global Operations, for GE's Commercial Equipment Finance division. Between 1999 and 2002, he served as our Chief Executive Officer.

Edward Fitzpatrick became our Chief Financial Officer in July 2014. Prior to joining Genpact, he spent 13 years at Motorola Solutions Inc. and its predecessor company Motorola Inc., most recently serving as executive vice president and Chief Financial Officer. Prior to Motorola, he worked at General Instrument Corporation and Price Waterhouse, LLP. Mr. Fitzpatrick also currently serves as a director of CBOE, Inc.

Patrick Cogny has served as our Senior Vice President of Infrastructure, Manufacturing and Services since September 2011. From 2005 to August 2011, he was the Chief Executive Officer of Genpact Europe. Prior to this, he spent 15 years working for GE in the Healthcare business and in the GE Europe corporate headquarters, in France, the United States and Belgium.

Victor Guaglianone has served as our Senior Vice President, General Counsel & Corporate Secretary since January 2007. From 2004 to 2007, he was senior counsel at Holland & Knight LLP. From 2003 to 2004, he served as a commercial arbitrator for the American Arbitration Association. Prior to 2003, he spent 16 years at GE Capital, most recently as Vice President and Associate General Counsel.

Piyush Mehta has served as our Senior Vice President of Human Resources since March 2005. He has worked for us since 2001 as Vice President of Human Resources.

Arvinder Singh has served as our Senior Vice President, Capital Markets and IT Services since October 2013. From August 2011 to October 2013, he was Senior Vice President, Sales and Marketing, Client Relationships and Re-engineering. From August 2008 to July 2011, he was Global Head of Client Relationships and GE, and from June 2005 to August 2008 he was the Business Leader for Lean Six Sigma, Transitions and Solutions. Prior to joining Genpact in June 2005 he was Senior Vice President, Six Sigma and Chief Quality Officer for GE Vendor Financial Services.

Mohit Thukral has served as our Senior Vice President, Banking, Financial Services and Insurance since 2004. He was also responsible for our healthcare business from July 2011 to December 2014.

Item 1A. Risk Factors**Risks Related to our Business**

Our results of operations could be adversely affected by economic and political conditions and the effects of these conditions on our clients' businesses and levels of business activity.

Global macroeconomic conditions affect our clients' businesses and the markets they serve. Volatile, negative or uncertain economic conditions in our significant markets have undermined and could in the future undermine business confidence in our significant markets or in other markets, which are increasingly interdependent, and cause our clients to reduce or defer their spending on new initiatives, or may result in clients reducing, delaying or eliminating spending under existing contracts with us, which would negatively affect our business. Growth in the markets we serve could be at a slow rate, or could stagnate or contract, in each case, for an extended period of time. Differing economic conditions and patterns of economic growth and contraction in the geographical regions in which we operate and the industries we serve have affected and may in the future affect demand for our services. A material portion of our revenues and profitability is derived from our clients in North America and Europe. Weak demand or a slower-than-expected recovery in these markets could have a material adverse effect on our results of operations. Ongoing economic volatility and uncertainty and changing demand patterns affect our business in a number of other ways, including making it more difficult to accurately forecast client demand and effectively build our revenue and resource plans. Economic volatility and uncertainty is particularly challenging because it may take some time for the effects and changes in demand patterns resulting from these and other factors to manifest themselves in our business and results of operations. Changing demand patterns from economic volatility and uncertainty could have a significant negative impact on our results of operations.

Historically, GE has accounted for a significant portion of our revenues and any material loss of business from, or change in our relationship with, GE could have a material adverse effect on our business, results of operations and financial condition.

Historically, we have derived a significant portion of our revenues from GE. For 2013, 2014 and 2015, GE accounted for 22.6%, 20.4% and 18.7% of our revenues, respectively. As a result of GE's publicly announced plan to divest a significant portion of its GE Capital business, we expect that our services for GE will decline as GE concludes the planned divestitures. We intend to make efforts to procure contracts with respect to the divested businesses; however, there can be no assurance that we will be able to procure any such contracts or that such contracts would be on favorable terms. In addition, our master services agreement with GE, which commits GE to purchase minimum dollar amounts of services annually, expires in December 2016. As a result of the foregoing, we expect our revenues from GE to continue to decline in the future.

We expect that our business with GE will continue to come from a variety of GE's businesses and that, in general, GE's decisions to use our services will continue to be made by a number of people within GE. Therefore, although some decisions may be made centrally at GE, we expect that the total level of business we receive will continue to depend on the decisions of the various operating managers of such businesses. Finally, there can be no assurance that GE will not establish its own business unit to provide English-language business process services from low-wage countries or otherwise compete with us.

Any of the above events could have a material adverse effect on our business, results of operations and financial condition.

Future legislation in the United States and other jurisdictions could significantly affect the ability or willingness of our clients and prospective clients to utilize our services.

The topic of companies outsourcing services to organizations operating in other countries is a source of political discussion in many countries. For example, many organizations and public figures in the United States

have publicly expressed concern about a perceived association between offshore service providers and the loss of jobs in the United States. Current or prospective clients may elect to perform such services themselves or may be discouraged from transferring these services from onshore to offshore providers to avoid negative perceptions that may be associated with using an offshore provider. Any slowdown or reversal of existing industry trends toward offshore outsourcing would seriously harm our ability to compete effectively with competitors that provide services from the United States.

In the United States, federal and state measures aimed at limiting or restricting offshore outsourcing have been occasionally proposed and enacted. The measures that have been enacted to date generally have restricted the ability of government entities to outsource work to offshore business process service providers and have not materially adversely affected our business, primarily because we do not currently work for such governmental entities and they are not currently a focus of our sales strategy. Such legislation might, for example, require call centers to disclose their geographic locations, require notice to individuals whose personal information is disclosed to non-U.S. affiliates or subcontractors, require disclosures of companies' foreign outsourcing practices, or limit eligibility for government contracts or financial incentives for companies that transfer work to foreign work locations. Legislation to expand privacy protections in the United States could discourage offshore outsourcing by, for example, requiring notice and consent as a condition for sharing sensitive personal information with third party service providers. In addition, the current U.S. President has encouraged tax incentives for U.S. businesses to insource functions or return outsourced operations to the U.S. There can be no assurance that pending or future legislation in the United States that would significantly adversely affect our business, results of operations and financial condition will not be enacted. Legislation enacted in certain European jurisdictions and any future legislation in Europe, Japan or any other country in which we have clients restricting the performance of business process services from an offshore location could also have a material adverse effect on our business, results of operations and financial condition. For example, evolving European Union cloud computing standards and regulations and proposed taxes on outsourced data center activities may limit or restrict our operations, or make them more costly. Moreover, legislation enacted in the United Kingdom and by many EU countries, provides that if a company outsources all or part of its business to a service provider or changes its current service provider, the affected employees of the company or of the previous service provider are entitled to become employees of the new service provider, generally on the same terms and conditions as their original employment. In addition, dismissals of employees who were employed by the company or the previous service provider immediately prior to that outsourcing, if the dismissals resulted solely or principally from the outsourcing, are automatically considered unfair dismissals that entitle such employees to compensation. As a result, in order to avoid unfair dismissal claims we may have to offer, and become liable for, voluntary redundancy payments to the employees of our clients in the United Kingdom and other EU countries who have adopted similar laws who transfer business to us. We believe that this legislation could materially affect our ability to obtain new business from companies in the EU and, after including the cost of the potential compensation paid for unfair dismissal claims or redundancies, to provide outsourced services to our current and future clients in the EU in a cost-effective manner.

Our global operations expose us to numerous and sometimes conflicting legal and regulatory requirements, and violations of these laws and regulations could harm our business.

We are subject to, or subject to contractual requirements to comply with or facilitate our clients' compliance with, numerous, and sometimes conflicting, legal regimes on matters such as anticorruption, import/export controls, trade restrictions, taxation, immigration, internal and disclosure control obligations, securities regulation, anti-competition, data privacy and protection, wage-and-hour standards, and employment and labor relations. Our clients' business operations are also subject to numerous regulations, and our clients may require that we perform our services in compliance with regulations applicable to them or in a manner that will enable them to comply with such regulations.

The global nature of our operations increases the difficulty of compliance. Compliance with diverse legal requirements is costly, time-consuming and requires significant resources. Violations of one or more of these

regulations in the conduct of our business could result in significant fines, criminal sanctions against us and/or our employees, prohibitions on doing business, breach of contract damages and harm to our reputation. Due to the varying degrees of development of the legal systems of the countries in which we operate, local laws may not be well developed or provide sufficiently clear guidance and may be insufficient to protect our rights.

In particular, in many parts of the world, including countries in which we operate and/or seek to expand, practices in the local business community might not conform to international business standards and could violate anticorruption laws or regulations, including the U.S. Foreign Corrupt Practices Act and the UK Bribery Act 2010. Our employees, subcontractors, agents, joint venture partners, the companies we acquire and their employees, subcontractors and agents, and other third parties with which we associate, could take actions that violate policies or procedures designed to promote legal and regulatory compliance or applicable anticorruption laws or regulations. Violations of these laws or regulations by us, our employees or any of these third parties could subject us to criminal or civil enforcement actions (whether or not we participated or knew about the actions leading to the violations), including fines or penalties, disgorgement of profits and suspension or disqualification from work, any of which could materially adversely affect our business, including our results of operations and our reputation.

Tax matters may have an adverse effect on our operations, effective tax rate and financial condition.

We are subject to income taxes in the United States and in numerous foreign jurisdictions, notably in India where we have substantial operations and derive substantial revenue. Our provision for income taxes, actual tax expense and cash tax liability could be adversely affected by a variety of factors including, but not limited to, lower income before taxes generated in countries with lower tax rates; higher income generated in countries with higher tax rates; changes in tax laws and regulations or in applicable income tax treaties; changes in accounting principles or interpretations thereof or in the valuation of deferred tax assets and liabilities; the possible disappearance of certain tax concessions that we have enjoyed in prior years; and adverse outcomes of tax examinations and pending tax-related litigation. Any of these factors could have a material adverse effect on our operations, effective tax rate and financial condition.

We are subject to examination of our income tax returns by the U.S. Internal Revenue Service and tax authorities around the world, notably in India where we have substantial operations and derive substantial revenue, and there can be no assurance that negative outcomes from those examinations or any appeals therefrom will not adversely affect our provision for income taxes and cash tax liability, which in turn could have a material adverse effect on our operations, effective tax rate and financial condition. For example, the Government of India is appealing a 2011 ruling by the Delhi High Court that Genpact India (one of our subsidiaries) cannot be held to be a representative assessee of GE in connection with an assertion that GE has a “permanent establishment” in India by reason a 2004 transfer of shares of our predecessor company. We believe that, if the Government of India is successful in its appeal, GE would be obligated to indemnify us for any resulting tax, though there can be no assurance as to the outcome of this matter.

In addition, the Government of India issued assessment orders to us in 2014 and 2015 seeking to assess tax on certain transactions that occurred in 2009 and 2010. We do not believe that the transactions should be subject to tax in India, primarily due to the relief provided under the Mauritius-India treaty, and have accordingly filed appeals. We have received demands for potential tax claims resulting from these two assessments in an aggregate amount of approximately \$57 million, including interest. To date, we have paid a total of \$28 million to the Indian tax authority under protest, and may be required to pay the remainder of the demands pending resolution of the matter. There is no assurance that we will prevail in this matter or similar transactions where we have relied on the Mauritius-India treaty, and a final determination of tax in the amounts claimed could have a material adverse effect on our operations, effective tax rate and financial condition.

More generally, the Indian tax authorities may claim that Indian tax is owed with respect to certain of our transactions, such as our acquisitions (including our subsidiaries organized under Indian law or owning assets located in India), internal reorganizations and the sale of our shares in public offerings or otherwise by our

existing significant shareholders, in which indirect transfers of Indian subsidiaries or assets are involved. Those authorities may seek to impose tax on us directly or as a withholding agent or representative assessee of the seller in these or other transactions.

Furthermore, there is growing pressure in many jurisdictions and from multinational organizations such as the Organization for Economic Cooperation and Development (OECD) and the European Union (EU) to amend existing international tax rules in order to render them more responsive to current global business practices. For example, in October 2015 the OECD published a package of measures for reform of the international tax rules as a product of its Base Erosion and Profit Shifting (BEPS) initiative, which was endorsed by the G20 finance ministers. Many of the initiatives in the BEPS package will require amendments to the domestic tax legislation of various jurisdictions. Separately, the European Union is asserting that a number of country-specific favorable tax regimes and rulings in certain member states may violate, or have violated, EU law, and may require rebates of some or all of the associated tax benefits to be paid by benefitted taxpayers in particular cases. Although we monitor these developments, it is very difficult to assess to what extent these changes may be implemented in the jurisdictions in which we conduct our business or may impact the way in which we conduct our business or our effective tax rate due to the unpredictability and interdependency of these potential changes. As these and other tax laws and related regulations and practices change, those changes could have a material adverse effect on our operations, effective tax rate and financial condition.

If the transfer pricing arrangements we have among our subsidiaries are determined to be inappropriate, our tax liability may increase.

We have transfer pricing arrangements among our subsidiaries in relation to various aspects of our business, including operations, marketing, sales and delivery functions. U.S. and Indian transfer pricing regulations, as well as regulations applicable in other countries in which we operate, require that any international transaction involving associated enterprises be on arm's-length terms. We consider the transactions among our subsidiaries to be substantially on arm's-length terms. If, however, a tax authority in any jurisdiction reviews any of our tax returns and determines that the transfer prices and terms we have applied are not appropriate, or that other income of our affiliates should be taxed in that jurisdiction, we may incur increased tax liability, including accrued interest and penalties, which would cause our tax expense to increase, possibly materially, thereby reducing our profitability and cash flows, which in turn could have a material adverse effect on our operations, effective tax rate and financial condition.

Our revenues are highly dependent on clients located in the United States and Europe, as well as on clients that operate in certain industries. If events or conditions occur which adversely affect the economic health of the United States or Europe, demand in the United States or Europe or in certain industries for the type of services we provide, or the rate of growth in the industries in which our clients operate, our business, results of operations and financial condition may be materially and adversely affected.

In 2015, more than 65% of our revenues were derived from clients based in North America and more than 15% of our revenues were derived from clients based in Europe. Additionally, in 2015, more than 40% of our revenues were derived from clients in the financial services industry, which includes insurance.

A number of factors could adversely affect our ability to do business in the United States or Europe, which could in turn have a material adverse effect on our business, results of operations and financial condition. Any deterioration in economic activity in the United States or Europe could adversely affect demand for our services, thus reducing our revenue. Increased regulation, changes in existing regulation or increased government intervention in the industries in which our clients operate may adversely affect growth in such industries and therefore have an adverse impact on our revenues.

We may face difficulties in providing end-to-end business solutions or delivering complex and large projects for our clients that could cause clients to discontinue their work with us, which in turn could harm our business.

We continue to expand the nature and scope of our engagements and have recently expanded our service offerings to incorporate digital solutions that use social, mobility, big data and cloud-based technologies. Our ability to effectively offer a wide breadth of end-to-end business solutions depends on our ability to attract existing or new clients to new service offerings, and the market for end-to-end solutions is highly competitive. We cannot be certain that our new service offerings, particularly our newer digital offerings, will effectively meet client needs or that we will be able to attract clients to these service offerings. The complexity of our new service offerings, our inexperience in developing or implementing them, and significant competition in the markets for these services may affect our ability to market these services successfully. In addition, the breadth of our existing service offerings continues to result in larger and more complex projects with our clients, which have risks associated with their scope and complexities. Our failure to deliver services that meet the requirements specified by our clients could result in termination of client contracts, and we could be liable to our clients for significant penalties or damages. Larger projects may involve multiple engagements or stages, and there is a risk that a client may choose not to retain us for additional stages or may cancel or delay additional planned engagements. These terminations, cancellations or delays may result from factors that have little or nothing to do with the quality of our services, such as the business or financial condition of our clients or the economy generally. Such cancellations or delays make it difficult to plan for project resource requirements and inaccuracies in such resource planning and allocation may have a negative impact on our profitability.

We may fail to attract and retain enough qualified employees to support our operations.

Our industry relies on large numbers of skilled employees and our success depends on our ability to attract, train and retain a sufficient number of qualified employees. Historically, high employee attrition has been common in our industry. See Item 1—"Business—Our People." In 2015, our attrition rate for all employees who were employed for a day or more was approximately 27%. We cannot assure you that we will be able to reduce our level of attrition or even maintain our attrition rate at the 2015 level. If our attrition rate increases, our operating efficiency and productivity may decrease.

Competition for qualified employees, particularly in India and China, remains high and we expect such competition to continue. We compete for employees not only with other companies in our industry but also with companies in other industries, such as software services, engineering services and financial services companies. In many locations in which we operate, there is a limited pool of employees who have the skills and training needed to do our work. If our business continues to grow, the number of people we will need to hire will increase. We will also need to increase our hiring if we are not able to maintain our attrition rate through innovative recruiting and retention policies. Significant competition for employees could have an adverse effect on our ability to expand our business and service our clients, as well as cause us to incur greater personnel expenses and training costs.

Wage increases in the countries in which we have operations may prevent us from sustaining our competitive advantage and may reduce our profit margin.

Salaries and related benefits of our employees are our most significant costs. Most of our employees are based in India and other countries in which wage levels have historically been significantly lower than wage levels in the United States and Western Europe for comparably skilled professionals, which has been one of our competitive advantages. However, wage levels for comparably skilled employees in most of the countries in which we operate have increased and further increases are expected at a faster rate than in the United States and Western Europe because of, among other reasons, faster economic growth, increased competition for skilled employees and increased demand for business process services. We will lose this competitive advantage to the extent that we are not able to control or share wage increases with our clients. Sharing wage increases may cause

our clients to be less willing to utilize our services. In addition, wage increases may reduce our margins. We will attempt to control such costs by our efforts to add capacity in locations where we consider wage levels of skilled personnel to be satisfactory, but we may not be successful in doing so. We may need to increase our wage levels significantly and rapidly in order to attract the quantity and quality of employees that are necessary for us to remain competitive, which may have a material adverse effect on our business, results of operations and financial condition. We have also increased, and expect to further increase, the number of employees we have in the United States from the levels than we have had historically, and this could have a negative effect on our profit margin.

Currency exchange rate fluctuations in various currencies in which we do business, especially the Indian rupee, the euro and the U.S. dollar, could have a material adverse effect on our business, results of operations and financial condition.

Most of our revenues are denominated in U.S. dollars, with the remaining amounts largely in euros, pounds sterling, the Australian dollar, the Japanese yen and the Indian rupee. Most of our expenses are incurred and paid in Indian rupees, with the remaining amounts largely in U.S. dollars, Chinese renminbi, Romanian lei, euros, pounds sterling, Philippine pesos, Japanese yen, Polish zloty, Mexican pesos, Guatemalan quetzals, the South African rand and Hungarian forints. As we expand our operations to new countries, we will incur expenses in other currencies. We report our financial results in U.S. dollars. The exchange rates between the Indian rupee, the euro and other currencies in which we incur costs or receive revenues, on the one hand, and the U.S. dollar, on the other hand, have changed substantially in recent years and may fluctuate substantially in the future. See Item 7A—"Quantitative and Qualitative Disclosures about Market Risk."

Our results of operations could be adversely affected over time by certain movements in exchange rates, particularly if the Indian rupee or other currencies in which we incur expenses appreciate against the U.S. dollar or if the currencies in which we receive revenues, such as the euro, depreciate against the U.S. dollar. Although we take steps to hedge a substantial portion of our Indian rupee-U.S. dollar, Mexican peso-U.S. dollar, Philippines peso-U.S. dollar, euro-U.S. dollar, euro- Romanian leu, euro-Hungarian forint, pound sterling-U.S. dollar, Australian dollar-U.S. dollar and our Chinese renminbi-Japanese yen foreign currency exposures, there is no assurance that our hedging strategy will be successful or that the hedging markets will have sufficient liquidity or depth for us to implement our strategy in a cost effective manner. In addition, in some countries such as India and China, we are subject to legal restrictions on hedging activities, as well as convertibility of currencies, which could limit our ability to use cash generated in one country in another country and could limit our ability to hedge our exposures. Finally, our hedging policies only provide near term protection from exchange rate fluctuations. If the Indian rupee or other currencies in which we incur expenses appreciate against the U.S. dollar, we may have to consider additional means of maintaining profitability, including by increasing pricing, which may or may not be achievable. See also Item 7—"Management's Discussion and Analysis of Financial Condition and Results of Operations—Overview—Foreign exchange (gains) losses, net."

Restrictions on entry visas may affect our ability to compete for and provide services to clients, which could have a material adverse effect on our business and financial results.

Our business depends on the ability of our employees to obtain the necessary visas and entry permits to do business in the countries where our clients and, in some cases, our delivery centers, are located. In recent years, in response to terrorist attacks and global unrest, immigration authorities generally, and those in the United States in particular, have increased the level of scrutiny in granting visas. If further terrorist attacks occur or global unrest intensifies, then obtaining visas for our personnel may become even more difficult. Local immigration laws may also require us to meet certain other legal requirements as a condition to obtaining or maintaining entry visas. Adverse economic conditions in countries where our clients may be located may create an environment where countries, including the United States, may restrict the number of visas or entry permits available. In addition, immigration laws are subject to legislative change and varying standards of application and enforcement due to political forces, economic conditions or other events, including terrorist attacks. If we are

unable to obtain the necessary visas for our personnel who need to travel internationally, if the issuance of such visas is delayed or if the length of such visas is shortened, we may not be able to provide services to our clients or to continue to provide services on a timely and cost-effective basis, receive revenues as early as expected or manage our delivery centers as efficiently as we otherwise could, any of which could have a material adverse effect on our business, results of operations and financial condition.

The information technology industry is subject to rapid technological change and we may not be successful in addressing these changes.

The information technology industry is characterized by rapid technological change, evolving industry standards, changing client preferences and new product introductions. The success of our digital and information technology business depends, in part, upon our ability to develop solutions that keep pace with changes in the industry. We may not be successful in addressing these changes on a timely basis or successfully marketing any changes that we implement. In addition, products or technologies developed by others may render our services uncompetitive or obsolete. Failure to address these developments could have a material adverse effect on our business, results of operations and financial condition.

Our senior leadership team is critical to our continued success and the loss of such personnel could harm our business.

Our future success substantially depends on the continued service and performance of the members of our senior leadership team. These personnel possess business and technical capabilities that are difficult to replace. In particular, our Chief Executive Officer and other members of our senior leadership team have been involved in our business since its commencement under GE. Our employment agreement with our Chief Executive Officer does not obligate him to work for us for any specified period. If we lose key members of our senior leadership team, we may not be able to effectively manage our current operations or meet ongoing and future business challenges, and this may have a material adverse effect on our business, results of operations and financial condition.

We may be unable to service our debt or obtain additional financing on competitive terms.

On June 30, 2015, we entered into a five-year credit agreement with certain financial institutions as lenders which replaced our prior credit facility. The credit agreement provides for an \$800 million term credit facility and a \$350 million revolving credit facility, and may be increased by us by up to \$150 million (or a greater amount based on certain conditions). The credit agreement obligations are unsecured, and guaranteed by certain subsidiaries. As of December 31, 2015, the total amount due under the credit facility, including the amount utilized under the revolving facility, was \$801.5 million.

Our credit agreement contains covenants that require maintenance of certain financial ratios, including consolidated leverage and interest coverage ratios, and also, under certain conditions, restrict our ability to incur additional indebtedness, create liens, make certain investments, pay dividends or make certain other restricted payments, repurchase common shares, undertake certain liquidations, mergers, consolidations and acquisitions and dispose of certain assets or subsidiaries, among other things. Our cash flow from operations provides the primary source of funds for our debt service payments. If our cash flow from operations declines, we may be unable to service or refinance our current debt which could adversely affect our business and financial condition.

In addition, we may have limited ability to increase our borrowings under our existing credit agreement without increased pricing. We may in the future require additional financing to fund one or more acquisitions and may not be able to obtain such additional financing on competitive terms, which could restrict our ability to complete such transactions.

We often face a long selling cycle to secure a new contract as well as long implementation periods that require significant resource commitments, which result in a long lead time before we receive revenues from new relationships.

We often face a long selling cycle to secure a new contract. If we are successful in obtaining an engagement, that is generally followed by a long implementation period in which the services are planned in detail and we demonstrate to a client that we can successfully integrate our processes and resources with their operations. During this time a contract is also negotiated and agreed. There is then a long ramping up period in order to commence providing the services. We typically incur significant business development expenses during the selling cycle. We may not succeed in winning a new client's business, in which case we receive no revenues and may receive no reimbursement for such expenses. Even if we succeed in developing a relationship with a potential new client and begin to plan the services in detail, a potential client may choose a competitor or decide to retain the work in-house prior to the time a final contract is signed. If we enter into a contract with a client, we will typically receive no revenues until implementation actually begins. Our clients may also experience delays in obtaining internal approvals or delays associated with technology or system implementations, thereby further lengthening the implementation cycle. We generally hire new employees to provide services to a new client once a contract is signed. We may face significant difficulties in hiring such employees and incur significant costs associated with these hires before we receive corresponding revenues. If we are not successful in obtaining contractual commitments after the selling cycle, in maintaining contractual commitments after the implementation cycle or in maintaining or reducing the duration of unprofitable initial periods in our contracts, it may have a material adverse effect on our business, results of operations and financial condition.

Our profitability will suffer if we are not able to price appropriately, maintain asset utilization levels and control our costs.

Our profitability is largely a function of the efficiency with which we utilize our assets, and in particular our people and delivery centers, and the pricing that we are able to obtain for our services. Our utilization rates are affected by a number of factors, including our ability to transition employees from completed projects to new assignments, hire and assimilate new employees, forecast demand for our services and thereby maintain an appropriate headcount in each of our geographies and workforce and manage attrition, and our need to devote time and resources to training, professional development and other typically non-chargeable activities. The prices we are able to charge for our services are affected by a number of factors, including our clients' perceptions of our ability to add value through our services, competition, introduction of new services or products by us or our competitors, our ability to accurately estimate, attain and sustain revenues from client engagements, margins and cash flows over increasingly longer contract periods and general economic and political conditions. Therefore, if we are unable to price appropriately or manage our asset utilization levels, there could be a material adverse effect on our business, results of operations and financial condition. Our profitability is also a function of our ability to control our costs and improve our efficiency. As we increase the number of our employees and grow our business, we may not be able to manage the significantly larger and more geographically diverse workforce that may result and our profitability may not improve. New taxes may also be imposed on our services such as sales taxes or service taxes which could affect our competitiveness as well as our profitability.

Our results of operations and share price could be adversely affected if we are unable to maintain effective internal controls.

The accuracy of our financial reporting is dependent on the effectiveness of our internal controls. We are required to provide a report from management to our shareholders on our internal control over financial reporting that includes an assessment of the effectiveness of these controls. Internal control over financial reporting has inherent limitations, including human error, sample-based testing, the possibility that controls could be circumvented or become inadequate because of changed conditions, and fraud. Because of these inherent limitations, internal control over financial reporting might not prevent or detect all misstatements or fraud. If we cannot maintain and execute adequate internal control over financial reporting or implement required new or

improved controls that provide reasonable assurance of the reliability of the financial reporting and preparation of our financial statements for external use, we could suffer harm to our reputation, fail to meet our public reporting requirements on a timely basis, be unable to properly report on our business and our results of operations, or be required to restate our financial statements, and our results of operations, the market price of our common shares and our ability to obtain new business could be materially adversely affected.

We make estimates and assumptions in connection with the preparation of our consolidated financial statements, and any changes to those estimates and assumptions could adversely affect our financial results.

Our financial statements have been prepared in accordance with U.S. generally accepted accounting principles. The application of generally accepted accounting principles requires us to make estimates and assumptions about certain items and future events that affect our reported financial condition, and our accompanying disclosure with respect to, among other things, revenue recognition and income taxes. We base our estimates on historical experience, contractual commitments and on various other assumptions that we believe to be reasonable under the circumstances and at the time they are made. These estimates and assumptions involve the use of judgment and are subject to significant uncertainties, some of which are beyond our control. If our estimates, or the assumptions underlying such estimates, are not correct, actual results may differ materially from our estimates, and we may need to, among other things, adjust revenues or accrue additional charges that could adversely affect our results of operations.

Our operating results may experience significant fluctuations.

Our operating results may fluctuate significantly from period to period. The long selling cycle for many of our services as well as the time required to complete the implementation phases of new contracts makes it difficult to accurately predict the timing of revenues from new clients or new SOWs as well as our costs. In addition, our future revenues, operating margins and profitability may fluctuate as a result of: lower demand for our services; lower win rates versus our competition; changes in pricing in response to client demands and competitive pressures; changes to the financial condition of our clients; employee wage levels and utilization rates; changes in foreign exchange rates, including the Indian rupee versus the U.S. dollar and the euro versus the U.S. dollar; the timing of collection of accounts receivable; enactment of new taxes; changes in domestic and international income tax rates and regulations; and changes to levels and types of share-based compensation awards and assumptions used to determine the fair value of such awards. As a result of these factors, it is possible that in some future periods, our revenues and operating results may be significantly below the expectations of public market analysts and investors. In such an event, the price of our common shares would likely be materially and adversely affected.

We enter into long-term contracts and fixed price contracts with our clients. Our failure to price these contracts correctly may negatively affect our profitability.

The pricing of our services is usually included in SOWs entered into with our clients, many of which are for terms of two to five years. In certain cases, we have committed to pricing over this period with only limited sharing of risk regarding inflation and currency exchange rates. In addition, we are obligated under some of our contracts to deliver productivity benefits to our clients. If we fail to estimate accurately future wage inflation rates, currency exchange rates or our costs, or if we fail to accurately estimate the productivity benefits we can achieve under a contract, it could have a material adverse effect on our business, results of operations and financial condition.

A portion of our SOWs are currently billed on a fixed price basis rather than on a time and materials basis. We may increase the number of fixed price contracts we perform in the future. Any failure to accurately estimate the resources or time required to complete a fixed price engagement or to maintain the required quality levels or any unexpected increase in the cost to us of employees, office space or technology could expose us to risks associated with cost overruns and could have a material adverse effect on our business, results of operations and financial conditions.

We could be liable to our clients or others for damages, subject to criminal liability, and our reputation could be damaged, if our information systems are breached or confidential or sensitive client or employee data is compromised.

We are often required to collect, process and store sensitive or confidential client data in connection with the services we provide under our contracts, including names, address, social security numbers, personal health information, credit card account numbers, payment history records, and checking and savings account numbers. In addition, we collect and store data regarding our employees. As a result, we are subject to numerous data protection and privacy laws and regulations designed to protect this information in the countries in which we operate. If any person, including any of our current or former employees, negligently disregards or intentionally breaches our established controls with respect to sensitive data or if we do not adapt to changes in data protection legislation, we could be subject to significant litigation, monetary damages, regulatory enforcement actions, fines and/or criminal prosecution in one or more jurisdictions.

The threat of incursion into our information systems and technology infrastructure has increased in recent years with the increasing number and sophistication of third parties who have hacked, attacked, disrupted or otherwise invaded information systems of other companies and have misappropriated or disclosed data. Because the techniques used to obtain unauthorized access, disable or degrade service, or sabotage systems change frequently or may be designed to remain dormant until a predetermined event and often are not recognized until launched against a target, we may be unable to anticipate these techniques or implement adequate preventative measures. If an actual or perceived breach of our security occurs, whether through breach of our computer systems, systems failure or otherwise, the market perception of the effectiveness of our security measures and our reputation could be harmed and we could lose existing or potential customers. We may also be liable to our clients or others for damages caused by disclosure of confidential information or system failures. Many of our contracts do not limit our potential liability for breaches of confidentiality. We may also be subject to civil actions and criminal prosecution by government or government agencies for breaches relating to such data. Our insurance coverage for breaches or mismanagement of such data may not continue to be available on reasonable terms or in sufficient amounts to cover one or more large claims against us and our insurers may disclaim coverage as to any future claims.

We may be subject to claims for substantial damages by our clients arising out of disruptions to their businesses or inadequate service, and our insurance coverage may be inadequate.

Most of our service contracts with clients contain service level and performance requirements, including requirements relating to the quality of our services. Failure to consistently meet service requirements of a client or errors made by our employees in the course of delivering services to our clients could disrupt the client's business and result in a reduction in revenues or a claim for damages against us. Additionally, we could incur liability if a process we manage for a client were to result in internal control failures or impair our client's ability to comply with its own internal control requirements.

Under our MSAs with our clients, our liability for breach of our obligations is generally limited to actual damages suffered by the client and is typically capped at the greater of an agreed amount or the fees paid or payable to us under the relevant agreement. These limitations and caps on liability may be unenforceable or otherwise may not protect us from liability for damages. In addition, certain liabilities, such as claims of third parties for which we may be required to indemnify our clients or liability for breaches of confidentiality, are generally not limited under those agreements. Our MSAs are governed by laws of multiple jurisdictions, therefore the interpretation of such provisions, and the availability of defenses to us, may vary, which may contribute to the uncertainty as to the scope of our potential liability. Although we have commercial general liability insurance coverage, the coverage may not continue to be available on acceptable terms or in sufficient amounts to cover one or more large claims and our insurers may disclaim coverage as to any future claims. The successful assertion of one or more large claims against us that exceed available insurance coverage, or changes in our insurance policies (including premium increases or the imposition of large deductible or co-insurance requirements), could have a material adverse effect on our business, results of operations and financial condition.

If we are unable to collect our receivables or unbilled services, our results of operations, financial condition and cash flows could be adversely affected.

Our business depends on our ability to successfully obtain payment from our clients of the amounts they owe us for work performed. We evaluate the financial condition of our clients and usually bill and collect on relatively short cycles. We have established allowances for losses of receivables and unbilled services. Actual losses on client balances could differ from those that we currently anticipate, and, as a result, we might need to adjust our allowances. We might not accurately assess the creditworthiness of our clients. Macroeconomic conditions could also result in financial difficulties for our clients, including bankruptcy and insolvency. This could cause clients to delay payments to us, request modifications to their payment arrangements that could increase our receivables balance, or default on their payment obligations to us. If we experience an increase in the time to bill and collect for our services, our cash flows could be adversely affected.

Some of our contracts contain provisions which, if triggered, could result in lower future revenues and have a material adverse effect on our business, results of operation and financial condition.

Some of our contracts allow a client, in certain limited circumstances, to request a benchmark study comparing our pricing and performance with that of an agreed list of other service providers for comparable services. Based on the results of the study and depending on the reasons for any unfavorable variance, we may be required to make improvements in the services we provide or to reduce the pricing for services on a prospective basis to be performed under the remaining term of the contract, which could have an adverse effect on our business, results of operations and financial condition.

Some of our contracts, including our contract with GE, contain provisions that would require us to pay penalties to our clients and/or provide our clients with the right to terminate the contract if we do not meet pre-agreed service level requirements. Failure to meet these requirements could result in the payment of significant penalties by us to our clients which in turn could have a material adverse effect on our business, results of operations and financial condition.

A few of our MSAs provide that during the term of the MSA and under specified circumstances, we may not provide similar services to the competitors of our client. Some of our contracts also provide that, during the term of the contract and for a certain period thereafter ranging from six to 12 months, we may not provide similar services to certain or any of our client's competitors using the same personnel. These restrictions may hamper our ability to compete for and provide services to other clients in the same industry, which may inhibit growth and result in lower future revenues and profitability.

Some of our contracts with clients specify that if a change of control of our company occurs during the term of the contract, the client has the right to terminate the contract. These provisions may result in our contracts being terminated if there is such a change in control, resulting in a potential loss of revenues. In addition, these provisions may act as a deterrent to any attempt by a third party to acquire our company.

Some of our contracts with clients require that we bear the cost of any sales or withholding taxes or unreimbursed value-added taxes imposed on payments made under those contracts. While the imposition of these taxes is generally minimized under our contracts, changes in law or the interpretation thereof and changes in our internal structure may result in the imposition of these taxes and a reduction in our net revenues.

Our industry is highly competitive, and we may not be able to compete effectively.

Our industry is highly competitive, highly fragmented and subject to rapid change. We believe that the principal competitive factors in our markets are breadth and depth of process, technology and domain expertise, service quality, the ability to attract, train and retain qualified people, compliance rigor, global delivery capabilities, price and marketing and sales capabilities. We compete for business with a variety of companies, including large multinational firms that provide consulting, technology and/or business process services, off-

shore business process service providers in low-cost locations like India, in-house captives of potential clients, software services companies that also provide business process services and accounting firms that also provide consulting or outsourcing services.

Some of our competitors have greater financial, marketing, technological or other resources and larger client bases than we do, and may expand their service offerings and compete more effectively for clients and employees than we do. Some of our competitors have more established reputations and client relationships in our markets than we do. In addition, some of our competitors who do not have global delivery capabilities may expand their delivery centers to the countries in which we are located which could result in increased competition for employees and could reduce our competitive advantage. There could also be new competitors that are more powerful as a result of strategic consolidation of smaller competitors or of companies that each provide different services or service different industries.

Increased competition may result in lower prices and volumes, higher costs for resources, especially people, and lower profitability. We may not be able to supply clients with services that they deem superior and at competitive prices and we may lose business to our competitors. Any inability to compete effectively would adversely affect our business, results of operations and financial condition.

Our business could be materially and adversely affected if we do not protect our intellectual property or if our services are found to infringe on the intellectual property of others.

Our success depends in part on certain methodologies, practices, tools and technical expertise we utilize in designing, developing, implementing and maintaining applications and other proprietary intellectual property rights. In order to protect our rights in these various intellectual properties, we rely upon a combination of nondisclosure and other contractual arrangements as well as trade secret, copyright and trademark laws. We also generally enter into confidentiality agreements with our employees, consultants, clients and potential clients and limit access to and distribution of our proprietary information. India is a member of the Berne Convention, an international intellectual property treaty, and has agreed to recognize protections on intellectual property rights conferred under the laws of other foreign countries, including the laws of the United States. There can be no assurance that the laws, rules, regulations and treaties in effect in the United States, India and the other jurisdictions in which we operate and the contractual and other protective measures we take, are adequate to protect us from misappropriation or unauthorized use of our intellectual property, or that such laws will not change. We may not be able to detect unauthorized use and take appropriate steps to enforce our rights, and any such steps may not be successful. Infringement by others of our intellectual property, including the costs of enforcing our intellectual property rights, may have a material adverse effect on our business, results of operations and financial condition.

Although we believe that we are not infringing on the intellectual property rights of others, claims may nonetheless be successfully asserted against us in the future. The costs of defending any such claims could be significant, and any successful claim may require us to modify, discontinue or rename any of our services. Any such changes may have a material adverse effect on our business, results of operations and financial condition.

A substantial portion of our assets and operations are located in India and we are subject to regulatory, economic, social and political uncertainties in India.

We are subject to several risks associated with having a substantial portion of our assets and operations located in India.

We have benefited from many policies of the Government of India and the Indian state governments in the states in which we operate which are designed to promote foreign investment generally and the business process services industry in particular, including significant tax incentives, relaxation of regulatory restrictions, liberalized import and export duties and preferential rules on foreign investment and repatriation. There is no assurance that such policies will continue. Various factors, such as changes in the current central government,

could trigger significant changes in India's economic liberalization and deregulation policies and disrupt business and economic conditions in India generally and our business in particular.

In addition, our financial performance and the market price of our common shares may be adversely affected by general economic conditions and economic and fiscal policy in India, including changes in exchange rates and controls, interest rates and taxation policies, as well as social stability and political, economic or diplomatic developments affecting India in the future. In particular, India has experienced significant economic growth over the last several years, but faces major challenges in sustaining that growth in the years ahead. These challenges include the need for substantial infrastructure development and improving access to healthcare and education. Our ability to recruit, train and retain qualified employees, develop and operate our delivery centers, and attract and retain clients could be adversely affected if India does not successfully meet these challenges.

Our delivery centers are at risk of damage from natural disasters and other disruptions.

Our delivery centers and our data and voice communications may be damaged or disrupted as a result of natural disasters such as earthquakes, floods, heavy rains, epidemics, tsunamis and cyclones, technical disruptions such as electricity or infrastructure breakdowns, including damage to telecommunications cables, computer glitches and electronic viruses or man-made events such as protests, riots and labor unrest. Such events may lead to the disruption of information systems and telecommunication services for sustained periods. They also may make it difficult or impossible for employees to reach our business locations. Damage or destruction that interrupts our provision of services could adversely affect our reputation, our relationships with our clients, our leadership team's ability to administer and supervise our business or it may cause us to incur substantial additional expenditure to repair or replace damaged equipment or delivery centers. We may also be liable to our clients for disruption in service resulting from such damage or destruction. While we currently have commercial liability insurance, our insurance coverage may not be sufficient. Furthermore, we may be unable to secure such insurance coverage at premiums acceptable to us in the future or at all. Prolonged disruption of our services would also entitle our clients to terminate their contracts with us. Any of the above factors may adversely affect our business, results of operations and financial condition.

We may face difficulties as we expand our operations into countries in which we have no prior operating experience.

We intend to continue to expand our global footprint in order to maintain an appropriate cost structure and meet our clients' delivery needs. This may involve expanding into countries other than those in which we currently operate. It may involve expanding into less developed countries, which may have less political, social or economic stability and less developed infrastructure and legal systems. As we expand our business into new countries we may encounter regulatory, personnel, technological and other difficulties that increase our expenses or delay our ability to start up our operations or become profitable in such countries. This may affect our relationships with our clients and could have an adverse effect on our business, results of operations and financial condition.

Terrorist attacks and other acts of violence involving any of the countries in which we or our clients have operations could adversely affect our operations and client confidence.

Terrorist attacks and other acts of violence or war may adversely affect worldwide financial markets and could potentially lead to economic recession, which could adversely affect our business, results of operations, financial condition and cash flows. These events could adversely affect our clients' levels of business activity and precipitate sudden significant changes in regional and global economic conditions and cycles. These events also pose significant risks to our people and to our delivery centers and operations around the world.

Southern Asia has, from time to time, experienced instances of civil unrest and hostilities among neighboring countries, including India and Pakistan. In recent years, military confrontations between India and

Pakistan have occurred in the region of Kashmir and along the India/Pakistan border. There have also been incidents in and near India such as terrorist attacks on the Indian Parliament and in the city of Mumbai, troop mobilizations along the India/Pakistan border and an aggravated geopolitical situation in the region. Such military activity or terrorist attacks in the future could influence the Indian economy by disrupting communications and making travel more difficult. Resulting political tensions could create a greater perception that investments in companies with Indian operations involve a high degree of risk, and that there is a risk of disruption of services provided by companies with Indian operations, which could have a material adverse effect on our share price and/or the market for our services. Furthermore, if India were to become engaged in armed hostilities, particularly hostilities that were protracted or involved the threat or use of nuclear weapons, we might not be able to continue our operations. We generally do not have insurance for losses and interruptions caused by terrorist attacks, military conflicts and wars.

If more stringent labor laws become applicable to us or if our employees unionize, our profitability may be adversely affected.

India has stringent labor legislation that protects employee interests, including legislation that sets forth detailed procedures for dispute resolution and employee removal and legislation that imposes financial obligations on employers upon retrenchment. Though we are exempt from some of these labor laws at present under exceptions in some states for providers of IT-enabled services, there can be no assurance that such laws will not become applicable to us in the future. If these labor laws become applicable to our employees, it may become difficult for us to maintain flexible human resource policies and attract and employ the numbers of sufficiently qualified candidates that we need or discharge employees, and our compensation expenses may increase significantly.

In addition, our employees may in the future form unions. If employees at any of our delivery centers become eligible for union membership, we may be required to raise wage levels or grant other benefits that could result in an increase in our compensation expenses, in which case our profitability may be adversely affected.

We may engage in strategic transactions that could create risks.

As part of our business strategy, we regularly review potential strategic transactions, including potential acquisitions, dispositions, consolidations, joint ventures or similar transactions, some of which may be material. Through the acquisitions we pursue, we may seek opportunities to add to or enhance the services we provide, to enter new industries or expand our client base, or to strengthen our global presence and scale of operations. We have completed more than ten acquisitions since our inception. There can be no assurance that we will find suitable candidates in the future for strategic transactions at acceptable prices, have sufficient capital resources to accomplish our strategy, or be successful in entering into agreements for desired transactions.

Acquisitions, including completed acquisitions, also pose the risk that any business we acquire may lose clients or employees or could under-perform relative to expectations. We could also experience financial or other setbacks if transactions encounter unanticipated problems, including problems related to execution or integration. Following the completion of an acquisition, we may have to rely on the seller to provide administrative and other support, including financial reporting and internal controls, to the acquired business for a period of time. There can be no assurance that the seller will do so in a manner that is acceptable to us.

Our principal shareholders exercise significant influence over us, and their interests in our business may be different from yours.

A significant percentage of our issued and outstanding common shares are currently beneficially owned by affiliates of Bain Capital. As of December 31, 2015, Bain Capital (through its affiliates) beneficially owned approximately 27% of our outstanding common shares.

Our shareholder agreement with Bain Capital and its co-investors provides that Bain Capital has the right to nominate four directors to our board, so long as it maintains certain minimum shareholding thresholds, and the

shareholders party to the agreement have agreed to vote their shares for the election of such persons. These shareholders can exercise significant influence over our business policies and affairs and all matters requiring a shareholders' vote, including the composition of our board of directors, the adoption of amendments to our certificate of incorporation and bye-laws, the approval of mergers or sales of substantially all of our assets, our dividend policy and our capital structure and financing. This concentration of ownership also may delay, defer or even prevent a change in control of our company and may make some transactions more difficult or impossible without the support of these shareholders, even if such transactions are beneficial to other shareholders. The interests of these shareholders may conflict with your interests. Bain Capital currently holds interests in companies that compete with us and it may, from time to time, make significant investments in companies that could compete with us. In addition, pursuant to our shareholder agreement and to the extent permitted by applicable law, our directors who are affiliated with Bain Capital are not required to present to us corporate opportunities (*e.g.*, acquisitions or new potential clients) of which they become aware. So long as Bain Capital owns a significant amount of our equity it will be able to strongly influence our decisions.

We may become subject to taxation as a result of our incorporation in Bermuda or place of management, which would have a material adverse effect on our business, results of operations and financial condition.

We have received a written assurance from the Bermuda Minister of Finance under The Exempted Undertaking Tax Protection Act 1966 of Bermuda to the effect that if there is enacted in Bermuda any legislation imposing tax computed on profits or income, or computed on any capital asset, gain or appreciation, or any tax in the nature of estate duty or inheritance tax, then the imposition of any such tax shall not be applicable to us or to any of our operations or common shares, debentures or other obligations or securities until March 31, 2035, except insofar as such tax applies to persons ordinarily resident in Bermuda or is payable by us in respect of real property owned or leased by us in Bermuda. We cannot assure you that after such date we would not be subject to any such tax. If we were to become subject to taxation in Bermuda or any other jurisdiction as a result of our incorporation in Bermuda, it could have a material adverse effect on our business, results of operations and financial condition.

We may not be able to realize the entire book value of goodwill and other intangible assets from acquisitions.

As of December 31, 2015, we have approximately \$1,038.3 million of goodwill and \$98.6 million of intangible assets. We periodically assess these assets to determine if they are impaired and we monitor for impairment of goodwill relating to all acquisitions and our formation in 2004. Goodwill is not amortized but is tested for impairment testing at least on an annual basis as of December 31 of each year, based on a number of factors including macro-economic conditions, industry and market considerations, overall financial performance, business plans and expected future cash flows. Impairment testing of goodwill may also be performed between annual tests if an event occurs or circumstances change that would more likely than not reduce the fair value of goodwill below its carrying amount. We perform an assessment of qualitative factors to determine whether the existence of events or circumstances leads to a determination that it is more likely than not that the fair value of a reporting unit is less than its carrying amount. Based on the results of the qualitative assessment, the Company performs the quantitative assessment of goodwill impairment if it determines that it is more likely than not that the fair value of a reporting unit is less than its carrying amount. In the event that the book value of goodwill is impaired, any such impairment would be charged to earnings in the period of impairment. We cannot assure you that future impairment of goodwill will not have a material adverse effect on our business, financial condition or results of operations.

Risks Related to our Shares

Future sales of our common shares could cause our share price to decline.

Sales of substantial amounts of common shares by our employees and other shareholders, or the possibility of such sales, may adversely affect the price of our common shares and impede our ability to raise capital through the issuance of equity securities. As of December 31, 2015, Bain Capital (through its affiliates) and its co-investors beneficially owned approximately 32% of our outstanding common shares. Subject to certain restrictions set forth in our shareholder agreement with Bain Capital and its co-investors, such shareholders are able to sell their common shares in the public market from time to time without registering them, subject to certain limitations on the timing, amount and method of those sales imposed by Rule 144 under the Securities Act of 1933, as amended.

Pursuant to our shareholder agreement, Bain Capital has the right, subject to certain conditions and with certain exceptions, to require us to file registration statements covering all of the common shares it owns or to include those common shares in registration statements that we may file for ourselves or for another holder of our common shares. Following their registration and sale under the applicable registration statement, those shares will become freely tradable. By exercising their registration rights and selling a large number of common shares, these holders could cause the price of our common shares to decline. In addition, the perception in the public markets that sales by them might occur could also adversely affect the market price of our common shares.

Historically we have generally not declared dividends, and future determinations to pay dividends will be at the discretion of our board of directors.

Historically we have not declared regular dividends. On August 30, 2012, we declared a special cash dividend of \$2.24 per share, or approximately \$502 million in the aggregate, which we paid on September 24, 2012 to holders of record as of September 10, 2012. Any determination to pay dividends to holders of our common shares in the future will be at the discretion of our board of directors and will depend on many factors, including our financial condition, results of operations and general business conditions and any other factors our board of directors deems relevant. Our ability to pay dividends will also continue to be subject to restrictive covenants contained in credit facility agreements governing indebtedness we and our subsidiaries have incurred or may incur in the future.

We are organized under the laws of Bermuda, and Bermuda law differs from the laws in effect in the United States and may afford less protection to shareholders.

Our shareholders may have more difficulty protecting their interests than would shareholders of a corporation incorporated in a state of the United States. As a Bermuda company, we are governed by, in particular, the Companies Act 1981, or the Companies Act. The Companies Act differs in some material respects from laws generally applicable to U.S. corporations and shareholders, including the provisions relating to interested directors, mergers, amalgamations, takeovers and indemnification of directors.

Generally, the duties of directors and officers of a Bermuda company are owed to the company only. Shareholders of Bermuda companies generally do not have the right to take action against directors or officers of the company except in limited circumstances. Directors of a Bermuda company must, in exercising their powers and performing their duties, act honestly and in good faith with a view to the best interests of the company, exercising the care and skill that a reasonably prudent person would exercise in comparable circumstances. Directors have a duty not to put themselves in a position in which their duties to the company and their personal interests may conflict and also are under a duty to disclose any personal interest in any contract or arrangement with the company or any of its subsidiaries. If a director of a Bermuda company is found to have breached his or her duties to that company, he may be held personally liable to the company in respect of that breach of duty. A director may be liable jointly and severally with other directors if it is shown that the director knowingly engaged in fraud or dishonesty. In cases not involving fraud or dishonesty, the liability of the director will be determined

by the Bermuda courts on the basis of their estimation of the percentage of responsibility of the director for the matter in question, in light of the nature of the conduct of the director and the extent of the causal relationship between his or her conduct and the loss suffered.

In addition, our bye-laws contain a broad waiver by our shareholders of any claim or right of action, both individually and on our behalf, against any of our officers or directors. The waiver applies to any action taken by an officer or director, or the failure of an officer or director to take any action, in the performance of his or her duties, except with respect to any matter involving or arising out of any fraud or dishonesty on the part of the officer or director or to matters which would render it void pursuant to the Companies Act. This waiver limits the right of shareholders to assert claims against our officers and directors unless the act or failure to act involves fraud or dishonesty. Therefore, our shareholders may have more difficulty protecting their interests than would shareholders of a corporation incorporated in a state within the United States.

The market price for our common shares has been and may continue to be volatile.

The market price for our common shares has been and may continue to be volatile and subject to price and volume fluctuations in response to market and other factors, some of which are beyond our control. Among the factors that could affect our stock price are:

- actual or anticipated fluctuations in our quarterly and annual operating results;
- changes in financial estimates by securities research analysts;
- changes in the economic performance or market valuations of other companies engaged in providing business process and information technology services;
- loss of one or more significant clients;
- addition or loss of executive officers or key employees;
- regulatory developments in our target markets affecting us, our clients or our competitors;
- announcements of technological developments;
- limited liquidity in our trading market;
- sales or expected sales of additional common shares or purchases or expected purchases of common shares; and
- terrorist attacks or natural disasters or other such events impacting countries where we or our clients have operations.

In addition, securities markets generally and from time to time experience significant price and volume fluctuations that are not related to the operating performance of particular companies. These market fluctuations may have a material adverse effect on the market price of our common shares.

You may be unable to effect service of process or enforce judgments obtained in the United States or Bermuda against us or our assets in the jurisdictions in which we or our executive officers operate.

We are organized under the laws of Bermuda, and a significant portion of our assets are located outside the United States. It may not be possible to enforce court judgments obtained in the United States against us in Bermuda or in countries, other than the United States, where we have assets based on the civil liability or penal provisions of the federal or state securities laws of the United States. In addition, there is some doubt as to whether the courts of Bermuda and other countries would recognize or enforce judgments of United States courts

[Table of Contents](#)

obtained against us or our directors or officers based on the civil liability or penal provisions of the federal or state securities laws of the United States or would hear actions against us or those persons based on those laws. We have been advised by Appleby (Bermuda) Limited, our Bermuda counsel, that the United States and Bermuda do not currently have a treaty providing for the reciprocal recognition and enforcement of judgments in civil and commercial matters. Therefore, a final judgment for the payment of money rendered by any federal or state court in the United States based on civil liability, whether or not based solely on United States federal or state securities laws, would not automatically be enforceable in Bermuda. Similarly, those judgments may not be enforceable in countries, other than the United States, where we have assets.

Item 1B. Unresolved Staff Comments

None.

Item 2. Properties

We have delivery centers in 17 countries. Our only material properties are our premises in India at Phase V, Gurgaon, which comprises of 212,531 square feet, and Uppal, Hyderabad which comprises approximately 449,286 square feet, both of which we own. We have a mixture of owned and leased properties and substantially all of our leased properties are leased under long-term leases with varying expiration dates. We believe that all of our properties and facilities are well-maintained.

Item 3. Legal Proceedings

There are no legal proceedings pending against us that we believe are likely to have a material adverse effect on our business, results of operations and financial condition.

Item 4. Mine Safety Disclosures

Not applicable.

PART II**Item 5. Market for Registrant’s Common Equity, Related Stockholder Matters and Issuer Purchases of Equity Securities****Stock Price Information and Stockholders**

The principal market on which the Company’s common shares are traded is the New York Stock Exchange under the symbol “G.” The following table sets forth the high and low closing sales price of the Company’s common shares for each quarter of 2014 and 2015. As of January 31, 2016, there were 20 holders of record of our common shares.

	Sales Price	
	High	Low
Year Ended December 31, 2015:		
First Quarter	\$23.76	\$18.87
Second Quarter	\$23.31	\$21.33
Third Quarter	\$23.64	\$21.22
Fourth Quarter	\$25.85	\$23.42
Year Ended December 31, 2014:		
First Quarter	\$18.25	\$14.28
Second Quarter	\$17.66	\$16.04
Third Quarter	\$18.27	\$16.32
Fourth Quarter	\$19.30	\$15.81

[Table of Contents](#)

The following graph and table compare the performance of an investment in our common shares with investments in the S&P 500 Index (capitalization weighted) and a peer group of companies for the period from January 1, 2011 through December 31, 2015. The selected peer group for the period presented is comprised of six companies that we believe are our closest reporting issuer competitors: Accenture plc, Cognizant Technology Solutions Corp., ExlService Holdings, Inc., Infosys Technologies Limited, Wipro Technologies Limited, and WNS (Holdings) Limited. The graph presents the average of the returns of the component entities of our peer group index as of the beginning of each period for which a return is presented. The performance shown in the graph and table below is historical and should not be considered indicative of future price performance.

	3/31/2011	6/30/2011	9/30/2011	12/31/2011	3/31/2012	6/30/2012

This graph is not deemed to be “filed” with the SEC or subject to the liabilities of Section 18 of the Securities Exchange Act of 1934, and should not be deemed to be incorporated by reference into any of our prior or subsequent filings under the Securities Act of 1933 or the Exchange Act of 1934.

Dividends

We have not declared a cash dividend in the past two fiscal years. Any determination to pay dividends to holders of our common shares in the future will be at the discretion of our board of directors and will depend on many factors, including our financial condition, results of operations, general business conditions, capital allocation strategy and any other factors our board of directors deems relevant.

Unregistered Sales of Equity Securities

None.

Purchase of Equity Securities by the Issuer and Affiliated Purchasers

As we previously disclosed, in February 2015 our Board of Directors authorized a plan to repurchase up to \$250 million in value of our common shares. This share repurchase plan does not obligate us to acquire any specific number of shares and does not specify an expiration date. All shares repurchased under the plan have been cancelled.

Share repurchase activity during the three months ended December 31, 2015 was as follows:

<u>Period</u>	<u>Total Number of Shares Purchased</u>	<u>Average Price Paid per Share (\$)</u>	<u>Total Number of Shares Purchased as Part of Publicly Announced Plan or Program</u>	<u>Approximate Dollar Value of Shares that May Yet Be Purchased Under the Plan or Program (\$)</u>
October 1-October 31, 2015	984,271	23.72	984,271	67,622,425
November 1-November 30, 2015	690,289	25.21	690,289	50,221,384
December 1-December 31, 2015	1,083,160	25.05	1,083,160	23,083,297

Since January 1, 2016, we have completed \$250 million in share purchases under the February 2015 program. In February 2016, our board of directors approved an additional \$250 million share repurchase program, bringing the total authorization under our existing program to \$500 million. This repurchase program does not obligate us to acquire any specific number of shares and does not specify an expiration date.

Item 6. Selected Financial Data

The table below presents selected historical financial data.

We prepare our consolidated financial statements in accordance with U.S. generally accepted accounting principles (U.S. GAAP). Financial data as of December 31, 2014 and 2015 and for the three-year period ended December 31, 2015 have been derived from our audited consolidated financial statements included elsewhere in this Annual Report on Form 10-K. Financial data as of December 31, 2011, 2012 and 2013 and for the years ended December 31, 2011 and 2012 have been derived from our audited consolidated financial statements not included in this Annual Report on Form 10-K.

You should read the selected financial data below together with the financial statements included herein and Item 7—“Management’s Discussion and Analysis of Financial Condition and Results of Operations.”

Cash and cash equivalents	\$ 408.0	\$ 459.2	\$ 571.3	\$ 461.8	\$ 450.9
Total assets	2,403.4	2,605.9	2,689.4	2,742.5	2,793.5
Long-term debt, including current portion	102.9	661.9	657.9	653.6	776.5
Genpact Limited shareholders' equity	\$1,433.1	\$1,168.4	\$1,322.7	\$1,285.1	\$1,304.4

Item 7. Management’s Discussion and Analysis of Financial Condition and Results of Operations

The following discussion should be read in conjunction with our audited consolidated financial statements and the related notes that appear elsewhere in this Annual Report on Form 10-K. In addition to historical information, this discussion includes forward-looking information that involves risks and assumptions, which could cause actual results to differ materially from management’s expectations. See “Special Note Regarding Forward-Looking Statements” included elsewhere in this Annual Report on Form 10-K.

Overview

While our business began as the India-based captive business process services operation for GE’s financial services business, we started actively pursuing business from clients other than GE, or Global Clients, on January 1, 2005. Since that time, we have succeeded in increasing our business and diversifying our revenue sources, including through acquisitions. Our 2015 revenues were \$2.461 billion, an increase of 8% year-over-year, or 10% on a constant currency basis. See Item 7—“Net Revenues” below for an explanation of how we calculate constant currency, which is a non-GAAP financial measure.

[Table of Contents](#)

Revenues

Revenue by top clients. The table below sets forth the percentage of our total net revenues derived from our largest clients, including GE, in the years ended December 31, 2013, 2014 and 2015:

	Percentage of total net revenues		
	Year ended December 31,		
	2013	2014	2015
Top five clients	32.9%	30.7%	28.5%
Top ten clients	40.9%	39.2%	36.9%
Top fifteen clients	46.9%	45.3%	43.0%
Top twenty clients	51.9%	50.3%	48.0%

We earn revenues pursuant to contracts which generally take the form of a master service agreement, or MSA, which is a framework agreement that is then supplemented by statements of work, or SOWs. Our MSAs specify the general terms applicable to the services we will provide. Our MSAs are generally for terms of three to seven years, although they may also have an indefinite term or be for terms of less than three years. In most cases they do not specify pricing terms or obligate the client to purchase a particular amount of services. We then enter into SOWs under an MSA, which specify particular services to be provided and the pricing terms. Most of our revenues are from SOWs with terms of two to five years. We typically have multiple SOWs under any given MSA, and the terms of our SOWs vary depending on the nature of the services provided. We seek to develop long-term relationships with our clients. We believe that these relationships best serve our clients as they create opportunities for us to provide a variety of services using the full range of our capabilities and to deliver continuous process improvement.

New business proposals are reviewed in line with our strategy to target specific industry verticals and geographical markets. We begin each year with a set of named accounts, including prospective clients with operations in our target areas, and all opportunities during the year are reviewed by business leaders from the applicable industry vertical, operations personnel, and members of our finance team. In this way, we try to ensure that contract terms meet our pricing, cash and service objectives. See Item 1—"Business—Sales and Marketing."

There are a variety of aspects to our pricing of contracts. Under some of our MSAs, we are able to share a limited amount of inflation and currency exchange risk for engagements lasting longer than 12 months. Many of our MSAs also provide that, under transaction and fixed-price SOWs, we are entitled to retain a portion of certain productivity benefits we achieve. However, some of our MSAs and/or SOWs require certain minimum productivity benefits to be passed on to our clients. Once an MSA and related SOWs are signed and production of services commences, our revenues and expenses increase as services are ramped up to the agreed upon level. In many cases, we may have opportunities to increase our margins over the life of an MSA or SOW, driven by a number of factors.

Our MSA with GE, which was last extended in January 2010 and expires on December 31, 2016, provides for a minimum annual volume commitment during each year of its term. The minimum annual volume commitment for 2016 is \$90 million, subject to certain potential adjustments or credits. The actual level of services purchased by GE in the last nine years has exceeded its minimum annual commitment for each such year.

Although some decisions may be made centrally at GE, the total level of business we receive from GE generally depends on the decisions of the various operating managers of the GE businesses we serve. Because our business from GE is derived from a variety of businesses within GE, our exposure to GE is diversified in terms of industry risk. See Item 1A—"Risk Factors—Historically, GE has accounted for a significant portion of our revenues and any material loss of business from, or change in our relationship with, GE or GE's businesses could have a material adverse effect on our business, results of operations and financial condition."

Classification of certain net revenues. We classify our net revenues in two categories: net revenues from GE and net revenues from Global Clients. Net revenues from Global Clients consist of revenues from services provided to all clients other than GE and the companies in which GE owns 20% or less of the outstanding equity interest. If GE ceases to own at least 20% of a business we serve, we treat the revenues from such business as Global Client revenues beginning on the date that GE ceases to be a 20% shareholder. In many cases, we have continued to perform services for such businesses following their divestiture by GE even though they were not obligated by the GE MSA to continue to use our services. In such cases, we have either entered into new MSAs with respect to such businesses following their divestiture by GE or agreed with such businesses to continue to work pursuant to the terms agreed to by GE. We are currently undertaking efforts, and plan to continue efforts, to procure engagements with the businesses that GE is divesting as part of its planned divestiture of a portion of its GE Capital businesses.

Expenses. Personnel expenses are a major component of both our cost of revenue and our selling, general and administrative expenses. Personnel expenses include salaries and benefits (including stock-based compensation) as well as costs related to recruiting and training. Personnel expenses are allocated between cost of revenue and selling, general and administrative expenses based on the classification of the employee. Stock-based compensation and depreciation and amortization expense are allocated between cost of revenue and selling, general and administrative expenses based on an employee's function.

Our industry is labor-intensive. Wage levels in the countries in which our delivery centers are located have historically increased on a year-over-year basis. We attempt to address the impact of wage increases, and pressures to increase wages, in a number of ways, which include seeking to control entry-level wages, managing our attrition rate, delivering productivity and "right-skilling," which refers to ensuring that positions are not filled by overqualified employees. We try to control increases in entry-level wages by implementing innovative recruiting policies, utilizing continuous training techniques, emphasizing promotion opportunities and maintaining an attractive work atmosphere and company culture. In 2011, we launched an integrated talent management program globally to expand the pool of potential applicants we hire and to upgrade our employees' skill levels so that employees may take on higher value-added tasks over time across multiple domains. We have been scaling up this program every year to hire at optimal costs and are now partnering with universities, governments, not-for-profit entities and private institutions to create sustainable pipelines for our talent supply. In 2015, we launched a certification program for our Six Sigma black belts and master black belts to train them on our Lean DigitalSM approach, tools and design thinking. We also implemented various initiatives in 2015 to train our sales force, consulting teams and lead solution architects in concepts relating to design thinking and digital technologies in support of our Lean DigitalSM approach.

In planning capacity expansion, we look for locations that help us ensure global delivery capability while helping us control average salary levels. In India and in other countries where we may open multiple locations, we try to expand into cities where competition for personnel and wage levels may be lower than in more developed cities. In addition, under some of our contracts we have the ability to share with our clients a portion of any increase in costs due to inflation. Nevertheless, despite these steps, we expect general increases in wage levels in the future, which could adversely affect our margins. A significant increase in attrition rates would also increase our recruiting and training costs and decrease our operating efficiency, productivity and profit margins. Increased attrition rates or increased pricing may also cause some clients to be less willing to use our services. See Item 1A—"Risk Factors—Wage increases in the countries in which we have operations may prevent us from sustaining our competitive advantage and may reduce our profit margin."

Our operational expenses include facilities maintenance expenses, travel and living expenses, communications expenses, and consulting and certain other expenses. Consulting charges, consisting of the cost of consultants and subcontractors who are directly responsible for the performance of services for clients, are included in cost of revenue. Facilities maintenance expenses and certain other expenses are allocated between cost of revenue and selling, general and administrative expenses based on the employee's function.

Cost of revenue. The principal component of cost of revenue is personnel expenses. We include in cost of revenue all personnel expenses for employees who are directly responsible for the performance of services for

clients, their supervisors and certain support personnel who may be dedicated to a particular client or a set of processes. Travel and living expenses are included in cost of revenue if the personnel expense for the employee incurring such expense is included in cost of revenue.

The ratio of cost of revenue to revenues for any particular SOW or for all SOWs under an MSA is typically higher in the early periods of the contract or client relationship than in later periods. This is because the number of supervisory and direct support personnel relative to the number of employees who are performing services declines. It is also because we may retain a portion of the benefit of productivity increases realized over time.

Selling, general and administrative expenses. Our selling, general and administrative, or SG&A, expenses are primarily comprised of personnel expenses for senior management, corporate personnel in enabling functions such as human resources, finance, legal, marketing, sales and sales-related personnel, and other support personnel. The operational costs component of SG&A expenses also includes travel and living costs for such personnel. Additionally, the operational costs component of SG&A expenses includes professional fees, which represent the costs of third party legal, tax, accounting and other advisors, and an allowance for doubtful receivables.

Other operating (income) expense, net. Other operating (income) expense, net primarily consists of the impact of the change in the fair value of earn-out consideration relating to business acquisitions and certain operating losses resulting from the impairment of property, plant and equipment, intangible assets and certain capital work-in-progress items.

Foreign exchange (gains) losses, net. Foreign exchange (gains) losses, net, primarily consist of gains or losses on the re-measurement of non-functional currency assets and liabilities. In addition, it includes gains or losses from derivative contracts entered into to offset the impact of the re-measurement of non-functional currency assets and liabilities. It also includes the realized and unrealized gains or losses on derivative contracts that do not qualify for “hedge” accounting. The gains or losses on derivative contracts that qualify for hedge accounting are deferred and included as other comprehensive income (loss) until the derivative contracts mature, at which time the gains or losses on such cash flow hedges are classified as net revenues, cost of revenue or selling, general and administrative expenses based on the underlying risk being hedged. See note 2 to our consolidated financial statements and Item 7A—“Quantitative and Qualitative Disclosures about Market Risk—Foreign Currency Risk.”

Approximately 73% of our fiscal 2015 revenues were earned in U.S. dollars. We also received payments in euros, U.K. pounds sterling, Australian dollars, Chinese renminbi, Japanese yen, South African rand and Indian rupees. Our costs are primarily in Indian rupees, as well as in U.S. dollars, Chinese renminbi, euros and the currencies of the other countries in which we have operations. While some of our contracts provide for limited sharing of the risk of inflation and fluctuations in currency exchange rates, we bear a substantial portion of this risk, and therefore our operating results could be negatively affected by adverse changes in wage inflation rates and foreign currency exchange rates. See our discussion of wage inflation under “—Expenses” above. We enter into forward currency contracts, which are generally designed to qualify for hedge accounting, in order to hedge most of our cost currency exposure between the U.S. dollar and the Indian rupee, Mexican peso and Philippine peso, and between the euro and the Romanian leu, and our revenue currency exposure between the U.S. dollar and the pound sterling, Australian dollar and euro, and between the Chinese renminbi and the Japanese yen. However, our ability to hedge such risks is limited by local law, the liquidity of the market for such hedges and other practical considerations. Thus, our results of operations may be adversely affected if we are not able to enter into the desired hedging arrangements or if our hedging strategies are not successful.

Other income (expense), net. Other income (expense), net consists primarily of interest expense on indebtedness and capital lease obligations, interest adjustments relating to earn-out consideration in connection with certain acquisitions, certain debt restructuring related items and provisions created for losses on divestitures. Other income (expense), net also includes interest income on certain deposits.

Loss (gain) on equity-method investment activity, net. Loss (gain) on equity-method investment activity, net primarily pertains to the loss or gain from our non-consolidated affiliate, Markit Genpact KYC Services Limited, a U.K.-based joint venture with Markit Group Limited formed in 2014

Income taxes. We are incorporated in Bermuda and have operations in many countries. Our effective tax rate has historically varied and will continue to vary from year to year based on the tax rate in our jurisdiction of organization, the geographical sources of our earnings and the tax rates in those countries, the tax relief and incentives available to us, the financing and tax planning strategies employed by us, changes in tax laws or the interpretation thereof, and movements in our tax reserves, if any.

Bermuda taxes. We are organized in Bermuda. Bermuda does not impose any income tax on us.

Indian taxes. Indian SEZ legislation provides for a 15-year tax holiday scheme for operations established in designated special economic zones, or SEZs. Under the SEZ legislation, qualifying operations are eligible for a deduction from taxable income equal to (i) 100% of their profits or gains derived from the export of services for a period of five years from the commencement of operations; (ii) 50% of such profits or gains for the next five years; and (iii) 50% of such profits or gains for an additional period of five years, subject to the creation of a “Special Economic Zone Re-investment Reserve Account,” to be utilized only for acquiring new plant or machinery or for other business purposes, not including the distribution of dividends. This holiday is available only for new business operations that are conducted at qualifying SEZ locations and is not available to operations formed by splitting up or reconstructing existing operations or transferring existing plant and equipment (beyond prescribed limits) to new locations. During the last nine years, we established new delivery centers that we believe are eligible for the SEZ benefits. However, we cannot forecast what percentage of our operations or income in India will in the future be eligible for SEZ benefits, as this will depend on how much of our business can be conducted at the qualifying locations and how much of that business can be considered to meet the restrictive conditions described above.

Our tax expense will increase as a result of the expiration of our tax holidays, and our after-tax profitability will be materially reduced, unless we can obtain comparable benefits under new legislation or otherwise reduce our tax liability.

The governments of foreign jurisdictions from which we deliver services may assert that certain of our clients have a “permanent establishment” in such jurisdictions by reason of the activities we perform on their behalf, particularly those clients that exercise control over or have substantial dependency on our services. Such an assertion could affect the size and scope of the services requested by such clients in the future.

Transfer pricing. We have transfer pricing arrangements among our subsidiaries involved in various aspects of our business, including operations, marketing, sales and delivery functions. U.S. and Indian transfer pricing regulations, as well as the regulations applicable in the other countries in which we operate, require that any international transaction involving affiliated enterprises be made on arm’s-length terms. We consider the transactions among our subsidiaries to be substantially on arm’s-length pricing terms. If, however, a tax authority in any jurisdiction reviews any of our tax returns and determines that the transfer prices we have applied are not appropriate, or that other income of our affiliates should be taxed in that jurisdiction, we may incur increased tax liability, including accrued interest and penalties, which would cause our tax expense to increase, possibly materially, thereby reducing our profitability and cash flows.

Other taxes. We have operating subsidiaries in other countries, including Brazil, China, the Czech Republic, Guatemala, Hungary, Japan, Kenya, Mexico, the Netherlands, the Philippines, Poland, Romania, the United Kingdom, Slovakia, South Africa, the United Arab Emirates and the United States, as well as sales and marketing subsidiaries in certain jurisdictions, including the United States and the United Kingdom, which are subject to tax in such jurisdictions.

During 2009, one of our subsidiaries in China obtained a ruling from the Government of China certifying it to be a Technologically Advanced Service Enterprise. As a result, that subsidiary was subject to a lower

corporate income tax rate of 15% for a three-year period that began in 2009 and was extended through December 31, 2017, subject to the fulfillment of certain conditions. Our delivery centers also enjoy corporate tax holidays or concessional tax rates in certain other jurisdictions, including the Philippines and Guatemala. These tax concessions will expire over the next few years, possibly increasing our overall tax rate.

Our ability to repatriate surplus earnings from our foreign subsidiaries in a tax-efficient manner is dependent upon interpretations of local law, possible changes in such laws and the renegotiation of existing double tax avoidance treaties. Changes to any of these may adversely affect our overall tax rate.

Tax audits. Our tax liabilities may also increase, including due to accrued interest and penalties, if the applicable income tax authorities in any jurisdiction, during the course of any audits, were to disagree with any of our tax return positions. Through the period ended December 30, 2004, we have an indemnity from GE for any additional taxes attributable to periods prior to December 30, 2004.

Tax losses and other deferred tax assets. Our ability to utilize our tax loss carry-forwards and other deferred tax assets and credits may be affected if our profitability deteriorates or if new legislation is introduced that changes carry-over or crediting rules. Additionally, reductions in enacted tax rates may affect the value of our deferred tax assets and our tax expense.

Acquisitions

From time to time we may make acquisitions or engage in other strategic transactions if suitable opportunities arise, and we may use cash, securities, other assets or a combination thereof as consideration.

On August 18, 2015, we acquired certain assets and assumed certain liabilities from Citibank, N.A. comprising a portion of its U.K. wealth management operations for cash consideration of \$3.4 million. Together with the asset purchase, we hired certain U.K.-based employees of the seller. There are no contingent consideration arrangements in connection with this acquisition. With this transaction, we have expanded upon our end-to-end, technology-enabled wealth management service offering acquired from Citibank, N.A. in January 2015, described below. Goodwill arising from the acquisition amounted to \$1.2 million and has been allocated to our India reporting unit.

On April 1, 2015, we acquired certain assets and assumed certain liabilities of a finance-and-accounting service delivery center in Bratislava, Slovakia for cash consideration of \$6.1 million. As part of the transaction, we hired certain employees of the seller. There are no contingent consideration arrangements in connection with this acquisition. This transaction strengthens our finance-and-accounting services domain expertise in the consumer product goods industry and adds incremental European language capacity. Goodwill arising from the acquisition amounted to \$3.1 million and has been allocated to our Europe reporting unit.

On January 16, 2015, we acquired certain assets and assumed certain liabilities from Citibank, N.A. comprising a portion of its U.S. wealth management operations for cash consideration of \$11.7 million. Together with the asset purchase, we hired certain employees of the seller's U.S. wealth management business. There are no contingent consideration arrangements in connection with this acquisition. With this transaction, we have acquired an end-to-end, technology enabled wealth management service offering. Goodwill arising from the acquisition amounted to \$3.4 million and has been allocated to our India reporting unit.

In November 2014, we acquired from Hitachi Management Partner, Corp. a finance-and-accounting service delivery center in Japan, and we simultaneously entered into a five-year master services agreement with Hitachi Ltd. The contingent earn-out consideration for this acquisition is based on additional work contracted by the delivery center for the period from November 4, 2014 to November 4, 2021. This acquisition expands our presence in Japan and strengthens our finance-and-accounting service offerings. The purchase consideration for the acquisition was \$21.7 million. Goodwill arising from the acquisition amounted to \$16.8 million and has been allocated to our China reporting unit.

In May 2014, we acquired 100% of the outstanding equity interest in each of Pharmalink Consulting Limited, a company incorporated under the laws of England and Wales, and Pharmalink Consulting Inc., a California corporation (collectively referred to as “Pharmalink”). The contingent earn-out consideration for this acquisition is based on gross profits and order bookings of sustainable outsourcing contracts for the period from June 1, 2014 to June 30, 2016. This acquisition enabled us to provide additional regulatory consulting, outsourcing and operations capabilities for our clients in the life sciences industry. The purchase consideration for the acquisition of Pharmalink was \$138.8 million. Goodwill arising from the acquisition amounted to \$110.1 million and was allocated to our India reporting unit.

Bookings

New bookings is an operating or other statistical measure. We define new bookings as the total contract value of new client contracts, and certain renewals, extensions and changes to existing contracts to the extent that such contracts represent incremental future business. In determining total contract value for this purpose, we assume the minimum volume to which the client has committed. Regular renewals of contracts with no change in scope, which we consider business as usual, are not counted as new bookings. We provide information regarding our new bookings because we believe doing so provides useful trend information regarding changes in the volume of our new business over time and may be a useful metric as an indicator of future revenue growth potential. New bookings is also used by management to measure our sales force productivity.

New bookings in 2015 were \$2.59 billion, up approximately 20% from \$2.16 billion in 2014. The increase in new bookings is attributable to our investments in front-end sales and digital capabilities and our focus on large deals in our targeted verticals and service lines.

Bookings can vary significantly year to year depending in part on the timing of the signing of a small number of large contracts. The types of services clients are demanding, the duration of the contract and the pace and level of their spending may impact the conversion of new bookings to revenues. For example, business process outsourcing bookings, which are typically for multi-year contracts, generally convert to revenue over a longer period of time compared to information technology outsourcing bookings, which are often for short-term, project-based work.

Information regarding our bookings is not comparable to, nor should it be substituted for, an analysis of our revenues over time. The calculation of new bookings involves estimates and judgments. There are no third-party standards or requirements governing the calculation of bookings. We do not update our new bookings for material subsequent terminations or reductions related to bookings originally recorded in prior fiscal years. New bookings are recorded using then-existing foreign currency exchange rates and are not subsequently adjusted for foreign currency exchange rate fluctuations. Our revenues recognized each year will vary from the new bookings value since new bookings is a snapshot measurement of a portion of the total client contract value at a given time.

Critical Accounting Policies and Estimates

A summary of our significant accounting policies is included in Note 2—“Summary of Significant Accounting Policies” to our consolidated financial statements. An accounting policy is deemed to be critical if it requires an accounting estimate to be made based on assumptions about matters that are highly uncertain at the time the estimate is made and if changes in the estimate that are reasonably possible could materially impact the financial statements or require a higher degree of judgment than others in their application. We base our estimates on historical experience, contractual commitments and on various other assumptions that we believe to be reasonable under the circumstances and at the time they are made. We believe the following critical accounting policies require a higher level of management judgment and estimates than others in preparing the consolidated financial statements.

[Table of Contents](#)

Revenue recognition. We typically face a long selling cycle in securing a new client. It is not unusual for us to spend twelve to eighteen months or more from the time we begin actively soliciting a new client until we begin to recognize revenues.

All costs related to contract acquisition prior to signing a contract are expensed as incurred. Once a contract is signed, we defer revenues from the transition of services to our delivery centers, as well as the related cost of revenue. We recognize such deferred revenues and related costs of revenue over the period in which the related service delivery is expected to be performed. Deferred costs are limited to the amount of deferred revenues. Any costs incurred for acquiring contracts, such as contract acquisition fees or other upfront fees paid to a client or any other third party, are amortized over the period of a contract. Such amounts are generally recoverable from clients in the event of premature contract termination without cause.

We price our services under a variety of arrangements, including time and materials, transaction-based and, to a lesser extent, fixed-price contracts. When services are priced on a time-and-materials basis, we charge the client based on full-time equivalent, or FTE, rates for the personnel who will directly perform the services. The FTE rates are determined on a periodic basis, vary by category of service delivery personnel and are set at levels to reflect all of our costs, including the cost of supervisory personnel, the allocable portion of other costs, and a margin. In some cases, time-and-materials contracts are based on hourly rates of the personnel providing the services. We recognize revenues when persuasive evidence of an arrangement exists, the sales price is fixed or determinable, services have been rendered, and collectability is reasonably assured. Revenues derived from time-and-materials and transaction-based contracts are recognized as the related services are performed.

In transaction-based pricing, clients are charged a fixed fee per transaction, with the fee per transaction sometimes linked to the total number of transactions processed. Some of our contracts give the client the option to prospectively change from a time-and-materials model to a transaction-based pricing model.

In the case of fixed-price contracts, including those for application maintenance and support services, revenues are recognized ratably over the terms of the contracts. Revenues with respect to fixed-price contracts for the development, modification or customization of software are recognized on a percentage-of-completion method. Guidance has been drawn from FASB guidelines on Software—Revenue Recognition, to account for revenue from fixed-price arrangements for software development and related services in conformity with FASB guidance on Revenue Recognition—Construction—Type and Production-Type Contracts. The input (effort or cost expended) method has been used to measure progress towards completion, because management considers this to be the best available measure of progress on these contracts as there is a direct relation between input and productivity. Provisions for estimated losses, if any, on uncompleted contracts are recorded in the period in which such losses become probable based on current contract estimates.

We sometimes enter into multiple-element revenue arrangements in which a customer may purchase a combination of our services. Revenue from multiple-element arrangements is recognized, for each element, based on (1) the attainment of the delivery criterion; (2) its fair value, which is determined using the selling price hierarchy of vendor-specific objective evidence (“VSOE”) of fair value, third-party evidence or best estimated selling price, as applicable, and (3) its allocated selling price, which is based on the relative sales price method.

If we receive payment in respect of services prior to the time a contract is signed, we recognize the payment as an advance from a client. When the related contract is signed, the advance becomes revenue to the extent the services are rendered and price is fixed or determinable.

Some of our client contracts also include incentive payments for benefits delivered to clients. Revenues relating to such incentive payments are recorded when the contingency is satisfied, price is determinable and we conclude that the amounts are earned.

Accounts receivable. Our accounts receivable include amounts for services that we have performed but for which we have not received payment. We typically follow a 30-day billing cycle and, as such, at any point in time we may have accrued up to 30 days of revenues that have not been billed. We maintain an allowance for

doubtful accounts for estimated losses inherent in our accounts receivable portfolio. In establishing the required allowance, we consider current market conditions and our clients' financial condition, the amount of receivables in dispute, and the current receivables' aging and current payment patterns of the client. We do not have any off-balance-sheet credit exposure related to our clients.

Business combinations. The application of business combination accounting requires the use of significant estimates and assumptions. We account for business combinations by recognizing the identifiable tangible and intangible assets acquired and liabilities assumed, and any non-controlling interest in the acquired business, measured at their acquisition date fair values. The allocation of the purchase price utilizes significant estimates in determining the fair values of assets acquired and liabilities assumed, including with respect to intangible assets and deferred and contingent consideration. Significant estimates and assumptions we may make include, but are not limited to, the timing and amount of future revenue and cash flows based on, among other things, anticipated growth rates, customer attrition rates, and the discount rate reflecting the risk inherent in future cash flows.

Goodwill and other intangible assets. Goodwill represents the cost of acquired businesses in excess of the fair value of the identifiable tangible and intangible net assets purchased. Goodwill is tested for impairment at least on an annual basis on December 31, or as circumstances warrant based on a number of factors, including operating results, business plans and future cash flows. We perform an assessment of qualitative factors to determine whether the existence of events or circumstances leads to a determination that it is more likely than not that the fair value of a reporting unit is less than its carrying amount. Based on our assessment of events or circumstances, we perform a quantitative assessment of goodwill impairment if it is determined that it is more likely than not that the fair value of a reporting unit is less than its carrying amount. Based on the results of our assessment of qualitative factors, we determined that the fair values of all of our reporting units are likely to be higher than their respective carrying values as of December 31, 2014 and 2015. We review for amortization for impairment our identified intangible assets with defined useful lives whenever events or changes in circumstances indicate that the related carrying amounts may not be recoverable. Determining whether we have incurred an impairment loss requires comparing the carrying amount to the sum of undiscounted cash flows expected to be generated by the asset. When determining the fair value of our reporting units or our intangible assets, we utilize various assumptions, including discount rates, estimated growth rates, economic trends and projections of future cash flows. These projections also take into account factors such as the expected impact of new client contracts, expanded or new business from existing clients, efficiency initiatives, and the maturity of the markets in which each of our businesses operates. We generally categorize intangible assets acquired individually or with a group of other assets or in a business combination as customer-related, marketing-related and other intangible assets. See Note 2—"Summary of Significant Accounting Policies—Business combinations, goodwill and other intangible assets" to our consolidated financial statements for more information about how we value our intangible assets. Actual results may vary, and may cause significant adjustments to the valuation of our assets in the future.

Derivative instruments and hedging activities. We enter into forward foreign exchange contracts to mitigate foreign exchange risk on intercompany transactions and forecasted transactions denominated in foreign currencies. Most of these transactions meet the criteria for hedge accounting as cash flow hedges under FASB guidance on Derivatives and Hedging.

With respect to derivatives designated as cash flow hedges, we formally document all relationships between hedging instruments and hedged items, as well as our risk management objectives and strategy for undertaking various hedge transactions. In addition, we formally assess, both at the inception of a hedge and on a quarterly basis, whether each derivative is highly effective in offsetting changes in fair values or cash flows of the hedged item. If it is determined that a derivative or a portion thereof is not highly effective as a hedge, or if a derivative ceases to be a highly effective hedge, we will prospectively discontinue hedge accounting with respect to that derivative.

We recognize derivative instruments and hedging activities as either assets or liabilities in our Consolidated Balance Sheets and measure them at fair value. Changes in the fair values of these hedges are deferred and

recorded as a component of other comprehensive income (losses), net of tax, until the hedged transactions occur and are recognized in the Consolidated Statements of Income along with the underlying hedged item and disclosed as a part of “Total net revenues,” “Cost of revenue” and “Selling, general and administrative expenses,” as applicable.

We value our derivatives based on market observable inputs, including both forward and spot prices for currencies. Derivative assets and liabilities included in Level 2 primarily represent foreign currency forward contracts. The quotes are taken from independent sources and databases.

Income taxes. We account for income taxes using the asset and liability method. Under this method, income tax expense is recognized for the amount of taxes payable or refundable for the current year. In addition, deferred tax assets and liabilities are recognized for future tax consequences attributable to differences between the financial statement carrying amounts of existing assets and liabilities, and their tax bases and operating losses are carried forward, if any. Deferred tax assets and liabilities are measured using enacted tax rates expected to apply to taxable income in the years in which the temporary differences are expected to be recovered or settled. The effect on deferred tax assets and liabilities of a change in tax rates is recognized in income in the period in which the tax status change becomes effective. Deferred tax assets are recognized in full, subject to a valuation allowance that reduces the amount recognized to that which is more likely than not to be realized. In assessing the likelihood of realization, we consider estimates of future taxable income. In the case of an entity that benefits from a corporate tax holiday, deferred tax assets or liabilities for existing temporary differences are recorded only to the extent such temporary differences are expected to reverse after the expiration of the tax holiday.

We also evaluate potential exposures related to tax contingencies or claims made by tax authorities in various jurisdictions and determine if a reserve is required. A reserve is recorded if we believe that a loss is more likely than not to occur and the amount can be reasonably estimated. Any such reserves are based on estimates and are subject to changing facts and circumstances considering the progress of ongoing audits, case law and new legislation. We believe that the reserves we have established are adequate.

We apply a two-step approach for recognizing and measuring uncertain tax positions. The first step is to evaluate the tax position for recognition by determining, based on the technical merits, that the position is more likely than not to be sustained upon examination. The second step is to measure the tax benefit as the largest amount of the tax benefit that is greater than 50% likely of being realized upon settlement. We also include interest and penalties related to unrecognized tax benefits within our provision for income tax expense.

We generally plan to indefinitely reinvest the undistributed earnings of foreign subsidiaries, except for those earnings that can be repatriated in a tax-free manner. Accordingly, we do not currently accrue any material income, distribution or withholding taxes that would arise if such earnings were repatriated.

Retirement benefits. We record annual amounts relating to defined benefit plans based on calculations that incorporate various actuarial and other assumptions, including discount rates, mortality, assumed rates of return on plan assets, future compensation increases and attrition rates. We review these assumptions on an annual basis and modify the assumptions based on current rates and trends when it is appropriate to do so. Actual results in any given year will often differ from actuarial assumptions because of economic and other factors.

Stock-based compensation expense. We recognize and measure compensation expense for all stock-based awards based on the grant date fair value. For option awards, grant date fair value is determined under the option pricing model (Black-Scholes-Merton model) and, for stock-based awards other than option awards, grant date fair value is determined on the basis of the fair market value of the Company’s shares on the grant date of such awards. Determining the fair value of stock-based awards requires estimates and assumptions, including estimates of the period the stock awards will be outstanding before they are exercised, future volatility in the price of our common shares, and the number of stock-based awards that are likely to be forfeited. The Black-Scholes-Merton option pricing model also involves the use of additional key assumptions, including dividend yield and risk-free interest rate. For performance share units, we are required to estimate the most probable outcome of the performance conditions in order to determine the stock-based compensation cost to be recorded

[Table of Contents](#)

over the vesting period. We periodically assess the reasonableness of our assumptions and update our estimates as required. If actual results differ significantly from our estimates, stock-based compensation expense and our results of operations could be materially affected.

Results of Operations

The following table sets forth certain data from our income statement for the years ended December 31, 2013, 2014 and 2015.

	Year ended December 31,			Percentage change Increase/(Decrease)	
	2013	2014	2015	2014 vs. 2013	2015 vs. 2014
	(dollars in millions)				
Net revenues—GE*	\$ 482.0	\$ 466.1	\$ 459.9	(3.3)%	(1.3)%
Net revenues—Global Clients*	1,649.9	1,813.4	2,001.1	9.9%	10.4%
Total net revenues	2,132.0	2,279.4	2,461.0	6.9%	8.0%
Cost of revenue					
Services	1,319.6	1,378.1	1,493.5	4.4%	8.4%

Net income attributable to Genpact Limited shareholders	\$ 229.7	\$ 192.0	\$ 239.8	(16.4)%	24.9%
Net income attributable to Genpact Limited shareholders as a percentage of total net revenues	10.8%	8.4%	9.7%		

* As described in “Management’s Discussion and Analysis of Financial Condition and Results of Operations—Overview—Classification of Certain Net Revenues,” net revenues from certain businesses in which GE ceased to be a 20% shareholder are classified as a part of GE net revenues until their divestiture by GE and as a part of Global Client net revenues post-divestiture. Net revenues from GE in the year ended December 31, 2014, after excluding net revenues from such dispositions by GE, decreased by 2.4% compared to the year ended December 31, 2013. There was no impact on net revenues from GE in the year ended December 31, 2015 as a result of excluding net revenues from such dispositions by GE.

Fiscal Year Ended December 31, 2015 Compared to Fiscal Year Ended December 31, 2014

Net revenues. Our net revenues were \$2,461.0 million in 2015, up \$181.6 million, or 8.0%, from \$2,279.4 million in 2014. The growth in net revenues was primarily driven by an increase in business process outsourcing, or BPO, services delivered to our Global Clients, including the impact of revenues derived from large, transformational deals. Adjusted for foreign exchange, primarily the depreciation of the euro, Japanese yen and Australian dollar against the U.S. dollar, our net revenues grew 10.2% on a constant currency basis compared to 2014. We provide information about our revenue on a constant currency basis so that our revenue may be viewed without the impact of foreign currency exchange rate fluctuations, thereby facilitating period-to-period comparisons of our business performance. Total net revenues on a constant currency basis are calculated by restating current-period activity using the prior fiscal period's foreign currency exchange rates and hedging gains/losses.

Our average headcount increased by 4.7% to approximately 67,400 in 2015 from approximately 64,400 in 2014. Annualized net revenues per employee were \$36,700 in 2015, up from \$35,900 in 2014.

	Year ended December 31,		Percentage change Increase/ (Decrease) 2015 vs. 2014
	2014	2015	
	(dollars in millions)		
Global Clients:			
BPO services	\$ 1,381.2	\$ 1,578.1	14.3%
IT services	432.2	423.0	(2.1)
Total net revenues from Global Clients	\$ 1,813.4	\$ 2,001.1	10.4%
GE :			
BPO services	355.5	355.0	(0.2)%
IT services	110.6	104.9	(5.1)
Total net revenues from GE	\$ 466.1	\$ 459.9	(1.3)%
Total net revenues from BPO services	1,736.7	1,933.1	11.3%
Total net revenues from IT services	542.7	527.9	(2.7)%
Total net revenues	\$ 2,279.4	\$ 2,461.0	8.0%

Net revenues from Global Clients in 2015 were \$2,001.1 million, up \$187.8 million, or 10.4%, from \$1,813.4 million in 2014. This increase was primarily driven by growth in our targeted verticals, including banking and financial services, consumer product goods, life sciences, insurance and high tech. As a percentage of total net revenues, net revenues from Global Clients increased from 79.6% in 2014 to 81.3% in 2015.

Net revenues from GE in 2015 were \$459.9 million, down \$6.2 million, or 1.3%, from 2014. The decline in net revenues from GE was in line with our expectations for the year. Net revenues from GE declined as a percentage of our total net revenues from 20.4% in 2014 to 18.7% in 2015.

Net revenues from BPO services in 2015 were \$1,933.1 million, up \$196.4 million, or 11.3%, from \$1,736.7 million in 2014. This increase was primarily attributable to an increase in services delivered to our Global Clients, particularly finance and accounting services, core industry vertical operations, analytics and consulting services. Net revenues from IT services were \$527.9 million in 2015, down \$14.8 million, or 2.7%, from \$542.7 million in 2014 due to an overall decrease in IT services delivered to our clients. This decrease was primarily the result of a decline in revenues from our healthcare and capital markets verticals.

Net revenues from BPO services as a percentage of total net revenues increased to 78.5% in 2015 from 76.2% in 2014 with a corresponding decline in the percentage of total net revenues attributable to IT services.

[Table of Contents](#)

Cost of revenue and gross margin. The following table sets forth the components of our cost of revenue and the resulting gross margin:

	Year Ended December 31,		As a percentage of total net revenues	
	2014	2015	2014	2015
	(dollars in millions)			
Personnel expenses	\$ 943.1	\$ 1,013.2	41.4%	41.2%
Operational expenses	390.4	432.5	17.1	17.6
Depreciation and amortization	44.5	47.8	2.0	1.9
Cost of revenue	\$ 1,378.1	\$ 1,493.5	60.5%	60.7%
Gross margin	39.5%	39.3%		

Cost of revenue was \$1,493.5 million, up \$115.5 million, or 8.4%, from 2014. Wage inflation, an increase in our operational headcount to support the growth in our business, and related increases in subcontractor, infrastructure, communication and travel expenses contributed to the higher cost of revenue in 2015 compared to 2014. These increases were partially offset by improved operational efficiencies and favorable foreign exchange, primarily the depreciation of the Indian rupee and euro against the U.S. dollar. Foreign exchange fluctuations cause gains and losses on our foreign currency hedges and have a translation impact when we convert our non-U.S. dollar income statement items to the U.S. dollar, our reporting currency.

Our gross margin decreased marginally from 39.5% in 2014 to 39.3% in 2015 due to the factors described above.

Personnel expenses. Personnel expenses as a percentage of total net revenues decreased from 41.4% in 2014 to 41.2% in 2015. Personnel expenses were \$1,013.2 million, up \$70.1 million, or 7.4%, from \$943.1 million in 2014. The impact of wage inflation and an approximately 3,000-person, or 5.3%, increase in our operational headcount resulted in higher personnel expenses in 2015 compared to 2014. These increases were partially offset by favorable foreign exchange and productivity improvements.

Operational expenses. Operational expenses as a percentage of total net revenues increased from 17.1% in 2014 to 17.6% in 2015. Operational expenses were \$432.5 million, up \$42.1 million, or 10.8%, from 2014. An increase in the use of subcontractors and increases in infrastructure, communication and travel expenses in 2015 contributed to the increase in operational expenses compared to 2014. These increases were partially offset by operational efficiencies and favorable foreign exchange.

Depreciation and amortization expenses. Depreciation and amortization expenses as a percentage of total net revenues were 1.9%, compared to 2.0% in 2014. Depreciation and amortization expenses as a component of cost of revenue were \$47.8 million, up \$3.3 million, or 7.3%, from 2014. This increase was primarily due to the expansion of certain existing facilities in India and was partially offset by favorable foreign exchange.

Selling, general and administrative expenses. The following table sets forth the components of our selling, general and administrative, or SG&A, expenses:

	Year Ended December 31,		As a percentage of total net revenues	
	2014	2015	2014	2015
	(dollars in millions)			
Personnel expenses	\$ 419.3	\$ 430.1	18.4%	17.5%
Operational expenses	157.8	169.0	6.9	6.9
Depreciation and amortization	8.6	9.0	0.4	0.4
Selling, general and administrative expenses	\$ 585.6	\$ 608.1	25.7%	24.7%

SG&A expenses as a percentage of total net revenues decreased to 24.7% from 25.7% in 2014. SG&A expenses were \$608.1 million, up \$22.5 million, or 3.8%, from 2014. Investments in front-end sales and

[Table of Contents](#)

relationship management teams and subject matter experts through the hiring of seasoned personnel in targeted markets and verticals along with the impact of wage inflation contributed to higher SG&A expenses. As a result, our sales and marketing expenses as a percentage of net revenues were approximately 6.9% in 2015, up from approximately 6.6% in 2014. Additionally, fees for professional services contributed to higher SG&A expenses in 2015 compared to 2014. These increases were partially offset by productivity savings, including the more effective use of support staff, a reduction in stock-based compensation costs and by favorable foreign exchange, primarily the depreciation of the Indian rupee and euro against the U.S. dollar.

Personnel expenses. Personnel expenses as a percentage of total net revenues were 17.5%, down from 18.4% in the year ended 2014. Personnel expenses as a component of SG&A expenses were \$430.1 million, up \$10.8 million, or 2.6%, from 2014. The impact of wage inflation and a \$17.2 million, or 4.1%, increase in personnel expenses due to our investments in front-end sales and relationship management teams resulted in an increase in personnel expenses compared to 2014. This increase was partially offset by productivity savings, including as a result of the more effective use of support staff, a reduction in stock-based compensation costs, and favorable foreign exchange.

Operational expenses. Operational expenses as a percentage of total net revenues were 6.9%, unchanged from 2014. Operational expenses as a component of SG&A expenses were \$169.0 million, up \$11.3 million, or 7.2%, compared to 2014. Operational expenses increased primarily due to higher fees for professional services and an increase in travel expenses for subject matter experts in 2015 compared to 2014, partially offset by favorable foreign exchange.

Depreciation and amortization. Depreciation and amortization expenses as a percentage of total net revenues were 0.4%, unchanged from 2014. Depreciation and amortization expenses as a component of SG&A expenses were \$9.0 million, up \$0.4 million, or 4.6%, from 2014. This marginal increase was primarily due to the expansion of certain facilities in India.

Amortization of acquired intangibles. Non-cash charges on account of the amortization of acquired intangibles were \$28.5 million, unchanged from 2014. A \$1.6 million increase in amortization expenses in 2015 is primarily due to our acquisition in the second quarter of 2014 of Pharmedlink. This increase was more than offset by a decline of \$1.9 million in the amortization expense of intangibles arising out of the Company's 2004 reorganization when we began operating as an independent company. The 2004 reorganization intangibles were fully amortized in 2014.

Other operating (income) expense, net. The following table sets forth the components of other operating (income) expense, net:

	Year Ended December 31,		Percentage change Increase/(Decrease) 2015 vs. 2014
	2014	2015	
	(dollars in millions)		
Other operating (income) expense	\$ (3.2)	\$ (2.5)	(20.5)%
Provision for impairment on intangible assets	—	10.7	100.0
Change in fair value of earn-out consideration (relating to business acquisitions)	(3.7)	(11.5)	210.8
Other operating (income) expense, net	\$ (6.9)	\$ (3.3)	(51.6)%
Other operating (income) expense, net as a percentage of total net revenues	(0.3)%	(0.1)%	

Other operating income, net of expenses, was \$3.3 million, down from \$6.9 million in 2014. This decrease was primarily due to a \$10.7 million non-recurring charge in the third quarter of 2015 relating to a software intangible asset, which charge is discussed in Note 10—"Goodwill and intangible assets" to our consolidated

[Table of Contents](#)

financial statements. We recorded an \$11.5 million gain in 2015 compared to a \$3.7 million gain in 2014 due to changes in the fair value of earn-out consideration payable in connection with certain acquisitions.

Income from operations. As a result of the foregoing factors, income from operations as a percentage of total net revenues increased from 12.9% in 2014 to 13.6% in 2015. Income from operations was \$334.2 million, up \$40.2 million from \$294.0 million in 2014.

Foreign exchange (gains) losses, net. We recorded a net foreign exchange gain of \$5.3 million in 2015, compared to a net foreign exchange loss of \$12.4 million in 2014 primarily due to the re-measurement of non-functional currency assets and liabilities and related foreign exchange contracts. The gain in 2015 resulted primarily from the depreciation of the Indian rupee against the U.S. dollar, and the loss in 2014 is primarily attributable to the depreciation of the euro against the U.S. dollar.

Other income (expense), net. The following table sets forth the components of other income (expense), net:

	Year ended December 31,		Percentage change Increase/(Decrease) 2015 vs. 2014
	2014	2015	
	(dollars in millions)		
Interest income	\$ 4.4	\$ 8.7	97.0%
Interest expense	(33.8)	(29.8)	(11.8)
Loss on extinguishment of debt	—	(10.1)	100.0
Other income	2.1	4.4	106.4
Other income (expense), net	\$ (27.3)	\$ (26.9)	(1.4)%
Other income (expense), net as a percentage of total net revenues	(1.2)%	(1.1)%	

Our net other expenses decreased by \$0.4 million in the year ended 2015 compared to the year ended 2014, primarily due to higher interest income, higher other income, mainly due to a non-recurring loss on the sale of a capital asset in 2014, and lower interest expense, which together more than offset the accelerated amortization in 2015 of \$10.1 million in debt issuance costs in connection with the refinancing of our credit facility, which is discussed in Note 14 to our consolidated financial statements. The decrease in our interest expense is primarily due to a lower interest rate on our loan and a lower amount drawn down under our revolver in 2015 compared to 2014. The weighted average rate of interest on our debt decreased from 3.4% in 2014 to 2.5% in 2015. Our interest income increased by \$4.3 million in 2015 compared to 2014, primarily due to higher account balances in India, where we earn higher interest rates on our deposits, in 2015 compared to 2014, and to the non-recurring receipt of interest income on income tax refunds in 2015.

Equity-method investment activity, net. Equity-method investment activity, net in 2015 primarily represents our \$10.8 million share of loss, compared to a \$4.8 million loss in 2014, from our non-consolidated affiliate, Markit Genpact KYC Services Limited, a U.K.-based joint venture with Markit Group Limited formed in 2014.

Income tax expense. Our income tax expense increased from \$57.4 million in 2014 to \$61.9 million in 2015 due to higher pre-tax income. Our effective tax rate, or ETR, was 20.5% in 2015, down from 23.0% in 2014. The improvement in our ETR was primarily driven by an increase in our earnings in lower-tax locations.

Net income attributable to non-controlling interest. Non-controlling interest primarily refers to profit or loss associated with the non-controlling partners' interest in the operations of Genpact Netherlands B.V. As a result of our purchase of the non-controlling interests in Genpact Netherlands B.V. in the third quarter of 2014, we now have 100% control of the entity. Accordingly, no income or loss was attributable to non-controlling interest in respect of Genpact Netherlands B.V. in 2015.

[Table of Contents](#)

Net income attributable to Genpact Limited common shareholders. As a result of the foregoing factors, net income attributable to Genpact Limited common shareholders as a percentage of net revenues increased from 8.4% in 2014 to 9.7% in 2015. Net income attributable to our common shareholders increased by \$47.8 million from \$192.0 million in 2014 to \$239.8 million in 2015.

Fiscal Year Ended December 31, 2014 Compared to Fiscal Year Ended December 31, 2013

Net revenues. Our net revenues were \$2,279.4 million in 2014, up \$147.4 million, or 6.9%, from \$2,132.0 million in 2013. The growth in net revenues was primarily driven by an increase in business process outsourcing, or BPO, services delivered to our Global Clients, an increase in information technology, or IT, services delivered to both our Global Clients and GE, and by the acquisition of Pharmalink, which we refer to as our “regulatory affairs acquisition” and which contributed \$26.1 million to our net revenues in 2014. Adjusted for foreign exchange, which had an adverse impact on our net revenues in 2014, our net revenues grew 7.9% compared to 2013. Our average headcount increased by 8.6% to approximately 64,400 in 2014 from approximately 59,300 in 2013. Our annualized net revenues per employee were \$35,900 in 2014, compared to \$36,000 in 2013.

	Year ended December 31,		Percentage change Increase/(Decrease) 2014 vs. 2013
	2013	2014	
	(dollars in millions)		
<i>Global Clients:</i>			
BPO services	\$ 1,231.5	1,381.2	12.2%
IT services	418.5	432.2	3.3%
Total net revenues from Global Clients	\$ 1,649.9	\$ 1,813.4	9.9%
<i>GE:</i>			
BPO services	376.8	355.5	(5.6)%
IT services	105.3	110.6	5.0%
Total net revenues from GE	\$ 482.0	\$ 466.1	(3.3)%
Total net revenues from BPO services	1,608.2	1,736.7	8.0%
Total net revenues from IT services	523.8	542.7	3.6%
Total net revenues	\$ 2,132.0	\$ 2,279.4	6.9%

Net revenues from Global Clients in 2014 were \$1,813.4 million, up \$163.4 million, or 9.9%, from \$1,649.9 million in 2013. This increase was primarily driven by growth in five of our targeted verticals—consumer product goods, life sciences, insurance, capital markets and infrastructure, manufacturing and services—and by revenues derived from our regulatory affairs acquisition. As a percentage of total net revenues, net revenues from Global Clients increased from 77.4% in 2013 to 79.6% in 2014.

Net revenues from GE were \$466.1 million in 2014, down \$16.0 million, or 3.3%, from 2013, primarily as a result of divestitures made by GE and an expected decline in BPO services delivered to GE, which was partially offset by growth in short-cycle IT and consulting projects. Net revenues from GE declined as a percentage of our total net revenues from 22.6% in 2013 to 20.4% in 2014. Net revenues from GE in 2014, after excluding net revenues from dispositions by GE, decreased 2.4% from 2013.

Net revenues from BPO services for 2014 were \$1,736.7 million, up \$128.5 million, or 8.0%, from \$1,608.2 million in 2013. This increase was primarily attributable to an increase in revenues from our Global Clients—particularly for finance and accounting services, core vertical operations and consulting services—and to our regulatory affairs acquisition. Net revenues from IT services were \$542.7 million in 2014, up \$18.9 million, or 3.6%, from \$523.8 million in 2013 due to an increase in IT services delivered to both our Global Clients and GE.

Net revenues from BPO services as a percentage of total net revenues increased to 76.2% in 2014 from 75.4% in 2013 with a corresponding decline in the percentage of total net revenues attributable to IT services.

Cost of revenue and gross profit. The following table sets forth the components of our cost of revenue and the resulting gross profit:

	Year Ended December 31,		As a percentage of total net revenues	
	2013	2014	2013	2014
	(dollars in millions)			
Personnel expenses	\$ 904.4	\$ 943.1	42.4%	41.4%
Operational expenses	367.2	390.4	17.2	17.1
Depreciation and amortization	47.9	44.5	2.2	2.0
Cost of revenue	\$ 1,319.6	\$ 1,378.1	61.9%	60.5%
Gross profit	\$ 812.4	\$ 901.4	38.1%	39.5%

Cost of revenue was \$1,378.1 million, up \$58.5 million, or 4.4%, from 2013. Of this increase, \$18.5 million is attributable to our regulatory affairs acquisition. Wage inflation, an increase in personnel expenses due to an increase in our operational headcount, and increased use of subcontractors for service delivery also contributed to higher cost of revenue in 2014 compared to 2013. These increases were partially offset by lower stock-based compensation costs, the effects of foreign exchange volatility, and the improved operational efficiencies described above in 2014 compared to 2013.

Our gross margin increased from 38.1% in 2013 to 39.5% in 2014. This increase is primarily attributable to improved operational efficiencies, including the more effective deployment and use of operations personnel. The increase in gross margin is also attributable to foreign exchange volatility, which causes gains and losses on our foreign currency hedges and has a foreign currency translation impact when we convert our non-U.S. dollar income statement items to the U.S. dollar, our reporting currency. The impact of these factors was partially offset by the effects of wage inflation.

Personnel expenses. Personnel expenses as a percentage of total net revenues decreased from 42.4% in 2013 to 41.4% in 2014, primarily due to improved operational efficiencies, including the more effective deployment and use of operations personnel, the increased use of subcontractors for service delivery, the effects of foreign exchange volatility and a decrease in stock-based compensation expenses. The impact of these factors was partially offset by a \$10.6 million increase in personnel expenses attributable to our regulatory affairs acquisition in 2014. Wage inflation and an approximately 3,500-person, or 6.8%, increase in our operational headcount (excluding the regulatory affairs acquisition) also resulted in higher personnel expenses in 2014 compared to 2013. As a result, personnel expenses for 2014 were \$943.1 million, up \$38.7 million, or 4.3%, from \$904.4 million in 2013.

Operational expenses. Operational expenses as a percentage of total net revenues decreased from 17.2% in 2013 to 17.1% in 2014 primarily due to the effects of foreign exchange volatility. Operational expenses for 2014 were \$390.4 million, up \$23.2 million, or 6.3%, from 2013 as a result of the increased use of subcontractors for service delivery and an approximately \$7.7 million increase in operational expenses attributable to our regulatory affairs acquisition.

Depreciation and amortization expenses. Depreciation and amortization expenses as a percentage of total net revenues declined to 2.0% in 2014 from 2.2% in 2013. Depreciation and amortization expenses as a component of cost of revenue for 2014 were \$44.5 million, down \$3.4 million, or 7.0%, from 2013. This decrease was primarily due to an increase in fully depreciated assets since the end of 2013 at our delivery centers located in India, the U.S. and Europe and to the effects of foreign exchange volatility and were partially offset by depreciation and amortization expenses resulting from the expansion of certain existing facilities and the addition of new delivery centers in India.

[Table of Contents](#)

Selling, general and administrative expenses. The following table sets forth the components of our selling, general and administrative, or SG&A, expenses:

	Year Ended December 31,		As a percentage of total net revenues	
	2013	2014	2013	2014
	(dollars in millions)			
Personnel expenses	\$ 347.4	\$ 419.3	16.3%	18.4%
Operational expenses	129.0	157.8	6.0	6.9
Depreciation and amortization	8.4	8.6	0.4	0.4
Selling, general and administrative expenses	\$ 484.8	\$ 585.6	22.7%	25.7%

SG&A expenses as a percentage of total net revenues increased from 22.7% in 2013 to 25.7% in 2014. SG&A expenses in 2014 were \$585.6 million, up \$100.8 million, or 20.8%, from 2013. Our sales and marketing expenses in 2014 were \$151.5 million, or 25.9% of SG&A expenses, up from \$100.8 million, or 20.8% of SG&A expenses, in 2013. SG&A expenses increased primarily as a result of our investments in sales and business development personnel and subject matter experts through the hiring of more than 100 seasoned professionals in our targeted markets—such as the United States and Europe—and industry verticals—namely, banking and financial services, insurance, consumer product goods and life sciences. Wage inflation also contributed to the increase in SG&A expenses in 2014. As a result, our sales and marketing expenses as a percentage of net revenues were approximately 6.6% in 2014, up from approximately 4.7% in 2013.

Of the total increase in SG&A expenses, \$5.4 million is attributable to our regulatory affairs acquisition. Additionally, travel costs related to sales and marketing activities and fees for professional services related to strategic initiatives contributed to higher SG&A expenses. These increases were partially offset by a lower reserve for doubtful receivables in 2014 compared to 2013, an expense of \$1.1 million in 2013 resulting from the amendment of our credit facility and by the effects of foreign exchange volatility.

Personnel expenses. Personnel expenses as a percentage of total net revenues in 2014 were 18.4%, up from 16.3% in 2013. Personnel expenses as a component of SG&A expenses were \$419.3 million in 2014, up \$71.9 million, or 20.7%, from 2013. Our sales team personnel expenses increased by approximately 47.6%, primarily driven by the addition of more than 100 client-facing personnel in 2014. Another \$3.6 million of the increase is due to our regulatory affairs acquisition. Wage inflation and an increase in our support headcount also resulted in higher personnel costs in 2014 compared to 2013. This increase was partially offset by the effects of foreign exchange volatility.

Operational expenses. Operational expenses as a percentage of total net revenues increased from 6.0% in 2013 to 6.9% in 2014. Operational expenses as a component of SG&A expenses increased by \$28.8 million, or 22.3%, in 2014 compared to 2013. Higher sales and marketing related travel and fees for professional services resulted in higher operational expenses in 2014 compared to 2013. Of this increase, \$1.8 million is attributable to our regulatory affairs acquisition. We also incurred acquisition-related expenses of \$2.8 million in 2014. These increases were partially offset by an \$8.3 million decline in the reserve for doubtful receivables in 2014, an expense of \$1.1 million relating to the amendment of our credit facility in 2013, and the effects of foreign exchange volatility.

Depreciation and amortization. Depreciation and amortization expenses as a percentage of total net revenues were 0.4% in 2014, unchanged from 2013. Depreciation and amortization expenses for 2014 were \$8.6 million, compared to \$8.4 million in 2013. Fully depreciated assets increased since the end of 2013 at our facilities in India, the U.S. and Europe, which, together with the effects of foreign exchange volatility, resulted in lower depreciation in 2014. This decrease was offset by depreciation and amortization expenses resulting from the expansion of certain facilities in India, the addition of new facilities, and the acquisitions we consummated in 2013 and 2014.

[Table of Contents](#)

Amortization of acquired intangibles. Non-cash charges on account of the amortization of acquired intangibles were \$28.5 million in 2014, up \$4.9 million from 2013. Our 2014 acquisitions contributed additional amortization expenses of \$5.3 million. This increase was partially offset by a decline of \$1.0 million in the amortization expense of intangibles arising out of the Company's 2004 reorganization when we began operating as an independent company. In each case, the amortization was consistent with the applicable estimated useful life of the acquired intangible assets.

Other operating (income) expense, net. The following table sets forth the components of other operating (income) expense, net:

	Year ended December 31,		Percentage change Increase/(Decrease) 2014 vs. 2013
	2013	2014	
	(dollars in millions)		
Other operating (income) expense	\$ (3.3)	\$ (3.2)	(2.9)%
Provision for impairment of capital work in progress/property, plant and equipment	2.4	—	(100.0)
Change in fair value of earn-out consideration and deferred consideration (relating to business acquisitions)	(4.7)	(3.7)	(20.6)
Other operating (income) expense, net	\$ (5.6)	\$ (6.9)	23.7%
Other operating (income) expense, net as a percentage of total net revenues	(0.3)%	(0.3)%	

Other operating income, net of expenses, was \$6.9 million in 2014, up from \$5.6 million in 2013. In 2013, we recorded a \$2.4 million non-recurring provision for impairment against certain capital assets in India. This was partially offset by a \$1.0 million lower gain resulting from changes in the earn-out consideration payable in connection with certain acquisitions.

Income from operations. As a result of the foregoing factors, income from operations as a percentage of net revenues decreased from 14.5% in 2013 to 12.9% in 2014. Income from operations was \$294.0 million, down \$15.5 million from \$309.5 million in 2013.

Foreign exchange (gains) losses, net. We recorded a net foreign exchange loss of \$12.4 million in 2014, compared to a net foreign exchange gain of \$20.8 million in 2013. The net foreign exchange loss in 2014 is primarily due to the re-measurement of our non-functional currency assets and liabilities and related foreign exchange contracts resulting from the depreciation of the Euro against the U.S. dollar in 2014. The net foreign exchange gain in 2013 is primarily due to the depreciation of the Indian rupee against the U.S. dollar.

Other income (expense), net. The following table sets forth the components of other income (expense), net:

	Year ended December 31,		Percentage change Increase/(Decrease) 2015 vs. 2014
	2013	2014	
	(dollars in millions)		
Interest income	\$ 15.7	\$ 4.4	(72.0)%
Interest expense	(35.7)	(33.8)	(5.4)
Loss on extinguishment of debt	(3.2)	—	(100.0)
Provision (created) reversed for loss on divestitures	(3.5)	—	(100.0)
Other income	2.3	2.1	(8.9)
Other income (expense), net	\$ (24.3)	\$ (27.3)	12.2%
Other income (expense), net as a percentage of total net revenues	(1.1)%	(1.2)%	

[Table of Contents](#)

Our net other expenses increased by \$3.0 million in the year ended 2014 compared to the year ended 2013, primarily on account of higher net interest expense in 2014. This increase was partially offset by a \$3.5 million provision, created in 2013, for losses on the divestitures of Clearbizz B.V. and Gantthead.com, Inc. Our net interest expense increased by \$6.3 million as the result of a \$5.1 million decrease in interest expense and an \$11.3 million decrease in interest income in 2014 compared to 2013. The decrease in interest expense was the result of lower interest expense of \$2.1 million in 2014 due to a lower interest rate on our amended facility. We also incurred a \$3.2 million loss on extinguishment of debt in June 2013 in connection with the amendment of our credit facility. The weighted average rate of interest on our debt decreased from 3.8% in 2013 to 3.4% in 2014. Our interest income decreased by \$11.3 million in 2014 primarily due to higher account balances in jurisdictions in which we earn lower interest rates during 2014 compared to 2013 and to the non-recurring receipt of interest income on an income tax refund in 2013.

Equity-method investment activity, net. Equity-method investment activity, net in 2014 primarily represents our share of loss from our non-consolidated affiliate, Markit Genpact KYC Services Limited, a joint venture with Markit Group Limited. We entered into this joint venture in 2014. Equity-method investment activity, net in 2013 primarily represents our share of gain from NIIT Uniqua, our joint venture with NIIT.

Income tax expense. Our income tax expense decreased from \$71.1 million in 2013 to \$57.4 million in 2014 due primarily to lower pre-tax income. Our effective tax rate, or ETR, was 23.0% in 2014, down from 23.6% in 2013. The improvement in our ETR was primarily driven by the growth of our operations in low-tax and tax-exempt locations, mostly in India.

Net income attributable to non-controlling interest. Non-controlling interest primarily refers to profit or loss associated with the non-controlling partners' interest in the operations of Genpact Netherlands B.V. and the non-controlling shareholders' interest in the operations of Hello Communications (Shanghai) Co., Ltd. Net income attributable to non-controlling interest decreased from \$5.3 million in 2013 to \$0.2 million in 2014. This decrease was the result of our purchase of the non-controlling interests in Genpact Netherlands B.V. in the third quarter of 2014, over which we now have 100% control, and to our divestiture of Hello Communications (Shanghai) Co. Ltd. in February 2013.

Net income attributable to Genpact Limited common shareholders. As a result of the foregoing factors, net income attributable to Genpact Limited common shareholders as a percentage of net revenues, decreased from 10.8% in 2013 and to 8.4% in 2014. Net income attributable to Genpact Limited common shareholders decreased by \$37.7 million from \$229.7 million in 2013 to \$192.0 million in 2014.

Seasonality

Our financial results may vary from period to period. Our revenues are typically higher in the third and fourth quarters than in other quarters, as a result of several factors. We generally find that demand for short-term IT projects, transformation services and analytics services increases in the fourth quarter as our clients utilize the balance of their budgets for the year. In addition, contracts for long-term IT Services and BPO engagements are often signed in the first and second quarters as clients begin new budget cycles. Volumes under such contracts then increase in the latter part of the year as engagements ramp up. Additionally, demand for certain services, such as collections and transaction processing, is often greater in the second half of the year as our clients' volumes in such areas increase.

The tables in Note 29 to our consolidated financial statements present unaudited quarterly financial information for each of our last eight fiscal quarters on a historical basis. We believe the quarterly information set forth therein contains all adjustments necessary to fairly present such information. The comparison of our results for the first quarter of 2015 with the fourth quarter of 2014 reflects the seasonal trends described above. The results for any interim period are not necessarily indicative of the results that may be expected for the full year.

Statement of financial position

Key changes in our financial position during 2015

Following are the significant changes in our financial position as of December 31, 2015 compared to December 31, 2014:

- **Long-term debt increased by \$122.9 million**
Our long-term debt increased primarily as a result of the refinancing of our 2012 credit facility in June 2015 through a new credit facility. As a result of this refinancing, we extinguished \$663.2 million in outstanding term loan under our previous credit facility. Refer to Note 14 to our consolidated financial statements for additional information.
- **Short-term borrowings decreased by \$113.5 million**
Our short-term borrowings decreased, primarily due to the repayment of \$135 million under our revolving facility in 2015, partially offset by \$21.5 million in proceeds as a result of the refinancing of our 2012 credit facility in June 2015. Refer to Note 15 to our consolidated financial statements for additional information.
- **Accounts receivable increased by \$64.4 million**
The increase in our accounts receivable is primarily due to increased sales in 2015 and an increase in our days sales outstanding, from 79 days as of December 31, 2014 to 82 days as of December 31, 2015.
- **Goodwill and intangible assets decreased by \$34.8 million**
Goodwill decreased by \$18.9 million primarily due to foreign exchange fluctuations in 2015, partially offset by goodwill arising out of our 2015 acquisitions. Our intangible assets decreased by \$15.9 million, primarily due to amortization expenses and a non-recurring charge relating to a software intangible asset in 2015, partially offset by intangible assets acquired in 2015. Refer to Notes 3 and 10 to our consolidated financial statements for additional information.
- **Other assets and prepaid expenses increased by \$31.8 million**
The increase in other assets and prepaid expenses is primarily due to a net increase in advance tax payments, advance supplier payments and deferred transition costs.
- **Accrued expenses, other current liabilities and other liabilities increased by \$23.1 million**
The increase in accrued expenses, other current liabilities and other liabilities is primarily due to higher accruals in 2015 due to increased business activity in 2015 to support higher sales, including infrastructure repair and maintenance costs, higher capital expenditures and employee-related accruals. These increases were partially offset by a decrease in earn-out consideration payable in connection with certain acquisitions and the mark-to-market impact of our derivative financial instruments.

Liquidity and Capital Resources

Overview

Information about our financial position as of December 31, 2014 and 2015 is presented below:

	As of December 31, 2014	As of December 31, 2015	Percentage change Increase/(Decrease) 2015 vs. 2014
	(dollars in millions)		
Cash and cash equivalents	\$ 461.8	\$ 450.9	(2.4)%
Short term borrowings	135.0	21.5	(84.1)
Long-term debt due within one year	4.3	39.1	812.6
Long-term debt other than the current portion	649.3	737.3	13.6
Genpact Limited total shareholders' equity	\$ 1,285.1	\$ 1,304.4	1.5%

Financial Condition

We have historically financed our operations and our expansion, including acquisitions, with cash from operations and borrowing facilities.

Our cash and cash equivalents were \$450.9 million as of December 31, 2015, compared to \$461.8 million as of December 31, 2014. Our cash and cash equivalents are comprised of (a) \$219.5 million in cash in current accounts across all operating locations to be used for working capital and immediate capital requirements and (b) \$231.4 million in deposits with banks to be used for medium-term planned expenditures and capital requirements. We held no short-term deposits as of December 31, 2015 and December 31, 2014.

As of December 31, 2015, \$431.9 million of the \$450.9 million of cash and cash equivalents was held by our foreign (non-Bermuda) subsidiaries. \$11.7 million of this cash is held by a foreign subsidiary for which the Company expects to incur and has accrued a deferred tax liability on the repatriation of \$8.0 million of retained earnings. \$71.6 million of the cash and cash equivalents held by our foreign subsidiaries is held in jurisdictions where no tax is expected to be imposed upon repatriation.

As we previously disclosed, in February 2015 our Board of Directors authorized a plan to repurchase up to \$250 million in value of our common shares. During the year ended December 31, 2015, we purchased 9,867,873 of our common shares under this program. Such shares were purchased at a weighted average price of \$23.00 per share for an aggregate cash amount of approximately \$226.9 million. Since January 1, 2016, we have completed \$250 million in share purchases under the February 2015 share repurchase program.

In February 2016, our Board of Directors approved an additional \$250 million share repurchase program, bringing the total authorization under our existing program to \$500 million. Our repurchase program does not obligate us to acquire any specific number of shares. Under the program, we may purchase shares in privately negotiated or open market transactions. Pursuant to our February 2015 share repurchase program and our repurchase program announced in February 2016, we purchased an aggregate of 1,307,830 of our common shares between January 1, 2016 and February 26, 2016 at a weighted average price of \$24.28 per share for an aggregate cash amount of \$31.8 million.

We expect that in the future our cash from operations, cash reserves and debt capacity will be sufficient to finance our operations as well as our growth and expansion plans. Our working capital needs are primarily to finance our payroll and other administrative and information technology expenses in advance of the receipt of accounts receivable. Our primary capital requirements include opening new delivery centers, expanding related operations to support our growth, and financing acquisitions.

Cash flows from operating, investing and financing activities, as reflected in our Consolidated Statements of Cash Flows, are summarized in the following table:

	Year Ended December 31,		Percentage change Increase/(Decrease) 2015 vs. 2014
	2014	2015	
	(dollars in millions)		
Net cash provided by (used for)			
Operating activities	\$ 271.8	\$ 327.4	20.5%
Investing activities	(192.8)	(100.5)	(47.9)
Financing activities	(177.4)	(218.9)	23.4
Net increase (decrease) in cash and cash equivalents	<u>\$ (98.4)</u>	<u>\$ 8.1</u>	<u>(108.2)%</u>

Cash flows from operating activities. We generated net cash from operating activities of \$327.4 million in 2015, up \$55.6 million from 2014. The increase in cash inflows is primarily attributable to a \$45.1 million increase in net income adjusted for amortization, depreciation and other non-cash items. A net change in our operating assets and liabilities of \$10.5 million in 2015 compared to 2014 also contributed to the increase in cash

[Table of Contents](#)

generated from operating activities, primarily due to (i) higher payables in 2015 due to accruals for certain sales and strategic planning events and infrastructure repair and maintenance costs in the fourth quarter of 2015, (ii) an \$11.7 million decrease in net income tax payments compared to 2014 as a result of an increase in our earnings in low-tax and tax-exempt locations and the timing of certain tax payments, including the payment of a one-time intercompany dividend tax of \$5.0 million in 2014, and (iii) higher upfront investments in certain large deals in 2014. These items were partially offset by a \$54.8 million increase in investments in trade receivables in 2015 compared to 2014. Our days sales outstanding were 82 days as of December 31, 2015 compared to 79 days as of December 31, 2014.

Cash flows from investing activities. Our net cash used for investing activities was \$100.5 million in 2015, down \$92.3 million from 2014. This decrease was primarily due to the payment of \$130.8 million, net of cash acquired, for our regulatory affairs acquisition in 2014 compared to payments in 2015 of (i) \$15.1 million for our acquisitions of wealth management operations platforms in the U.S. and the U.K. and (ii) \$6.1 million for our acquisition of a delivery center in Slovakia. We also made an \$18.4 million investment in 2015 in our non-consolidated affiliate, Markit Genpact KYC Services Limited.

Cash flows from financing activities. Our net cash used for financing activities was \$218.9 million in 2015, up \$41.5 million from 2014. In June 2015, we refinanced our 2012 credit facility through a new credit facility comprised of an \$800.0 million term loan and a \$350.0 million revolving facility. As a result, we extinguished the outstanding term loan, amounting to \$663.2 million, under the previous facility and obtained \$800.0 million in new funding, resulting in a net inflow of \$136.8 million. In the third and fourth quarters of 2015, we repaid \$20.0 million of the term loan under our new facility. In connection with our entry into the new facility in the second quarter of 2015, we paid \$5.5 million in expenses and repaid \$135.0 million, representing the amount we had drawn down under the 2012 revolving credit facility as of the date of the June 2015 refinancing. Additionally, in 2015, we obtained and repaid two short-term loans in the amounts of \$672.5 million and \$737.5 million, in connection with which we paid debt issuance costs of \$1.0 million. We also had lower proceeds from short-term borrowings (net of repayments) of \$21.5 million in 2015 compared to \$135.0 million in 2014. Additionally, payments for net settlement of stock-based awards were \$4.7 million higher in 2015 than in 2014. The impact of the foregoing items on cash flows was offset by lower share repurchase payments of \$226.9 million in 2015 compared to \$302.6 million and related expenses of \$2.5 million in 2014.

Financing Arrangements (Credit Facility)

In June 2015 we refinanced our 2012 facility through a new credit facility comprised of a term loan of \$800 million and a revolving credit facility of \$350 million. As of December 31, 2014 and December 31, 2015, our outstanding term loan debt, net of debt amortization expense of \$11.3 million and \$3.5 million, was \$653.6 million and \$776.5 million, respectively. As of December 31, 2014 and December 31, 2015, the limits available were \$14.3 million and \$15.8 million, respectively, of which \$8.1 million and \$10.3 million was utilized, constituting non-funded drawdown. For details on our financing arrangements, refer to notes 14 and 15 to our consolidated financial statements.

Goodwill Impairment Testing

Goodwill of a reporting unit is tested for impairment at least annually and between annual tests if an event occurs or circumstances change that would more likely than not reduce the fair value of the reporting unit below its carrying amount. In accordance with ASU 2011-08, the Company has an option to perform an assessment of qualitative factors, such as macro-economic conditions, industry and market considerations, overall financial performance, business plans and expected future cash flows, to determine whether events or circumstances exist which lead to a determination that it is more likely than not that the fair value of a reporting unit is less than its carrying amount. Based on our assessment of such qualitative factors, we concluded that the fair values of all of our reporting units are likely to be higher than their respective carrying values as of December 31, 2015.

[Table of Contents](#)

Off-Balance Sheet Arrangements

Our off-balance sheet arrangements consist of foreign exchange contracts and certain operating leases. For additional information, see the Risk Factor entitled “Currency exchange rate fluctuations in various currencies in which we do business, especially the Indian rupee, the euro and the U.S. dollar, could have a material adverse effect on our business, results of operations and financial condition,” the section titled “Contractual Obligations” below, and Note 7 to our consolidated financial statements.

Contractual Obligations

The following table sets forth our total future contractual obligations as of December 31, 2015:

	Total	Less than 1 year	1-3 years (dollars in millions)	3- 5 years	After 5 years
Long-term debt	\$ 843.4	\$ 55.5	\$ 108.6	\$679.3	\$ —
—Principal payments	776.4	39.1	78.4	658.9	—
—Interest payments*	67.0	16.4	30.2	20.4	—
Short-term borrowings	21.7	21.7	—	—	—
—Principal payments	21.5	21.5	—	—	—
—Interest payments**	0.2	0.2	—	—	—
Capital leases	4.2	1.7	2.0	0.5	—
—Principal payments	3.4	1.3	1.7	0.4	—
—Interest payments	0.8	0.4	0.3	0.1	—
Operating leases	131.4	27.9	45.9	28.6	29.0
Purchase obligations	47.0	35.4	10.3	1.3	—
Capital commitments net of advances	8.2	8.2	—	—	—
Earn-out consideration	26.1	18.1	6.6	1.4	—
—Reporting date fair value	22.9	17.0	5.0	0.9	—
—Interest	3.2	1.1	1.6	0.5	—
Other liabilities	74.3	46.8	16.6	10.9	—
Total contractual obligations	\$1,156.3	\$ 215.3	\$ 190.0	\$722.0	\$ 29.0

* Our interest payments on long-term debt are calculated at a rate equal to LIBOR plus a margin of 1.50% per annum based on our debt rating as of December 31, 2015.

** Our interest payments on short-term debt represent estimated payments at a rate equal to LIBOR plus a margin of 1.50% per annum based on our debt rating as of December 31, 2015 and our expectation for the repayment of such debt.

Recent Accounting Pronouncements

Recently adopted accounting pronouncements

For a description of recently adopted accounting pronouncements, see Note 2—“Recently adopted accounting pronouncements” under Item 1—“Financial Statements” above and Part II, Item 7—“Management’s Discussion and Analysis of Financial Condition and Results of Operations”—“Critical Accounting Policies and Estimates” in this Annual Report on Form 10-K.

Recently issued accounting pronouncements

In May 2014, the FASB issued Accounting Standards Update (“ASU”) No. 2014-09, Revenue from Contracts with Customers, which will replace most existing revenue recognition guidance in U.S. GAAP. The

core principle of the ASU is that an entity should recognize revenue for the transfer of goods or services equal to the amount that it expects to be entitled to receive for those goods or services. The ASU requires additional disclosure about the nature, amount, timing and uncertainty of revenue and cash flows arising from customer contracts, including significant judgments and changes in judgments. The ASU will be effective for us beginning January 1, 2018, including interim periods in our fiscal year 2018, and allows for both retrospective and prospective adoption. We are in the process of determining the method of adoption and assessing the impact of this ASU on our consolidated results of operations, cash flows, financial position or disclosures.

In January 2015, the FASB issued ASU No. 2015-01, Simplifying Income Statement Presentation by Eliminating the Concept of Extraordinary Items. Such items are defined as transactions or events that are both unusual in nature and infrequent in occurrence, and, currently, are required to be presented separately in an entity's income statement, net of income tax, after income from continuing operations. The changes eliminate the concept of an extraordinary item and, therefore, the presentation of such items will no longer be required. Notwithstanding this change, an entity will still be required to present and disclose a transaction or event that is both unusual in nature and infrequent in occurrence in the notes to the financial statements. These changes become effective for us on January 1, 2016. We do not expect the adoption of this update to have a material impact on our consolidated results of operations, cash flows, financial position or disclosures.

In February 2015, the FASB issued ASU No. 2015-02, Amendment to the Consolidation Analysis, which specifies changes to the analysis that an entity must perform to determine whether it should consolidate certain types of legal entities. These changes (i) modify the evaluation of whether limited partnerships and similar legal entities are variable interest entities or voting interest entities, (ii) eliminate the presumption that a general partner should consolidate a limited partnership, (iii) affect the consolidation analysis of reporting entities that are involved with variable interest entities, particularly those that have fee arrangements and related party relationships, and (iv) provide a scope exception from consolidation guidance for reporting entities with interests in legal entities that are required to comply with or operate in accordance with requirements that are similar to those in Rule 2a-7 of the Investment Company Act of 1940 for registered money market funds. These changes become effective for us on January 1, 2016. We do not expect the adoption of this update to have a material impact on our consolidated results of operations, cash flows, financial position or disclosures.

In May 2015, the FASB issued ASU No. 2015-05, Customer's Accounting for Fees Paid in a Cloud Computing Arrangement, which provides explicit guidance to evaluate the accounting for fees paid by a customer in a cloud computing arrangement. The new guidance clarifies that if a cloud computing arrangement includes a software license, the customer should account for the license consistent with its accounting for other software licenses. If the arrangement does not include a software license, the customer should account for the arrangement as a service contract. The ASU will be effective for us beginning January 1, 2016, including interim periods in our fiscal year 2016, and allows for both retrospective and prospective adoption. We will adopt the requirements of this standard prospectively and do not expect the adoption of this update to have a material impact on our consolidated results of operations, cash flows, financial position or disclosures.

In September 2015, the FASB issued ASU No. 2015-16, "Business Combinations," which eliminates the requirement for an acquirer in a business combination to account for measurement-period adjustments retrospectively. Under the ASU, the acquirer shall recognize adjustments to provisional amounts that are identified during the measurement period in the reporting period in which the adjustment amounts are determined. The ASU will be effective for us beginning January 1, 2016, including interim periods in our fiscal year 2016. We do not expect the adoption of this update to have a material impact on our consolidated results of operations, cash flows, financial position or disclosures.

In January 2016, the FASB issued ASU No. 2016-01, "Financial Instruments—Overall: Recognition and Measurement of Financial Assets and Financial Liabilities," which primarily affects accounting for equity investments, financial liabilities under the fair value option, and the presentation and disclosure requirements for financial instruments. In addition, the ASU clarifies guidance related to the valuation allowance assessment when recognizing deferred tax assets resulting from unrealized losses on available-for-sale debt securities. The ASU

will be effective for us beginning January 1, 2018, including interim periods in our fiscal year 2018. Early adoption is permitted. We are in the process of determining the method of adoption and assessing the impact of this ASU on our consolidated results of operations, cash flows, financial position and disclosures.

In February 2016, the FASB issued ASU No. 2016-02, “Leases.” The core principle of the ASU is that a lessee should recognize the assets and liabilities that arise from its leases other than those that meet the definition of a short-term lease. The ASU requires extensive qualitative and quantitative disclosures, including with respect to significant judgments made by management. The ASU will be effective for us beginning January 1, 2019, including interim periods in our fiscal year 2019. Early adoption is permitted. We are in the process of determining the method of adoption and assessing the impact of this ASU on our consolidated results of operations, cash flows, financial position and disclosures.

Item 7A. Quantitative and Qualitative Disclosures About Market Risk

Foreign currency risk

Our exposure to market risk arises principally from exchange rate risk. A substantial portion of our revenues (approximately 73% in fiscal 2015) is received in U.S. dollars. We also receive revenues in Japanese yen, euros, U.K. pounds sterling, Australian dollars, Chinese renminbi, South African rand and Indian rupees. Our expenses are primarily in Indian rupees and we also incur expenses in U.S. dollars, Chinese renminbi, euros and the currencies of the other countries in which we have operations. Our exchange rate risk arises from our foreign currency revenues, expenses, receivables and payables. Based on the results of our European operations for fiscal 2015, and excluding any hedging arrangements that we had in place during that period, a 5.0% appreciation or depreciation of the Euro against the U.S. dollar would have increased or decreased, as applicable, our revenues in fiscal 2015 by approximately \$7 million. Similarly, excluding any hedging arrangements that we had in place during that period, a 5.0% depreciation of the Indian rupee against the U.S. dollar would have decreased our expenses incurred and paid in Indian rupees in fiscal 2015 by approximately \$34 million. Conversely, a 5.0% appreciation of the Indian rupee against the U.S. dollar would have increased our expenses incurred and paid in rupees in fiscal 2015 by approximately \$37 million.

We have sought to reduce the effect of any Indian rupee-U.S. dollar, Chinese renminbi-Japanese yen, euro-Hungarian forint, euro-Romanian leu, and certain other local currency exchange rate fluctuations on our results of operations by purchasing forward foreign exchange contracts to cover a portion of our expected cash flows and accounts receivable. These instruments typically have maturities of zero to sixty months. We use these instruments as economic hedges and not for speculative purposes, and most of them qualify for hedge accounting under the FASB guidance on Derivatives and Hedging. Our ability to enter into derivatives that meet our planning objectives is subject to the depth and liquidity of the market for such derivatives. In addition, the laws of China and India limit the duration and amount of such arrangements. We may not be able to purchase contracts adequate to insulate us from Indian rupee-U.S. dollar and Chinese renminbi-Japanese yen foreign exchange currency risks. In addition, any such contracts may not perform adequately as hedging mechanisms. See Item 7 —“Management’s Discussion and Analysis of Financial Condition and Results of Operations—Foreign Exchange (gains) losses, net.”

Interest rate risk

Our exposure to interest rate risk arises principally from interest on our indebtedness. As of December 31, 2015, we had approximately \$798 million of indebtedness under our credit facility, comprised of a long-term loan of \$776.5 million, net of \$3.5 million of debt amortization expenses, and a revolving loan of \$21.5 million. Interest on indebtedness under our credit facility is variable based on LIBOR and we are subject to market risk from changes in interest rates. Based on our indebtedness as of December 31, 2015, a 1% change in interest rates would impact our net interest expense by \$7.8 million in 2016.

Credit risk

As of December 31, 2015, we had accounts receivable, including long-term accounts receivable, net of provisions for doubtful receivables, of \$598.5 million. Of this, \$106.5 million was owed by GE, and the balance, or \$492.0 million, was owed by Global Clients. No single Global Client owed more than 5% of our accounts receivable balance as of December 31, 2015.

Item 8. Financial Statements and Supplementary Data

The financial statements and supplementary data required by this item are listed in Item 15—"Exhibits and Financial Statement Schedules" of this Annual Report on Form 10-K.

Item 9. Changes in and Disagreements with Accountants on Accounting and Financial Disclosure

None.

Item 9A. Controls and Procedures

Evaluation of disclosure controls and procedures

Disclosure controls and procedures are the Company's controls and other procedures which are designed to ensure that information required to be disclosed by us in the reports that we file or submit under the Exchange Act is recorded, processed, summarized and reported, within the time periods specified in the SEC's rules and forms. Disclosure controls and procedures include, without limitation, controls and procedures designed to ensure that information required to be disclosed by us in the reports that we file or submit under the Exchange Act is accumulated and communicated to our management, including our Chief Executive Officer and Chief Financial Officer, as appropriate, to allow timely decisions regarding required disclosure.

As of the end of the period covered by this report, the Company carried out an evaluation, under the supervision and with the participation of the Company's management, including the Company's Chief Executive Officer along with the Company's Chief Financial Officer, of the effectiveness of the design and operation of the Company's disclosure controls and procedures pursuant to the Securities Exchange Act of 1934 ("Exchange Act") Rule 13a-15(b). Based upon that evaluation, the Company's Chief Executive Officer along with the Company's Chief Financial Officer concluded that the Company's disclosure controls and procedures are effective in timely alerting them to material information relating to the Company (including its consolidated subsidiaries) required to be included in the Company's periodic SEC filings.

Management's Report on Internal Control over Financial Reporting

Genpact's management is responsible for establishing and maintaining adequate internal control over financial reporting to provide reasonable assurance regarding the reliability of our financial reporting and the preparation of financial statements for external purposes in accordance with generally accepted accounting principles. Internal control over financial reporting includes those policies and procedures that:

- (i) pertain to the maintenance of records that in reasonable detail accurately and fairly reflect the transactions and dispositions of our assets;
- (ii) provide reasonable assurance that the transactions are recorded as necessary to permit preparation of financial statements in accordance with generally accepted accounting principles, and that our receipts and expenditures are being made only in accordance with the authorization of management and/or our Board of Directors; and
- (iii) provide reasonable assurance regarding the prevention or timely detection of any unauthorized acquisition, use or disposition of our assets that could have a material effect on our financial statements.

[Table of Contents](#)

Due to its inherent limitations, including that it relies on sample-based testing, internal control over financial reporting may not prevent or detect misstatements. Additionally, projections of any evaluation of effectiveness to future periods are subject to the risk that controls may become inadequate due to changes in conditions, or that the degree of compliance with the policies or procedures may deteriorate.

Under the supervision and with the participation of our management, including our Chief Executive Officer and Chief Financial Officer, we conducted an evaluation of the effectiveness of our internal control over financial reporting using the criteria set forth by the Committee of Sponsoring Organizations of the Treadway Commission (COSO) in Internal Control—Integrated Framework (2013). Based on its evaluation, our management concluded that our internal control over financial reporting was effective as of December 31, 2015.

During 2015, we acquired certain wealth management operations from Citibank, N.A. in the U.K. We have excluded from our assessment of the effectiveness of the Company's internal control over financial reporting as of December 31, 2015 the operations of such acquisition and the internal control over financial reporting associated with total assets of \$13,318 thousand (of which \$3,242 thousand represents goodwill and intangible assets included within the scope of the assessment) and total revenues of \$8,818 thousand included in the consolidated financial statements of the Company as of and for the year ended December 31, 2015.

KPMG, an independent registered public accounting firm, has audited the consolidated financial statements included in this Annual Report on Form 10-K and, as part of its audit, has issued an attestation report, included herein, on the effectiveness of our internal control over financial reporting. See "Report of Independent Registered Public Accounting Firm" on page F-3.

Changes in internal control over financial reporting

During 2015, we implemented a new enterprise resource planning, or ERP, system. The new ERP system was designed and implemented, in part, to enhance the overall system of internal control over financial reporting through further automation and integration of business processes and was not implemented in response to any identified deficiency or material weakness in the Company's internal control over financial reporting. This implementation was significant in scale and complexity and significantly affected certain accounting functions. Both during and after the implementation, the Company maintained its internal control design by changing detailed key controls to achieve all key financial reporting assertions. Other than the ERP implementation, there were no changes in the Company's internal control over financial reporting (as defined in Rules 13a-15(f) and 15d-15(f) under the Exchange Act) during the quarterly period ended December 31, 2015 that have materially affected, or are reasonably likely to materially affect, the Company's internal control over financial reporting.

Item 9B. Other Information

None.

PART III

Item 10. Directors, Executive Officers and Corporate Governance

Information about our executive officers is contained in the section titled "Executive Officers" in Part I of this Annual Report on Form 10-K. The other information required by this Item will be included in our Proxy Statement for the 2016 Annual General Meeting of Shareholders under the captions "Director Nominees," "Corporate Governance," and "Section 16(a) Beneficial Ownership Reporting Compliance," which will be filed with the SEC no later than 120 days after the close of the fiscal year ended December 31, 2015 and is incorporated by reference in this report.

Item 11. Executive Compensation

The information required by this Item will be included in our Proxy Statement for the 2016 Annual General Meeting of Shareholders under the caption “Information about Executive and Director Compensation,” which will be filed with the SEC no later than 120 days after the close of the fiscal year ended December 31, 2015 and is incorporated by reference in this report.

Item 12. Security Ownership of Certain Beneficial Owners and Management and Related Stockholder Matters

The information required by this Item will be included in our Proxy Statement for the 2016 Annual General Meeting of Shareholders under the captions “Security Ownership of Certain Beneficial Owners and Management” and “Securities Authorized for Issuance under Equity Compensation Plans,” which will be filed with the SEC no later than 120 days after the close of the fiscal year ended December 31, 2015 and is incorporated by reference in this report.

Item 13. Certain Relationships and Related Transactions, and Director Independence

The information required by this Item will be included in our Proxy Statement for the 2016 Annual General Meeting of Shareholders under the caption “Certain Relationships and Related Transactions,” which will be filed with the SEC no later than 120 days after the close of the fiscal year ended December 31, 2015 and is incorporated by reference in this report.

Item 14. Principal Accounting Fees and Services

The information required by this Item will be included in our Proxy Statement for the 2016 Annual General Meeting of Shareholders under the caption “Independent Registered Public Accounting Firm Fees and Other Matters,” which will be filed with the SEC no later than 120 days after the close of the fiscal year ended December 31, 2015 and is incorporated by reference in this report.

PART IV

Item 15. Exhibits and Financial Statement Schedules

(a) Documents filed as part of this Annual Report on Form 10-K:

1. Consolidated Financial Statements

The consolidated financial statements required to be filed in the Annual Report on Form 10-K are listed on page F-1 hereof. The required financial statements appear on pages F-4 through F-60 hereof.

2. Financial Statement Schedules

Separate financial statement schedules have been omitted either because they are not applicable or because the required information is included in the consolidated financial statements.

3. Exhibits

See the Exhibit Index on pages E-1 through E-4 for a list of the exhibits being filed or furnished with or incorporated by reference into this Annual Report on Form 10-K.

Report of Independent Registered Public Accounting Firm

The Board of Directors and Shareholders
Genpact Limited:

We have audited the accompanying consolidated balance sheets of Genpact Limited and subsidiaries' ("Genpact Limited" or the "Company") as of December 31, 2014 and 2015, and the related consolidated statements of income, comprehensive income (loss), equity, and cash flows for each of the years in the three-year period ended December 31, 2015. These consolidated financial statements are the responsibility of the Company's management. Our responsibility is to express an opinion on these consolidated financial statements based on our audits.

We conducted our audits in accordance with the standards of the Public Company Accounting Oversight Board (United States). Those standards require that we plan and perform the audit to obtain reasonable assurance about whether the financial statements are free of material misstatement. An audit includes examining, on a test basis, evidence supporting the amounts and disclosures in the financial statements. An audit also includes assessing the accounting principles used and significant estimates made by management, as well as evaluating the overall financial statement presentation. We believe that our audits provide a reasonable basis for our opinion.

In our opinion, the consolidated financial statements referred to above present fairly, in all material respects, the financial position of the Company as of December 31, 2014 and 2015, and the results of their operations and their cash flows for each of the years in the three-year period ended December 31, 2015, in conformity with U.S. generally accepted accounting principles.

We also have audited, in accordance with the standards of the Public Company Accounting Oversight Board (United States), the Company's internal control over financial reporting as of December 31, 2015, based on criteria established in *Internal Control – Integrated Framework (2013)* issued by the Committee of Sponsoring Organizations of the Treadway Commission (COSO), and our report dated February 26, 2016 expressed an unqualified opinion on the effectiveness of the Company's internal control over financial reporting.

February 26, 2016

Report of Independent Registered Public Accounting Firm

The Board of Directors and Shareholders
Genpact Limited:

We have audited Genpact Limited and subsidiaries' ("Genpact Limited" or the "Company") internal control over financial reporting as of December 31, 2015, based on criteria established in *Internal Control – Integrated Framework (2013)* issued by the Committee of Sponsoring Organizations of the Treadway Commission (COSO). The Company's management is responsible for maintaining effective internal control over financial reporting and for its assessment of the effectiveness of internal control over financial reporting, included in the accompanying *Management's Report on Internal Control Over Financial Reporting*. Our responsibility is to express an opinion on the Company's internal control over financial reporting based on our audit.

We conducted our audit in accordance with the standards of the Public Company Accounting Oversight Board (United States). Those standards require that we plan and perform the audit to obtain reasonable assurance about whether effective internal control over financial reporting was maintained in all material respects. Our audit included obtaining an understanding of internal control over financial reporting, assessing the risk that a material weakness exists, and testing and evaluating the design and operating effectiveness of internal control based on the assessed risk. Our audit also included performing such other procedures as we considered necessary in the circumstances. We believe that our audit provides a reasonable basis for our opinion.

A company's internal control over financial reporting is a process designed to provide reasonable assurance regarding the reliability of financial reporting and the preparation of financial statements for external purposes in accordance with generally accepted accounting principles. A company's internal control over financial reporting includes those policies and procedures that (1) pertain to the maintenance of records that, in reasonable detail, accurately and fairly reflect the transactions and dispositions of the assets of the company; (2) provide reasonable assurance that transactions are recorded as necessary to permit preparation of financial statements in accordance with generally accepted accounting principles, and that receipts and expenditures of the company are being made only in accordance with authorizations of management and directors of the company; and (3) provide reasonable assurance regarding prevention or timely detection of unauthorized acquisition, use, or disposition of the company's assets that could have a material effect on the financial statements.

Because of its inherent limitations, internal control over financial reporting may not prevent or detect misstatements. Also, projections of any evaluation of effectiveness to future periods are subject to the risk that controls may become inadequate because of changes in conditions, or that the degree of compliance with the policies or procedures may deteriorate.

In our opinion, the Company maintained, in all material respects, effective internal control over financial reporting as of December 31, 2015, based on criteria established in *Internal Control – Integrated Framework (2013)* issued by the Committee of Sponsoring Organizations of the Treadway Commission (COSO).

The Company acquired certain wealth management operations from Citibank, N.A. in the United Kingdom and management excluded from its assessment of the effectiveness of the Company's internal control over financial reporting as of December 31, 2015, certain wealth management operations acquired from Citibank, N.A. in the United Kingdom's internal control over financial reporting associated with total assets of \$13,318 thousands (of which \$3,242 thousands represent goodwill and intangible assets included within the scope of the assessment) and total revenues of \$8,818 thousands included in the consolidated financial statements of the Company as of and for the year ended December 31, 2015. Our audit of internal control over financial reporting of the Company also excluded an evaluation of the internal control over financial reporting of certain wealth management operations acquired from Citibank, N.A. in the United Kingdom.

We also have audited, in accordance with the standards of the Public Company Accounting Oversight Board (United States), the consolidated balance sheets of the Company as of December 31, 2014 and 2015, and the related consolidated statements of operations, comprehensive income (loss), equity, and cash flows for each of the years in the three-year period ended December 31, 2015, and our report dated February 26, 2016 expressed an unqualified opinion on those consolidated financial statements.

GENPACT LIMITED AND ITS SUBSIDIARIES
Notes to the Consolidated Financial Statements
(In thousands, except per share data and share count)

1. Organization

(a) Nature of Operations

The Company is a provider of digitally-powered business process outsourcing and services. The architect of the Lean DigitalSM enterprise, the Company uses its patented Smart Enterprise Processes (SEPSM) framework to reimagine its clients' operating models end-to-end, including their middle and back offices. This creates Intelligent OperationsSM that the Company helps to design, transform, and run. Today, the Company generates impact for a few hundred strategic clients, including approximately one fifth of the Fortune Global 500, and has grown to over 70,000 people in 25 countries.

(b) Organization

Prior to December 30, 2004, the business of the Company was conducted through various entities and divisions of GE. On December 30, 2004, in a series of transactions referred to as the "2004 Reorganization," GE transferred such operations to the Company. In August 2007, the Company completed an initial public offering of its common shares. On October 25, 2012, Glory Investments A Limited, formerly known as South Asia Private Investments, an affiliate of Bain Capital Investors, LLC ("Bain Capital"), became the Company's largest shareholder when, together with its affiliated assignees and two additional co-investors, it purchased 67,750,678 common shares of the Company from the Company's initial private equity investors.

2. Summary of significant accounting policies

(a) Basis of preparation and principles of consolidation

The accompanying consolidated financial statements have been prepared in accordance with U.S. generally accepted accounting principles (U.S. GAAP).

The accompanying financial statements have been prepared on a consolidated basis and reflect the financial statements of Genpact Limited, a Bermuda company, and all of its subsidiaries that are more than 50% owned and controlled. When the Company does not have a controlling interest in an entity but exerts significant influence on the entity, the Company applies the equity method of accounting. All intercompany transactions and balances are eliminated in consolidation.

The non-controlling interest disclosed in the accompanying consolidated financial statements represents the non-controlling partners' interest in the operation of Genpact Netherlands B.V., the non-controlling shareholders' interest in the operation of Hello Communications (Shanghai) Co., Ltd. and the profits or losses associated with the non-controlling interest in such operations. The non-controlling partners of Genpact Netherlands B.V. are individually liable for the tax obligations on their shares of profit as it is a partnership. Accordingly, non-controlling interest relating to Genpact Netherlands B.V. has been computed prior to tax and disclosed accordingly in the Consolidated Statements of Income. During the year ended December 31, 2013, the Company completed the divestiture of Hello Communications (Shanghai) Co., Ltd. During the year ended December 31, 2014, the Company purchased the non-controlling interest in Genpact Netherlands B.V., resulting in the Company's 100% control of the partnership.

(b) Use of estimates

The preparation of consolidated financial statements in accordance with U.S. GAAP requires management to make estimates and assumptions that affect the amounts reported in the consolidated financial statements.

GENPACT LIMITED AND ITS SUBSIDIARIES
Notes to the Consolidated Financial Statements
(In thousands, except per share data and share count)

2. Summary of significant accounting policies (Continued)

Significant items subject to such estimates and assumptions include the useful lives of property, plant and equipment, intangibles and goodwill, revenue recognition, reserves for doubtful receivables, valuation allowances for deferred tax assets, the valuation of derivative financial instruments, measurements of stock-based compensation, assets and obligations related to employee benefits, and income tax uncertainties and other contingencies. Management believes that the estimates used in the preparation of the consolidated financial statements are reasonable. Although these estimates are based upon management's best knowledge of current events and actions, actual results could differ from these estimates. Any changes in estimates are adjusted prospectively in the Company's consolidated financial statements.

(c) Revenue recognition

The Company derives its revenue primarily from business process outsourcing and information technology management services, which are provided on a time-and-material, transaction or fixed-price basis. The Company recognizes revenue when persuasive evidence of an arrangement exists, the sales price is fixed or determinable, services have been rendered and collectability is reasonably assured. Revenues from services rendered under time-and-materials and transaction-based contracts are recognized as the services are provided. The Company's fixed-price contracts include contracts for application development, maintenance and support services. Revenues on these contracts are recognized ratably over the term of the agreement. The Company accrues for revenue and unbilled receivables for the services rendered between the last billing date and the balance sheet date.

Customer contracts can also include incentive payments received for discrete benefits delivered to clients. Revenues relating to such incentive payments are recorded when the contingency is satisfied and the Company concludes the amounts are earned.

Revenue with respect to fixed-price contracts for the development of software and related services is recognized in accordance with the percentage-of-completion method. Guidance has been drawn from Financial Accounting Standards Board ("FASB") guidance on Software—Revenue Recognition to account for revenue from fixed-price arrangements for software development and related services in conformity with FASB guidance on Revenue Recognition—Construction—Type and Production-Type Contracts. The input (effort or cost expended) method has been used to measure progress towards completion as there is a direct relationship between input and productivity. Provisions for estimated losses, if any, on uncompleted contracts are recorded in the period in which such losses become probable based on the current contract estimates.

The Company has deferred the revenue and costs attributable to certain process transition activities with respect to its customers where such activities do not represent the culmination of a separate earnings process. Such revenue and costs are subsequently recognized ratably over the period in which the related services are performed. Further, the deferred costs are limited to the amount of the deferred revenues.

Revenues are reported net of value-added tax, business tax and applicable discounts and allowances. Reimbursements of out-of-pocket expenses received from clients have been included as part of revenues.

The Company enters into multiple-element revenue arrangements in which a client may purchase a combination of its services. Revenue from multiple-element arrangements is recognized, for each element, based on (1) the attainment of the delivery criterion; (2) its fair value, which is determined using the selling price hierarchy of vendor-specific objective evidence ("VSOE") of fair value, third-party evidence or best estimated selling price, as applicable, and (3) its allocated selling price, which is based on the relative sales price method.

GENPACT LIMITED AND ITS SUBSIDIARIES
Notes to the Consolidated Financial Statements
(In thousands, except per share data and share count)

2. Summary of significant accounting policies (Continued)

(d) Accounts receivable

Accounts receivable are recorded at the invoiced or to be invoiced amount and do not bear interest. Amounts collected on trade accounts receivable are included in net cash provided by operating activities in the Consolidated Statements of Cash Flows. The Company maintains an allowance for doubtful accounts for estimated losses inherent in its accounts receivable portfolio. In establishing the required allowance, management considers historical losses adjusted to take into account current market conditions and its clients' financial condition, the amount of receivables in dispute, and the current receivables' aging and current payment patterns. Account balances are charged off against the allowance after all means of collection have been exhausted and the potential for recovery is considered remote. The Company does not have any off-balance-sheet credit exposure related to its clients.

(e) Cash and cash equivalents

Cash and cash equivalents consist of cash and bank balances and all highly liquid investments purchased with an original maturity of three months or less.

(f) Short-term investments

All liquid investments with an original maturity greater than 90 days but less than one year are considered to be short-term investments. Marketable short-term investments are classified and accounted for as available-for-sale investments. Available-for-sale investments are reported at fair value with changes in unrealized gains and losses recorded as a separate component of other comprehensive income (loss) until realized. Realized gains and losses on investments are determined based on the specific identification method and are included in "Other income (expense), net." The Company does not hold these investments for speculative or trading purposes.

(g) Property, plant and equipment, net

Property, plant and equipment are stated at cost less accumulated depreciation and amortization. Expenditures for replacements and improvements are capitalized, whereas the costs of maintenance and repairs are charged to earnings as incurred. The Company depreciates and amortizes all property, plant and equipment using the straight-line method over the following estimated economic useful lives of the assets:

	Years
Buildings	40
Furniture and fixtures	4
Computer equipment and servers	4
Plant, machinery and equipment	4
Computer software	4
Leasehold improvements	Lesser of lease period or 10 years
Vehicles	3-4

The Company capitalizes certain computer software and software development costs incurred in connection with developing or obtaining computer software for internal use when both the preliminary project stage is completed and it is probable that the software will be used as intended. Capitalized software costs include only

GENPACT LIMITED AND ITS SUBSIDIARIES
Notes to the Consolidated Financial Statements
(In thousands, except per share data and share count)

2. Summary of significant accounting policies (Continued)

(i) external direct costs of materials and services utilized in developing or obtaining computer software, (ii) compensation and related benefits for employees who are directly associated with the software project, and (iii) interest costs incurred while developing internal-use computer software. Capitalized software costs are included in property, plant and equipment on the Company's balance sheet and amortized on a straight-line basis when placed into service over the estimated useful lives of the software. The useful life of certain enterprise resource planning software implemented during the year ended December 31, 2015 is estimated to be 7 years.

Advances paid towards the acquisition of property, plant and equipment outstanding as of each balance sheet date and the cost of property, plant and equipment not put to use before such date are disclosed under "Capital work in progress."

(h) Research and development expense

Development costs incurred for software to be sold, if any, are expensed as incurred as research and development costs until technological feasibility has been established for the product. Technological feasibility is established upon completion of a detailed design program or, in its absence, completion of a working model. Thereafter, all software production costs will be capitalized and amortized over their useful lives and reported at the lower of unamortized cost and net realizable value.

(i) Business combinations, goodwill and other intangible assets

The Company accounts for its business combinations using the acquisition method of accounting in accordance with ASC 805, Business Combinations, by recognizing the identifiable tangible and intangible assets acquired and liabilities assumed, and any non-controlling interest in the acquired business, measured at their acquisition date fair values. Contingent consideration is included within the acquisition cost and is recognized at its fair value on the acquisition date. A liability resulting from contingent consideration is remeasured to fair value as of each reporting date until the contingency is resolved. Changes in fair value are recognized in earnings. All assets and liabilities of the acquired businesses, including goodwill, are assigned to reporting units. Acquisition-related costs are expensed as incurred under Selling, General and Administrative Expenses.

Goodwill represents the cost of acquired businesses in excess of the fair value of identifiable tangible and intangible net assets purchased. Goodwill is not amortized but is tested for impairment at least on an annual basis on December 31, based on a number of factors, including operating results, business plans and future cash flows. The Company performs an assessment of qualitative factors to determine whether the existence of events or circumstances leads to a determination that it is more likely than not that the fair value of a reporting unit is less than its carrying amount. Based on the assessment of events or circumstances, the Company performs a quantitative assessment of goodwill impairment if it determines that it is more likely than not that the fair value of a reporting unit is less than its carrying amount. If, based on the quantitative impairment analysis, the carrying value of the goodwill of a reporting unit exceeds the fair value of such goodwill, an impairment loss is recognized in an amount equal to the excess. In addition, the Company performs a qualitative assessment of goodwill impairment between annual tests if an event occurs or circumstances change that would more likely than not reduce the fair value of a reporting unit below its carrying amount. See Note 10 for information and related disclosures.

GENPACT LIMITED AND ITS SUBSIDIARIES
Notes to the Consolidated Financial Statements
(In thousands, except per share data and share count)

2. Summary of significant accounting policies (Continued)

Intangible assets acquired individually or with a group of other assets or in a business combination are carried at cost less accumulated amortization based on their estimated useful lives as follows:

Customer-related intangible assets	1-14 years
Marketing-related intangible assets	1-10 years
Other intangible assets	3-9 years

Intangible assets are amortized over their estimated useful lives using a method of amortization that reflects the pattern in which the economic benefits of the intangible assets are consumed or otherwise realized.

In business combinations, where the fair value of identifiable tangible and intangible net assets purchased exceeds the cost of the acquired business, the Company recognizes the resulting gain under “Other operating (income) expense, net” in the Consolidated Statements of Income.

(j) Impairment of long-lived assets

Long-lived assets, including certain intangible assets, to be held and used are reviewed for impairment whenever events or changes in circumstances indicate that the carrying amount of such assets may not be recoverable. Such assets are required to be tested for impairment if the carrying amount of the assets is higher than the future undiscounted net cash flows expected to be generated from the assets. The impairment amount to be recognized is measured as the amount by which the carrying value of the assets exceeds their fair value. The Company determines fair value by using a discounted cash flow approach.

(k) Foreign currency

The Company’s consolidated financial statements are reported in U.S. dollars, the Company’s functional currency. The functional currency for the Company’s subsidiaries organized in Europe, other than the U.K., the Czech Republic and one subsidiary in Poland, is the euro, and the functional currencies of the Company’s subsidiaries organized in Brazil, China, Colombia, Guatemala, India, Japan, Morocco, South Africa, the Philippines, the U.K., Poland, the Czech Republic, Hong Kong, Singapore, Australia, Canada and United Arab Emirates are their respective local currencies. The functional currency of all other Company subsidiaries is the U.S. dollar. The translation of the functional currencies of the Company’s subsidiaries into U.S. dollars is performed for balance sheet accounts using the exchange rates in effect as of the balance sheet date and for revenues and expense accounts using a monthly average exchange rate prevailing during the respective period. The gains or losses resulting from such translation are reported as currency translation adjustments under other comprehensive income (loss), net, under accumulated other comprehensive income (loss) as a separate component of equity.

Monetary assets and liabilities of each subsidiary denominated in currencies other than the subsidiary’s functional currency are translated into their respective functional currency at the rates of exchange prevailing on the balance sheet date. Transactions of each subsidiary in currencies other than the subsidiary’s functional currency are translated into the respective functional currencies at the average monthly exchange rate prevailing during the period of the transaction. The gains or losses resulting from foreign currency transactions are included in the consolidated statements of income.

GENPACT LIMITED AND ITS SUBSIDIARIES
Notes to the Consolidated Financial Statements
(In thousands, except per share data and share count)

2. Summary of significant accounting policies (Continued)

(l) Derivative instruments and hedging activities

In the normal course of business, the Company uses derivative financial instruments to manage fluctuations in foreign currency exchange rates. The Company purchases forward foreign exchange contracts to mitigate the risk of changes in foreign exchange rates on intercompany transactions and forecasted transactions denominated in foreign currencies.

The Company recognizes derivative instruments and hedging activities as either assets or liabilities in its consolidated balance sheets and measures them at fair value. Gains and losses resulting from changes in fair value are accounted for depending on the use of the derivative and whether it is designated and qualifies for hedge accounting. Changes in the fair values of derivatives designated as cash flow hedges are deferred and recorded as a component of other comprehensive income (loss) reported under accumulated other comprehensive income (loss) until the hedged transactions occur and are then recognized in the consolidated statements of income along with the underlying hedged item and disclosed as part of "Total net revenues," "Cost of revenue," and "Selling, general and administrative expenses," as applicable. Changes in the fair value of derivatives not designated as hedging instruments, and the ineffective portion of derivatives designated as cash flow hedges are recognized in the consolidated statements of income and are included in foreign exchange (gains) losses, net, and other income (expense), net, respectively.

With respect to derivatives designated as hedges, the Company formally documents all relationships between hedging instruments and hedged items, as well as its risk management objectives and strategy for undertaking various hedge transactions. The Company also formally assesses, both at the inception of the hedge and on a quarterly basis, whether each derivative is highly effective in offsetting changes in fair values or cash flows of the hedged item. If it is determined that a derivative or portion thereof is not highly effective as a hedge, or if a derivative ceases to be a highly effective hedge, the Company will prospectively discontinue hedge accounting with respect to that derivative.

In all situations in which hedge accounting is discontinued and the derivative is retained, the Company continues to carry the derivative at its fair value on the balance sheet and recognizes any subsequent change in its fair value in the consolidated statements of income. When it is probable that a forecasted transaction will not occur, the Company discontinues hedge accounting and recognizes immediately, in foreign exchange (gains) losses, net in the consolidated statements of income, the gains and losses attributable to such derivative that were accumulated in other comprehensive income (loss).

(m) Income taxes

The Company accounts for income taxes using the asset and liability method of accounting for income taxes. Under this method, income tax expense is recognized for the amount of taxes payable or refundable for the current year. In addition, deferred tax assets and liabilities are recognized for future tax consequences attributable to differences between the financial statement carrying amounts of existing assets and liabilities and their tax bases and all operating loss carry forwards, if any. Deferred tax assets and liabilities are measured using enacted tax rates expected to apply to taxable income in the years in which those temporary differences are expected to be recovered or settled. The effect on deferred tax assets and liabilities of a change in tax rates or tax status is recognized in the statement of income in the period that includes the enactment date or the filing or approval date of the tax status change. Deferred tax assets are reduced by a valuation allowance if, based on the weight of available evidence, it is more likely than not that some portion or all of the deferred tax assets will not be realized.

GENPACT LIMITED AND ITS SUBSIDIARIES
Notes to the Consolidated Financial Statements
(In thousands, except per share data and share count)

2. Summary of significant accounting policies (Continued)

The Company applies a two-step approach for recognizing and measuring uncertain tax positions. The first step is to evaluate the tax position for recognition by determining, based on the technical merits, that the position will more likely than not be sustained upon examination. The second step is to measure the tax benefit as the largest amount of the tax benefit that is greater than 50% likely of being realized upon settlement. The Company includes interest and penalties related to unrecognized tax benefits within its provision for income tax expense.

(n) Employee Benefit Plan

Contributions to defined contribution plans are charged to consolidated statements of income in the period in which services are rendered by the covered employees. Current service costs for defined benefit plans are accrued in the period to which they relate. The liability in respect of defined benefit plans is calculated annually by the Company using the projected unit credit method. Prior service cost, if any, resulting from an amendment to a plan is recognized and amortized over the remaining period of service of the covered employees. The Company recognizes its liabilities for compensated absences dependent on whether the obligation is attributable to employee services already rendered, relates to rights that vest or accumulate and payment is probable and estimable.

The Company records annual amounts relating to its defined benefit plans based on calculations that incorporate various actuarial and other assumptions, including discount rates, mortality, assumed rates of return, compensation increases and turnover rates. The Company reviews its assumptions on an annual basis and makes modifications to the assumptions based on current rates and trends when it is appropriate to do so. The effect of modifications to those assumptions is recorded in other comprehensive income (loss) and amortized to net periodic cost over future periods using the corridor method. The Company believes that the assumptions utilized in recording its obligations under its plans are reasonable based on its experience and market conditions.

(o) Stock-based compensation

The Company recognizes and measures compensation expense for all stock-based awards based on the grant date fair value. For option awards, grant date fair value is determined under the option-pricing model (Black-Scholes-Merton) and for awards other than option awards, grant date fair value is determined on the basis of the fair market value of a Company common share on the date of grant of such awards. The Company recognizes compensation expense for stock-based awards net of estimated forfeitures. Stock-based compensation recognized in the consolidated statements of income for the years ended December 31, 2013, 2014 and 2015 is based on awards ultimately expected to vest. As a result, the expense has been reduced for estimated forfeitures. Forfeitures are estimated at the time of grant and revised, if necessary, in subsequent periods if actual forfeitures differ from such estimates.

(p) Financial instruments and concentration of credit risk

Financial instruments that potentially subject the Company to concentration of credit risk are reflected principally in cash and cash equivalents, derivative financial instruments and accounts receivable. The Company places its cash and cash equivalents and derivative financial instruments with corporations and banks with high investment grade ratings, limits the amount of credit exposure with any one corporation or bank and conducts ongoing evaluations of the creditworthiness of the corporations and banks with which it does business. To reduce its credit risk on accounts receivable, the Company conducts ongoing credit evaluations of its clients. GE

GENPACT LIMITED AND ITS SUBSIDIARIES
Notes to the Consolidated Financial Statements
(In thousands, except per share data and share count)

2. Summary of significant accounting policies (Continued)

accounted for 25% and 18% of the Company's receivables as of December 31, 2014 and 2015, respectively. GE accounted for 23%, 20% and 19% of the Company's revenues in the years ended December 31, 2013, 2014 and 2015, respectively.

(q) Earnings (loss) per share

Basic earnings per share is computed using the weighted average number of common shares outstanding during the period. Diluted earnings per share is computed using the weighted average number of common and dilutive common equivalent shares outstanding during the period. For the purposes of calculating diluted earnings per share, the treasury stock method is used for stock-based awards except where the results would be anti-dilutive.

(r) Commitments and contingencies

Liabilities for loss contingencies arising from claims, assessments, litigation, fines and penalties, and other sources are recorded when it is probable that a liability has been incurred and the amount of the assessment and/or remediation can be reasonably estimated. Legal costs incurred in connection with such liabilities are expensed as incurred.

(s) Recently adopted accounting pronouncements

The following recently released accounting standard has been adopted by the Company and did not have a material impact on the Company's consolidated results of operations, cash flows, financial position or disclosures:

Effective October 1, 2015, the Company has adopted FASB ASU 2015-17 Income Taxes (Topic 740): Balance Sheet Classification of Deferred Taxes ("ASU 2015-17"). The new guidance requires that all deferred tax assets and liabilities, along with any related valuation allowance, be classified as noncurrent on the balance sheet. The guidance however does not change the existing guidance that prohibits offsetting deferred tax liabilities from one jurisdiction against deferred tax assets of another jurisdiction. The Company has applied the new guidance prospectively for all deferred tax assets and liabilities and accordingly, the comparative balance sheet amounts of prior periods were not retrospectively reclassified.

(t) Reclassification

Certain reclassifications have been made in the consolidated financial statements of prior periods to conform to the classification used in the current period. The impact of such reclassifications on the consolidated financial statements is not material.

3. Business acquisitions

(a) Acquisition of wealth management business in the U.K.

On August 18, 2015, the Company acquired certain assets and assumed certain liabilities from Citibank, N.A. comprising a portion of its U.K. wealth management operations for cash consideration of \$3,418, which

GENPACT LIMITED AND ITS SUBSIDIARIES
Notes to the Consolidated Financial Statements
(In thousands, except per share data and share count)

3. Business acquisitions (Continued)

amount was adjusted to account for certain employee-related liabilities. Together with the asset purchase, the Company hired certain U.K.-based employees of the seller. With this transaction, the Company has expanded upon its end-to-end, technology-enabled wealth management service offering acquired from Citibank, N.A. in January 2015, described below.

In connection with the transaction, the Company recorded \$2,200 in customer-related intangible assets, which have a weighted average amortization period of eight years and against which a deferred tax liability of \$440 has been recorded. Goodwill arising from the acquisition amounted to \$1,209, which has been allocated to the Company's India reporting unit and is not deductible for tax purposes. In connection with the transaction the Company also acquired property, plant and equipment with a value of \$1,059 and assumed certain employee-related liabilities amounting to \$610. The results of operations of the acquired business and the fair value of the acquired assets and assumed liabilities are included in the Company's Consolidated Financial Statements with effect from August 18, 2015, the date of the acquisition.

(b) Acquisition of delivery center in Slovakia

On April 1, 2015, the Company acquired certain assets and assumed certain liabilities of a finance-and-accounting service delivery center in Bratislava, Slovakia, for cash consideration of \$6,100. As part of the transaction, the Company hired certain employees of the seller. There are no contingent consideration arrangements in connection with the acquisition. This acquisition strengthens the Company's finance-and-accounting services domain expertise in the consumer product goods industry and adds incremental European language capacity.

In connection with the transaction, the Company recorded \$3,000 in customer-related intangible assets, which have an amortization period of five years. Goodwill arising from the acquisition amounted to \$3,065, which has been allocated to the Company's European reporting unit and is deductible for tax purposes. The results of operations of the acquired business and the fair value of the acquired assets and assumed liabilities are included in the Company's Consolidated Financial Statements with effect from April 1, 2015, the date of the acquisition.

(c) Acquisition of wealth management business in the U.S.

On January 16, 2015, the Company acquired certain assets and assumed certain liabilities from Citibank, N.A. comprising a portion of its U.S. wealth management operations for cash consideration of \$11,678. Together with its asset purchase, the Company hired certain employees of the seller's U.S. wealth management business. With this transaction, the Company has acquired an end-to-end, technology-enabled wealth management service offering.

In connection with the transaction, the Company recorded \$9,100 in customer-related intangible assets, which have a weighted average amortization period of five years. Goodwill arising from the acquisition amounted to \$3,400, which has been allocated to the Company's India reporting unit and is deductible for tax purposes. The Company also assumed a pre-existing liability of the seller amounting to \$822 in connection with the acquisition.

Acquisition-related costs of \$798 have been included in selling, general and administrative expenses as incurred. The results of operations of the acquired business and the fair value of the acquired assets and assumed liabilities are included in the Company's Consolidated Financial Statements with effect from January 16, 2015, the date of the acquisition.

GENPACT LIMITED AND ITS SUBSIDIARIES
Notes to the Consolidated Financial Statements

3. Business acquisitions (Continued)*(d) Acquisition of delivery center in Japan*

On November 4, 2014, the Company acquired from Hitachi Management Partner, Corp. a finance-and-accounting service delivery center in Japan. In connection with the acquisition, the Company entered into a five-year business process outsourcing agreement with Hitachi Ltd. The purchase consideration for the acquisition is set forth below:

Cash consideration after adjustment for pension underfunding and closing net assets value	\$10,539
Fair value of contingent earn-out consideration (ranging from \$0 to \$15,750)	11,198
Total estimated purchase consideration	\$21,737

The contingent earn-out consideration for this acquisition is based on additional work contracted by the delivery center for the period from November 4, 2014 to November 4, 2021. The total consideration paid by the Company at the closing of the transaction was \$7,108, net of cash acquired of \$3,491. With this acquisition, the Company has expanded its presence in Japan and strengthened its finance-and-accounting service offering.

During the quarter ended December 31, 2015, the Company recorded a measurement period adjustment that resulted in a \$96 increase in pension assets and the recognition of a current asset with a value of \$147 with a corresponding impact on goodwill. The measurement period adjustments did not have a significant impact on the Company's Consolidated Statements of Income, Balance Sheets or Cash Flows in any period and were accordingly recorded during the period ended December 31, 2015.

In connection with the transaction, the Company recorded \$7,522 in customer-related intangible assets, which have a weighted average amortization period of seven years and against which a deferred tax liability of \$2,496 was recorded. Goodwill arising from the acquisition, including measurement period adjustments, amounted to \$16,791, which has been allocated to the China reporting unit and is non-deductible for tax purposes as the Company has not recorded any tax benefit for amortization. In connection with the transaction, the Company also assumed net liabilities amounting to \$80, including measurement period adjustments. The results of operations of the delivery center and the fair value of its assets and liabilities are included in the Company's Consolidated Financial Statements with effect from November 4, 2014, the date of the acquisition.

Acquisition-related costs of \$796 have been included in selling, general and administrative expenses as incurred.

(e) Pharmalink Consulting Limited and Pharmalink Consulting Inc.

On May 29, 2014, the Company acquired 100% of the outstanding equity interest in each of Pharmalink Consulting Limited, a company incorporated under the laws of England and Wales, and Pharmalink Consulting Inc., a California corporation (collectively referred to as "Pharmalink"). The purchase consideration for the acquisition is set forth below:

Cash consideration after adjustment for net debt and working capital	\$126,069
Fair value of contingent earn-out consideration (ranging from \$0 to \$27,405)	12,730
Total estimated purchase consideration	\$138,799

GENPACT LIMITED AND ITS SUBSIDIARIES
Notes to the Consolidated Financial Statements
(In thousands, except per share data and share count)

3. Business acquisitions (Continued)

The contingent earn-out consideration is based on gross profits and order bookings of sustainable outsourcing contracts for the period from June 1, 2014 to June 30, 2016. The total consideration paid at closing for the Company's acquisition of Pharmalink was \$123,701, net of cash acquired of \$2,200. Pharmalink is a provider of regulatory affairs services to the life sciences industry. With this acquisition, the Company added regulatory consulting, outsourcing and operations capabilities for clients in the life sciences industry.

During the quarter ended December 31, 2014, the Company recorded a measurement period adjustment that resulted in a non-current liability of \$585 and a corresponding indemnification asset with no impact on goodwill. During the quarter ended June 30, 2015, the Company recorded a measurement period adjustment that resulted in a \$168 increase in the purchase consideration, with a corresponding increase in goodwill. These measurement period adjustments did not have a significant impact on the Company's Consolidated Statements of Income, Balance Sheets or Cash Flows in any period and were accordingly recorded during the quarters ended December 31, 2014 and June 30, 2015, respectively.

The following table summarizes the allocation of the estimated purchase price based on the fair value of the assets acquired and the liabilities assumed as of the date of acquisition including measurement period adjustments:

Purchase price	\$138,799
Acquisition-related costs included in selling, general and administrative expenses as incurred	1,977
Recognized amounts of identifiable assets acquired and liabilities assumed	
Net assets acquired	7,174
Intangible assets	29,923
Deferred tax asset (liability), net	(8,419)
Total identifiable net assets acquired	\$ 28,678
Goodwill	110,121
Total	\$138,799

Goodwill has been allocated to the India reporting unit and is not deductible for tax purposes. The intangible assets consist of customer-related and marketing-related intangible assets with a weighted average amortization period of six years.

The results of operations of Pharmalink and the fair value of its assets and liabilities are included in the Company's Consolidated Financial Statements with effect from May 29, 2014, the date of the acquisition.

4. Cash and cash equivalents

Cash and cash equivalents as of December 31, 2014 and 2015 are comprised of:

	As of December 31,	
	2014	2015
Deposits with banks	\$ 130,610	\$231,367
Other cash and bank balances	331,178	219,540
Total	\$461,788	\$450,907

GENPACT LIMITED AND ITS SUBSIDIARIES
Notes to the Consolidated Financial Statements
(In thousands, except per share data and share count)

5. Accounts receivable, net of reserve for doubtful receivables

The following table provides details of the Company's reserve for doubtful receivables:

	Year ended December 31,		
	2013	2014	2015
Opening Balance as of January 1	\$9,073	\$16,560	\$15,192
Additions due to acquisitions	—	178	—
Additions charged to cost and expense	11,420	3,107	2,449
Deductions	(3,933)	(4,653)	(6,111)
Closing Balance	<u>\$16,560</u>	<u>\$15,192</u>	<u>\$11,530</u>

Accounts receivable were \$540,946 and \$601,667, and the reserves for doubtful receivables were \$15,192 and \$11,530, resulting in net accounts receivable balances of \$525,754 and \$590,137 as of December 31, 2014 and 2015, respectively. In addition, accounts receivable due after one year of \$11,635 and \$8,348 as of December 31, 2014 and 2015, respectively, are included under other assets in the Consolidated Balance Sheets.

Accounts receivable from related parties were \$5,840 and \$1,980 as of December 31, 2014 and 2015, respectively. There are no reserves for doubtful receivables in respect of amounts due from related parties.

6. Fair Value Measurements

The Company measures certain financial assets and liabilities, including derivative instruments, at fair value on a recurring basis. The fair value measurements of these derivative instruments were determined using the following inputs as of December 31, 2014 and 2015:

	As of December 31, 2014			
	Fair Value Measurements at Reporting Date Using			
	Total	Quoted Prices in Active Markets for Identical Assets	Significant Other Observable Inputs	Significant Other Unobservable Inputs
		(Level 1)	(Level 2)	(Level 3)
Assets				
Derivative instruments (Note a)	\$ 33,967	\$ —	\$ 33,967	\$ —
Total	<u>\$ 33,967</u>	<u>\$ —</u>	<u>\$ 33,967</u>	<u>\$ —</u>
Liabilities				
Derivative instruments (Note b)	\$101,516	\$ —	\$ 101,516	\$ —
Total	<u>\$101,516</u>	<u>\$ —</u>	<u>\$ 101,516</u>	<u>\$ —</u>

GENPACT LIMITED AND ITS SUBSIDIARIES
Notes to the Consolidated Financial Statements

6. Fair Value Measurements (Continued)

	As of December 31, 2015			
	Fair Value Measurements at Reporting Date Using			
	Total	Quoted Prices in Active Markets for Identical Assets (Level 1)	Significant Other Observable Inputs (Level 2)	Significant Other Unobservable Inputs (Level 3)
Assets				
Derivative instruments (Note a)	\$30,380	\$ —	\$ 30,380	\$ —
Total	\$30,380	\$ —	\$ 30,380	\$ —
Liabilities				
Derivative instruments (Note b)	\$59,620	\$ —	\$ 59,620	\$ —
Total	\$59,620	\$ —	\$ 59,620	\$ —

(a) Included in prepaid expenses and other current assets and other assets in the consolidated balance sheets.

(b) Included in accrued expenses and other current liabilities and other liabilities in the consolidated balance sheets.

The Company values its derivative instruments based on market observable inputs, including both forward and spot prices for the relevant currencies. The quotes are taken from an independent market database.

7. Derivative financial instruments

The Company is exposed to the risk of rate fluctuations on foreign currency assets and liabilities and on foreign currency denominated forecasted cash flows. The Company has established risk management policies, including the use of derivative financial instruments to hedge foreign currency assets and liabilities and foreign currency denominated forecasted cash flows. These derivative financial instruments are largely deliverable and non-deliverable forward foreign exchange contracts. The Company enters into these contracts with counterparties that are banks or other financial institutions, and the Company considers the risk of non-performance by such counterparties not to be material. The forward foreign exchange contracts mature between 0 and 60 months and the forecasted transactions are expected to occur during the same period.

Notes to the Consolidated Financial Statements
(In thousands, except per share data and share count)

7. Derivative financial instruments (Continued)

The following table presents the aggregate notional principal amounts of outstanding derivative financial instruments together with the related balance sheet exposure:

	Notional principal amounts (note a)		Balance sheet exposure asset (liability) (note b)	
	As of December 31, 2014	As of December 31, 2015	As of December 31, 2014	As of December 31, 2015
Foreign exchange forward contracts denominated in:				
United States dollars (sell) Indian rupees (buy)	\$1,282,800	\$1,139,400	\$ (86,913)	\$ (48,197)
United States dollars (sell) Mexican peso (buy)	5,640	8,520	(514)	(1,163)
United States dollars (sell) Philippines peso (buy)	72,900	58,500	(738)	(1,387)
Euro (sell) United States dollars (buy)	98,903	146,719	5,458	9,109
Euro (sell) Romanian leu (buy)	81,072	39,027	562	567
Japanese yen (sell) Chinese renminbi (buy)	28,586	62,740	2,766	(1,379)
Pound sterling (sell) United States dollars (buy)	133,435	118,438	4,278	7,496
Australian dollars (sell) United States dollars (buy)	104,362	106,544	7,552	5,714
			<u>\$ (67,549)</u>	<u>\$ (29,240)</u>

- (a) Notional amounts are key elements of derivative financial instrument agreements but do not represent the amount exchanged by counterparties and do not measure the Company's exposure to credit or market risks. However, the amounts exchanged are based on the notional amounts and other provisions of the underlying derivative financial instrument agreements.
- (b) Balance sheet exposure is denominated in U.S. dollars and denotes the mark-to-market impact of the derivative financial instruments on the reporting date.

FASB guidance on Derivatives and Hedging requires companies to recognize all derivative instruments as either assets or liabilities at fair value in the Balance Sheet. In accordance with the FASB guidance on Derivatives and Hedging, the Company designates foreign exchange forward contracts as cash flow hedges for forecasted revenues and the purchase of services. In addition to this program, the Company uses derivative instruments that are not accounted for as hedges under the FASB guidance in order to hedge foreign exchange risks related to balance sheet items such as receivables and intercompany borrowings denominated in currencies other than the Company's underlying functional currency.

The fair value of the Company's derivative instruments and their location in the Company's financial statements are summarized in the table below:

	Cash flow hedges		Non-designated	
	As of December 31, 2014	As of December 31, 2015	As of December 31, 2014	As of December 31, 2015

GENPACT LIMITED AND ITS SUBSIDIARIES
Notes to the Consolidated Financial Statements
(In thousands, except per share data and share count)

7. Derivative financial instruments (Continued)

Cash flow hedges

For derivative instruments that are designated and qualify as cash flow hedges, the effective portion of the gain (loss) on the derivative instrument is reported as a component of other comprehensive income (loss) and reclassified into earnings in the same period or periods during which the hedged transaction is recognized in the consolidated statements of income. Gains (losses) on the derivatives, representing either hedge ineffectiveness or hedge components excluded from the assessment of effectiveness, are recognized in earnings as incurred.

In connection with cash flow hedges, the gains (losses) recorded as a component of other comprehensive income (loss), or OCI, and the related tax effects are summarized below:

	Year ended December 31,								
	2013			2014			2015		
	Before-Tax amount	Tax (Expense) or Benefit	Net of tax Amount	Before-Tax amount	Tax (Expense) or Benefit	Net of tax Amount	Before-Tax amount	Tax (Expense) or Benefit	Net of tax Amount
Opening balance as of January 1	\$ 163,756	\$ 59,070	\$(104,686)	\$(205,952)	\$ 72,612	\$(133,340)	\$(66,786)	\$ 23,646	\$(43,140)

9. Property, plant and equipment, net

Property, plant and equipment, net consist of the following:

	As of December 31,	
	2014	2015
Land	\$ 10,324	\$ 9,873
Buildings	46,272	47,718
Furniture and fixtures	33,908	33,356
Computer equipment and servers	169,730	172,086
Plant, machinery and equipment	74,981	79,599
Computer software	93,054	110,153
Leasehold improvements	89,770	86,997
Vehicles	6,607	6,009
Capital work in progress	7,314	10,727
Property, plant and equipment, gross	\$ 531,960	\$ 556,518
Less: Accumulated depreciation and amortization	(356,024)	(381,122)
Property, plant and equipment, net	<u>\$ 175,936</u>	<u>\$ 175,396</u>

Depreciation expense on property, plant and equipment for the years ended December 31, 2013, 2014 and 2015 was \$46,408, \$44,029 and \$47,673, respectively. Computer software amortization for the years ended December 31, 2013, 2014 and 2015 amounted to \$9,949, \$9,105 and \$9,114, respectively.

The depreciation and amortization expenses set forth above include the effect of the reclassification of foreign exchange (gains) losses related to the effective portion of foreign currency derivative contracts, amounting to \$3,542, \$2,070 and \$2,501 for the years ended December 31, 2013, 2014 and 2015, respectively.

Property, plant and equipment, net include assets held under capital lease arrangements amounting to \$3,435 and \$2,797 as of December 31, 2014 and December 31, 2015, respectively. Depreciation expense in respect of these assets was \$1,726, \$1,786 and \$1,594 for the years ended December 31, 2013, 2014 and 2015, respectively.

10. Goodwill and intangible assets

The following table presents the changes in goodwill for the years ended December 31, 2014 and 2015:

	As of December 31,	
	2014	2015
Opening balance	\$ 953,849	\$ 1,057,214
Goodwill relating to acquisitions consummated during the period	127,047	7,674
Impact of measurement period adjustments	—	(135)
Effect of exchange rate fluctuations	(23,682)	(26,407)
Closing balance	<u>\$ 1,057,214</u>	<u>\$ 1,038,346</u>

GENPACT LIMITED AND ITS SUBSIDIARIES
Notes to the Consolidated Financial Statements
(In thousands, except per share data and share count)

10. Goodwill and intangible assets (Continued)

Goodwill has been allocated to the following reporting units, which represent different business units of the Company, as follows:

	As of December 31,	
	2014	2015
India	\$ 477,969	\$ 461,383
China	60,585	59,250
Europe	39,189	38,242
Americas	46,583	46,583
IT services	432,888	432,888
	<u>\$ 1,057,214</u>	<u>\$ 1,038,346</u>

In the years ended December 31, 2014 and 2015, in accordance with ASU 2011-08, the Company performed an assessment of qualitative factors to determine whether events or circumstances exist that may lead to a determination that it is more likely than not that the fair value of a reporting unit is less than its carrying amount. Based on its assessment, the Company concluded that it is not more likely than not that the fair value of any of the Company's reporting units is less than its carrying amount.

The total amount of goodwill deductible for tax purposes is \$37,628 and \$36,390 as of December 31, 2014 and 2015, respectively.

The Company's intangible assets acquired either individually or with a group of other assets or in a business combination are as follows:

	As of December 31, 2014			As of December 31, 2015		
	Gross carrying amount	Accumulated amortization & Impairment	Net	Gross carrying amount	Accumulated amortization & Impairment	Net
Customer-related intangible assets	\$ 310,069	\$ 228,095	\$ 81,974	\$ 319,035	\$ 247,463	\$ 71,572
Marketing-related intangible assets	43,137	23,801	19,336	42,749	27,021	15,728
Other intangible assets	19,002	5,768	13,234	29,729	18,427	11,301
	<u>\$ 372,208</u>	<u>\$ 257,664</u>	<u>\$ 114,544</u>	<u>\$ 391,513</u>	<u>\$ 292,911</u>	<u>\$ 98,601</u>

Amortization expenses for intangible assets disclosed in the consolidated statements of income under amortization of acquired intangible assets for the years ended December 31, 2013, 2014 and 2015 were \$23,645, \$28,543 and \$28,513, respectively.

During the year ended 2015, the Company tested an intangible software asset for recoverability as a result of a downward revision to the forecasted cash flows to be generated by the intangible asset. Based on the results of such testing, the Company determined that the carrying value of the intangible asset exceeded its fair value by \$10,714 and recorded a charge to reduce the carrying value by this amount. The Company used the discounted cash flow or income approach to determine the fair value of the intangible asset for the purpose of calculating the resulting charge. This charge has been recorded in other operating (income) expenses, net in the consolidated statement of income.

Notes to the Consolidated Financial Statements
(In thousands, except per share data and share count)

10. Goodwill and intangible assets (Continued)

The estimated amortization schedule for the Company's intangible assets for future periods is set out below:

For the year ending December 31:	
2016	\$25,961
2017	22,501
2018	18,322
2019	14,531
2020 and beyond	17,286
	<u>\$98,601</u>

11. Other assets

Other assets consist of the following:

	As of December 31,	
	2014	2015
Customer acquisition cost	\$ 15,035	\$ 13,458
Advance income and non-income taxes	27,381	50,123
Deferred transition costs	37,230	56,759
Deposits	24,989	24,107
Derivative instruments	17,129	12,096
Prepaid expenses	2,565	4,435
Accounts receivable due after one year	11,635	8,348
Others	10,742	10,679
	<u>\$ 146,706</u>	<u>\$ 180,005</u>

12. Leases

The Company has leased vehicles, furniture and fixtures, computer equipment and servers, and plants, machinery and equipment from various lessors under capital lease arrangements which are not material to the consolidated financial statements.

The Company conducts its operations using facilities under non-cancellable operating lease agreements that expire at various dates. Future minimum lease payments under these agreements are as follows:

Year ending December 31:	
2016	\$ 46,056
2017	40,539
2018	34,998
2019	31,124
2020	29,755
2021 and beyond	93,372
Total minimum lease payments	<u>\$275,844</u>

GENPACT LIMITED AND ITS SUBSIDIARIES
Notes to the Consolidated Financial Statements
(In thousands, except per share data and share count)

12. Leases (Continued)

Rental expenses in agreements with rent holidays and scheduled rent increases are recorded on a straight-line basis over the applicable lease term. Rent expenses under cancellable and non-cancellable operating leases were \$55,450, \$57,178 and \$50,342 for the years ended December 31, 2013, 2014 and 2015, respectively.

The rental expenses set out above include the effect of the reclassification of foreign exchange (gains) losses related to the effective portion of foreign currency derivative contracts amounting to \$2,851, \$1,823 and \$2,037 for the years ended December 31, 2013, 2014 and 2015, respectively.

13. Accrued expenses and other current liabilities

Accrued expenses and other current liabilities consist of the following:

	As of December 31,	
	2014	2015
Accrued expenses	\$ 114,770	\$ 161,672
Accrued employee cost	143,829	158,054
Deferred transition revenue	49,792	44,974
Statutory liabilities	24,713	32,149
Retirement benefits	16,807	17,930
Derivative instruments	65,615	34,610
Advance from clients	19,857	19,815
Earn-out consideration	3,232	16,896
Other liabilities	12,399	12,210
Capital lease obligations	1,443	1,328
	<u>\$ 452,457</u>	<u>\$ 499,638</u>

14. Long-term debt

In August 2012, the Company obtained credit facilities aggregating \$925,000 from a consortium of financial institutions.

In June 2013, the Company amended this credit facility to reduce interest payments thereunder. As of the amendment date, the gross outstanding term loan amounted to \$671,625. The amendment did not result in a substantial modification of \$553,589 of the outstanding term loan under the previous credit facility. As a result of the amendment, the Company extinguished \$118,036 of the outstanding term loan under the previous facility and obtained additional funding amounting to \$121,410, increasing the total term loan outstanding to \$675,000. The Company expensed \$3,103, representing partial acceleration of the amortization of the existing unamortized debt issuance costs and an additional fee paid to the lenders in respect of the extinguished amount. The overall borrowing capacity under the revolving facility did not change. The amendment of the revolving facility resulted in accelerated amortization of \$54 relating to the existing unamortized debt issuance cost. The remaining unamortized costs and an additional third party fee paid in connection with the amendment were to be amortized over the duration of the term loan and revolving facility, which by their terms were to expire on August 30, 2019 and August 30, 2017, respectively.

In June 2015, the Company refinanced its 2012 facility through a new credit facility comprised of an \$800,000 term loan and a \$350,000 revolving credit facility. Borrowings under the new facility bear interest at a rate equal to, at the election of the Company, either LIBOR plus an applicable margin equal to 1.50% per annum

GENPACT LIMITED AND ITS SUBSIDIARIES
Notes to the Consolidated Financial Statements
(In thousands, except per share data and share count)

14. Long-term debt (Continued)

or a base rate plus an applicable margin equal to 0.50% per annum, in each case subject to adjustment based on the Company's debt ratings provided by Standard & Poor's Rating Services and Moody's Investors Service, Inc. Based on the Company's election and current credit rating, the applicable interest rate is equal to LIBOR plus 1.50% per annum. As a result of the June 2015 refinancing, the gross outstanding term loan under the previous facility, which amounted to \$663,188 as of June 30, 2015, was extinguished, and the Company expensed \$10,050, representing accelerated amortization of the existing unamortized debt issuance costs related to the prior facility. Additionally, the refinancing of the revolving facility resulted in the accelerated amortization of \$65 relating to the existing unamortized debt issuance cost. The remaining unamortized costs for the revolving facility, together with the fees paid to the Company's lenders and third parties in connection with the new term loan and revolving facility, will be amortized over the term of the refinanced facility, which ends on June 30, 2020.

As of December 31, 2014 and December 31, 2015, the amount outstanding under the Company's term loan, net of debt amortization expense of \$11,274 and \$3,534, was \$653,602 and \$776,466, respectively. As of December 31, 2014, the term loan bore interest at a rate equal to LIBOR (subject to a floor of 0.75%) plus an applicable margin of 2.75% per annum. As of December 31, 2015, the term loan bore interest at a rate equal to LIBOR plus a margin of 1.50% per annum. Indebtedness under the refinanced facility is unsecured. The amount outstanding on the term loan as of December 31, 2015 will be repaid through quarterly payments of \$10,000, and the balance will be repaid upon the maturity of the term loan on June 30, 2020.

The maturity profile of the term loan, net of debt amortization expense, is as follows:

Year ended	Amount
2016	\$ 39,134
2017	39,181
2018	39,226
2019	39,272
2020	619,653
Total	\$ 776,466

15. Short-term borrowings

The Company has the following borrowing facilities:

- (a) Fund-based and non-fund-based credit facilities with banks, which are available for operational requirements in the form of overdrafts, letters of credit, guarantees and short-term loans. As of December 31, 2014 and December 31, 2015, the limits available were \$14,282 and \$15,781, respectively, of which \$8,138 and \$10,301 was utilized, constituting non-funded drawdown.
- (b) A fund-based and non-fund based revolving credit facility of \$350,000, which the company obtained in June 2015 as described in note 14. This facility replaces the Company's \$250,000 facility initially entered into in August 2012 and subsequently amended in June 2013. As of December 31, 2014 and December 31, 2015, a total of \$137,224 and \$22,947, respectively, was utilized, of which \$135,000 and \$21,500, respectively, constituted funded drawdown and \$2,224 and \$1,447, respectively, constituted non-funded drawdown. The revolving facility expires in June 2020. The funded drawdown amount bore interest at a rate equal to LIBOR plus a margin of 2.50% as of December 31, 2014. As of

GENPACT LIMITED AND ITS SUBSIDIARIES
Notes to the Consolidated Financial Statements
(In thousands, except per share data and share count)

15. Short-term borrowings (Continued)

December 31, 2015, the revolving facility bore interest at a rate equal to LIBOR plus a margin of 1.50% per annum. The unutilized amount on the revolving facility bore a commitment fee of 0.5% and 0.25% as of December 31, 2014 and December 31, 2015, respectively. The credit agreement contains certain customary covenants, including a maximum leverage covenant and a minimum interest coverage ratio. During the year ended December 31, 2015, the Company was in compliance with the financial covenants.

- (c) On January 27, 2015 and March 23, 2015, the Company obtained short-term loans in the amount of \$672,500 and \$737,500, respectively, from Morgan Stanley Senior Funding, Inc. in connection with certain internal reorganization transactions. These loans bore interest at a rate of 2.00% per annum and were fully repaid on January 30, 2015 and March 26, 2015, respectively. The Company recorded \$1,045 in debt issuance expenses and \$235 in interest with respect to the amounts borrowed under the short-term loans.

16. Other liabilities

Other liabilities consist of the following:

	As of December 31,	
	2014	2015
Accrued employee cost	\$ 5,121	\$ 6,901
Deferred transition revenue	52,419	66,737
Retirement benefits	29,652	29,689
Derivative instruments	35,901	25,010
Amount received from GE under indemnification arrangement, pending adjustment	5,129	3,549
Advance from clients	6,000	4,485
Earn-out consideration	30,758	5,924
Others	11,662	10,729
Capital lease obligations	2,660	2,204
	<u>\$ 179,302</u>	<u>\$ 155,228</u>

17. Employee benefit plans

The Company has employee benefit plans in the form of certain statutory and other schemes covering its employees.

Defined benefit plans

In accordance with Indian law, the Company provides a defined benefit retirement plan (the "Gratuity Plan") covering substantially all of its Indian employees. The Gratuity Plan provides a lump-sum payment to vested employees upon retirement or termination of employment in an amount based on each employee's salary and duration of employment with the Company. The Gratuity Plan benefit cost for the year is calculated on an actuarial basis. The Company contributes the required funding for all ascertained liabilities to the Genpact India Employees' Gratuity Fund. Trustees administer contributions made to the trust, and contributions are invested in specific designated instruments as permitted by Indian law. The Company's overall investment strategy is to

GENPACT LIMITED AND ITS SUBSIDIARIES
Notes to the Consolidated Financial Statements
(In thousands, except per share data and share count)

17. Employee benefit plans (Continued)

invest predominantly in fixed income funds managed by asset management companies. These funds further invest in debt securities such as money market instruments, government securities and public and private bonds. During the years ended December 31, 2013, 2014 and 2015, all of the plan assets were primarily invested in debt securities.

In addition, in accordance with Mexican law, the Company provides certain termination benefits (the “Mexican Plan”) to its eligible Mexican employees based on the age, duration of service and salary of each eligible employee. The Mexican Plan benefit cost for the year is calculated on an actuarial basis.

In addition, certain of the Company’s subsidiaries organized or operating in the Philippines and Japan have sponsored defined benefit retirement programs (respectively, the “Philippines Plan” and the “Japan Plan”). The benefit costs of the Japan Plan and the Philippines Plan for the year are calculated on an actuarial basis. Company contributions in respect of these plans are made to insurer-managed funds or to a trust. The trust contributions are further invested in government bonds.

Current service costs for defined benefit plans are accrued in the year to which they relate on a monthly basis. Actuarial gains or losses, or prior service costs, if any, resulting from amendments to the plans are recognized and amortized over the remaining period of service of the employees or over the average remaining life expectancies for inactive employees if most of the plan obligations are payable to inactive employees.

The following table sets forth the funded status of the defined benefit plans and the amounts recognized in the Company’s financial statements based on an actuarial valuation carried out as of December 31, 2014 and 2015.

	As of December 31,	
	2014	2015
<i>Change in benefit obligation</i>		
Projected benefit obligation at the beginning of the year	\$28,596	\$36,445
Service cost	4,721	5,578
Actuarial loss (gain)	1,843	(3,459)
Interest cost	2,410	2,629
Liabilities assumed on acquisition	3,967	—
Benefits paid	(3,736)	(3,846)
Effect of exchange rate changes	(1,356)	(1,730)
Projected benefit obligation at the end of the year	<u>\$36,445</u>	<u>\$35,617</u>
<i>Change in fair value of plan assets</i>		
Fair value of plan assets at the beginning of the year	\$22,798	\$29,721
Employer contributions	7,139	1,283
Actual gain on plan assets	1,907	2,465
Assets assumed on acquisition	2,825	—
Actuarial gain/(loss)	(6)	—
Benefits paid	(3,736)	(3,763)
Effect of exchange rate changes	(1,206)	(1,157)
Fair value of plan assets at the end of the year	<u>\$29,721</u>	<u>\$28,549</u>

17. Employee benefit plans (Continued)

Amounts included in other comprehensive income (loss) as of December 31, 2014 and 2015 were as follows:

	As of December 31,	
	2014	2015
Net actuarial loss	<u>\$ (7,178)</u>	<u>\$ (3,051)</u>
Deferred tax assets	<u>2,178</u>	<u>874</u>
Other comprehensive income, net	<u><u>\$ (5,000)</u></u>	<u><u>\$ (2,177)</u></u>

Changes in other comprehensive income (loss) during the year ended December 31, 2015 were as follows:

	2015
Net Actuarial loss	<u>\$ 3,899</u>
Amortization of net actuarial loss	416
Deferred income taxes	(1,304)
Effect of exchange rate changes	(189)
Other comprehensive income (loss), net	<u><u>\$ 2,822</u></u>

Net defined benefit plan costs for the years ended December 31, 2013, 2014 and 2015 include the following components:

	Year ended December 31,		
	2013	2014	2015
Service costs	<u>\$ 4,511</u>	<u>\$ 4,721</u>	<u>\$ 5,578</u>
Interest costs	<u>2,104</u>	<u>2,410</u>	<u>2,629</u>
Amortization of actuarial loss	<u>421</u>	<u>419</u>	<u>330</u>
Expected return on plan assets	<u>(968)</u>	<u>(1,719)</u>	<u>(2,154)</u>
Net Defined Benefit Plan costs	<u><u>\$ 6,068</u></u>	<u><u>\$ 5,831</u></u>	<u><u>\$ 6,383</u></u>

The amount in other comprehensive loss that is expected to be recognized as a component of net periodic benefit cost over the next fiscal year is \$72.

The weighted average assumptions used to determine the benefit obligations of the Gratuity Plan as of December 31, 2014 and 2015 are presented below:

	As of December 31,	
	2014	2015
Discount rate	8.50%-8.55%	8.30%-8.45%
Rate of increase in compensation per annum	5.20%-11.00%	5.20%-11.00%

(In thousands, except per share data and share count)

17. Employee benefit plans (Continued)

Expected benefit plan payments are based on the same assumptions that were used to measure the Company's benefit obligations as of December 31, 2015.

Defined contribution plans

During the years ended December 31, 2013, 2014 and 2015, the Company contributed the following amounts to defined contribution plans in various jurisdictions:

	Year ended December 31,		
	2013	2014	2015
India	\$14,443	\$15,272	\$15,915
U.S.	3,268	5,565	8,148
U.K.	1,789	3,361	4,453
China	14,681	14,518	14,511
Other Regions	4,641	4,355	4,690
Total	\$38,822	\$43,071	\$47,717

18. Stock-based compensation

The Company has issued options under the Genpact Global Holdings 2005 Plan (the "2005 Plan"), the Genpact Global Holdings 2006 Plan (the "2006 Plan"), the Genpact Global Holdings 2007 Plan (the "2007 Plan") and the Genpact Limited 2007 Omnibus Incentive Compensation Plan (the "2007 Omnibus Plan") to eligible persons including employees, directors and certain other persons associated with the Company.

With respect to options granted under the 2005, 2006 and 2007 Plans before the date of adoption of the 2007 Omnibus Plan, if an award granted under any such plan is forfeited or otherwise expires, terminates, or is cancelled without the delivery of shares, then the shares covered by the forfeited, expired, terminated, or cancelled award will be added to the number of shares otherwise available for grant under the respective plans.

Beginning on July 13, 2007, the date of adoption of the 2007 Omnibus Plan, shares underlying options forfeited, expired, terminated or cancelled under any of the plans are added to the number of shares otherwise available for grant under the 2007 Omnibus Plan. The 2007 Omnibus Plan was amended and restated on April 11, 2012 to increase the number of common shares authorized for issuance by 5,593,200 shares to 15,000,000 shares.

During the year ended December 31, 2012, the number of common shares authorized for issuance under the 2007 Omnibus Plan and the 2005 Plan was increased by 8,858,823 and 495,915 shares, respectively, as the result of an adjustment to outstanding unvested share awards.

A brief summary of each plan is provided below:

2005 Plan

Under the 2005 Plan, which was adopted on July 26, 2005, the Company is authorized to issue up to 12,706,665 options to eligible persons.

GENPACT LIMITED AND ITS SUBSIDIARIES
Notes to the Consolidated Financial Statements
(In thousands, except per share data and share count)

18. Stock-based compensation (Continued)*2006 Plan*

Under the 2006 Plan, which was adopted on February 27, 2006, the Company is authorized to issue up to 4,942,369 options to eligible persons.

2007 Plan

Under the 2007 Plan, which was adopted on March 27, 2007, the Company is authorized to issue up to 16,733,250 options to eligible persons.

2007 Omnibus Plan

The Company adopted the 2007 Omnibus Plan on July 13, 2007 and amended and restated it on April 11, 2012. The 2007 Omnibus Plan provides for the grant of awards intended to qualify as incentive stock options, non-qualified stock options, share appreciation rights, restricted share awards, restricted share units, performance units, cash incentive awards and other equity-based or equity-related awards. Under the 2007 Omnibus Plan, the Company is authorized to grant awards for the issuance of up to a total of 23,858,823 common shares.

Stock-based compensation costs relating to the foregoing plans during the years ended December 31, 2013, 2014 and 2015, were \$30,901, \$27,773 and \$24,684, respectively, and have been allocated to cost of revenue and selling, general, and administrative expenses.

Tax benefits recognized in relation to stock-based compensation charges during the years ended December 31, 2013, 2014 and 2015 were \$6,913, \$6,366 and \$6,125, respectively.

Stock options

All options granted under the 2007 Omnibus Plan or any prior plans are exercisable into common shares of the Company, have a contractual period of ten years and vest over four to five years unless specified otherwise in the applicable award agreement. The Company recognizes compensation cost over the vesting period of the option. Compensation cost is determined at the date of grant by estimating the fair value of an option using the Black-Scholes option-pricing model.

The following table shows the significant assumptions used in connection with the determination of the fair value of options granted in 2013, 2014 and 2015:

	2013	2014	2015
Dividend yield	—	—	—
Expected life (in months)	84	84	84
Risk-free rate of interest for expected life	1.55%	2.18% - 2.29%	1.99%
Volatility	39.39%	37.27% - 38.34%	34.97%

Volatility was calculated based on the historical volatility of the Company during a period equivalent to the estimated term of the option. The Company estimates the expected term of an option using the “simplified method,” which is based on the average of its contractual vesting term. The risk-free interest rate that the Company uses in the option valuation model is based on U.S. Treasury bonds with a term similar to the expected term of the options. The Company has not paid any regular cash dividends in the last two fiscal years.

Weighted average grant date fair value of grants during the period	\$ 9.15			

(a) Options expected to vest reflect an estimated forfeiture rate.

(b) 2,138,601 of these options were net settled upon exercise by issuing 1,485,826 shares (net of minimum statutory withholding taxes).

Cash received upon the exercise of stock options amounted to \$44,025, \$16,051 and \$13,564, and cash tax benefits realized upon the exercise of stock options were \$1,806, \$761 and \$6,982 (including excess tax benefits of \$0, \$0, \$6,560) during the years ended December 31, 2013, 2014 and 2015, respectively.

As of December 31, 2015, the total remaining unrecognized stock-based compensation cost for options expected to vest amounted to \$14,073, which will be recognized over the weighted average remaining requisite vesting period of 2.4 years.

Restricted Share Units

The Company has granted restricted share units, or RSUs, under the 2007 Omnibus Plan. Each RSU represents the right to receive one common share. The fair value of each RSU is the market price of one common share of the Company on the date of grant. The RSUs granted to date have graded vesting schedules of three months to four years. The compensation expense is recognized on a straight-line basis over the vesting term.

A summary of RSUs granted during the years ended December 31, 2013, 2014 and 2015 is set out below:

	Year ended December 31, 2013	
	Number of Restricted Share Units	Weighted Average Grant Date Fair Value
Outstanding as of January 1, 2013	1,688,402	\$ 13.74

Expected to vest (Note a)	147,226	

- (a) RSUs expected to vest reflect an estimated forfeiture rate.
- (b) 622,465 of these RSUs were net settled upon vesting by issuing 424,201 shares (net of minimum statutory tax withholding). 61,057 RSUs vested in the year ended December 31, 2013, in respect of which 59,827 shares were issued in January 2015 after withholding shares to the extent of minimum statutory withholding taxes.
- (c) 418,821 of these RSUs were net settled upon vesting by issuing 285,706 shares (net of minimum statutory withholding taxes). 92,692 RSUs vested in the year ended December 31, 2014, shares in respect of which will be issued in 2016 after withholding shares to the extent of minimum statutory withholding taxes.
- (d) Vested RSUs were net settled by issuing 199,949 shares (net of minimum statutory tax withholding). 53,546 RSUs vested in the year ended December 31, 2015, shares in respect of which will be issuable on December 31, 2016 after withholding shares to the extent of minimum statutory withholding taxes.

102,000 shares vested in the year ended December 31, 2011, shares in respect of which were issued in January 2013 (100,800 shares, net of minimum statutory withholding taxes). Shares in respect of an additional 13,719 RSUs were issued in January 2013 (13,557 shares, net of minimum statutory withholding taxes).

48,819 RSUs vested in the year ended December 31, 2012. 2,059 common shares underlying 4,533 of such RSUs were issued in April 2013 after withholding shares to the extent of applicable minimum statutory withholding taxes. Shares underlying the remaining 44,286 of such RSUs were issued in January 2014 after withholding 681 shares to the extent of the minimum applicable statutory withholding taxes.

As of December 31, 2015, the total remaining unrecognized stock-based compensation cost related to RSUs amounted to \$1,511, which will be recognized over the weighted average remaining requisite vesting period of 2.2 years.

Notes to the Consolidated Financial Statements
(In thousands, except per share data and share count)

18. Stock-based compensation (Continued)
Performance Units

The Company also grants stock awards in the form of Performance Units, or PUs, under the 2007 Omnibus Plan.

Each PU represents the right to receive one common share at a future date based on the Company's performance against specified targets. PUs granted to date have vesting schedules of six months to three years. The fair value of each PU is the market price of one common share of the Company on the date of grant and assumes that performance targets will be achieved. PUs granted under the plan are subject to cliff vesting. The compensation expense for such awards is recognized on a straight-line basis over the vesting terms. During the performance period, the Company's estimate of the number of shares to be issued is adjusted upward or downward based upon the probability of achievement of the performance targets. The ultimate number of shares issued and the related compensation cost recognized is based on a comparison of the final performance metrics to the specified targets.

A summary of PU activity during the years ended December 31, 2013, 2014 and 2015 is set out below:

	Year ended December 31, 2013		
	Number of Performance Units	Weighted Average Grant Date Fair Value	Maximum Shares Eligible to Receive

Expected to vest (Note a)	2,184,906		

- (a) PUs expected to vest are based on the probable achievement of the performance targets after considering an estimated forfeiture rate.
- (b) 1,164,364 shares vested in respect of PUs granted in 2011.
- (c) Represents additional shares issued in respect of PUs granted in March 2012 due to the achievement of higher-than-target performance.
- (d) Represents a reduction in the maximum shares eligible to vest for PUs granted in March 2012.
Outstanding PUs as of December 31, 2013 include 483,999, 1,250,807 and 657,000 shares underlying awards granted in May 2011, March 2013 and May 2013, respectively, for which the performance conditions were not fulfilled.
- (e) Vested PUs as of December 31, 2014 include 775,904 shares issued in 2014 with respect to grants made in 2011 after withholding shares to the extent of the minimum statutory withholding taxes.
Vested PUs as of December 31, 2014 also include 1,329,270 shares underlying PUs granted in March 2012 based on the compensation committee's certification of the achievement of the performance goals for the performance period based on the Company's audited financial statements. Shares in respect of such PUs were issued in January 2015 (845,524 shares after withholding shares to the extent of the minimum statutory withholding taxes).
- (f) Represents 139,930 additional shares issued in 2014 (included in note (e) above) for PUs granted in 2011.
- (g) Includes 251,427 shares underlying PUs granted in May 2011, 1,244,507 shares underlying PUs granted in March 2013 and 630,000 shares underlying PUs granted in May 2013, all of which were forfeited due to non-fulfillment of the performance conditions as certified by the compensation committee based on the Company's audited financial statements.
- (h) Represents a reduction of 333,002 and 39,285 of the maximum shares eligible to vest with respect to PUs granted in March 2011 and June 2011, respectively, as a result of the compensation committee's certification of the level of achievement of the performance conditions based on the Company's audited financial statements. Also includes a reduction of 616,568 shares for grants made in March 2013, 985,500 shares for grants made in May 2013 and 121,000 shares for grants made in May 2011, due to non-fulfillment of the performance conditions as certified by the compensation committee based on the Company's audited financial statements.

(In thousands, except per share data and share count)

18. Stock-based compensation (Continued)

- (i) Vested PUs were net settled upon vesting by issuing 590 shares (net of minimum statutory tax withholding).
- (j) Represents a 5.2% to 6.7% reduction, depending on the targets under the PU award granted, in the number of target shares as a result of achievement of lower-than-target performance for the PUs granted in 2015, partially offset by a 0.8% to 6.6% increase in the number of target shares as a result of achievement of higher-than-target performance for the PUs granted in 2014.
- (k) Represents the difference between the maximum number of shares achievable and the number of shares expected to vest under the PU awards granted in 2015 based on the level of achievement of the performance goals. Also includes the difference between the maximum number of shares achievable and the number of shares eligible to vest under the PU awards granted in 2014 based on the certified level of achievement of the performance goals.

156,511 shares, net of minimum statutory withholding taxes, were issued in January 2013 with respect to 28,901 PUs that vested in 2012 and 214,880 PUs that vested as of December 31, 2011.

503,969 shares vested in respect of PUs granted in March 2010. 339,601 shares (net of minimum statutory withholding taxes) in respect of such PUs were issued in 2013.

231,029 shares vested in the year ended December 31, 2012 in respect of PUs granted in August 2010. 138,035 shares (net of minimum statutory tax withholding) in respect of such PUs were issued in January 2014.

As of December 31, 2015, the total remaining unrecognized stock-based compensation cost related to PUs amounted to \$24,345 and will be recognized over the weighted average remaining requisite vesting period of 1.8 years.

Employee Stock Purchase Plan (ESPP)

On May 1, 2008, the Company adopted the Genpact Limited U.S. Employee Stock Purchase Plan and the Genpact Limited International Employee Stock Purchase Plan (together, the “ESPP”).

The ESPP allows eligible employees to purchase the Company’s common shares through payroll deductions at 90% of the fair value of a Company common share on the last business day of each purchase interval. The dollar amount of common shares purchased under the ESPP must not exceed 15% of the participating employee’s base salary, subject to a cap of \$25 per employee per calendar year. The offering periods commence on the first business day in March, June, September and December of each year and end on the last business day in the subsequent May, August, November and February of each year. 4,200,000 common shares have been reserved for issuance in the aggregate over the term of the ESPP.

During the years ended December 31, 2013, 2014 and 2015, 109,698, 151,461 and 121,485 common shares, respectively, were issued under the ESPP.

The ESPP is considered compensatory under FASB guidance on Compensation-Stock Compensation.

The compensation expense for the employee stock purchase plan is recognized in accordance with FASB guidance on Compensation-Stock Compensation. The compensation expense for the ESPP during the years ended December 31, 2013, 2014 and 2015 was \$228, \$292 and \$292, respectively, and has been allocated to cost of revenue and selling, general, and administrative expenses.

GENPACT LIMITED AND ITS SUBSIDIARIES
Notes to the Consolidated Financial Statements
(In thousands, except per share data and share count)

19. Capital stock

The Company's authorized capital stock as of December 31, 2014 and 2015 consisted of 500 million common shares with a par value of \$0.01 per share, and 250 million preferred shares with a par value of \$0.01 per share. There were 218,684,205 and 211,472,312 common shares, and no preferred shares, issued and outstanding as of December 31, 2014 and 2015, respectively.

Holders of common shares are entitled to one vote per share. Upon the liquidation, dissolution or winding up of the Company, common shareholders are entitled to receive a ratable share of the available net assets of the Company after payment of all debts and other liabilities. The common shares have no preemptive, subscription, redemption or conversion rights.

The Company's board of directors by resolution can establish one or more series of preferred shares having such par value, designations, dividend rates, relative voting rights, conversion or exchange rights, redemption rights, liquidation rights and other relative participation, optional or other rights, qualifications, limitations or restrictions as may be fixed by the board of directors without shareholder approval. Such rights, preferences, powers and limitations as may be established could also have the effect of discouraging an attempt to obtain control of the Company. These preferred shares are of the type commonly known as "blank-check" preferred shares.

Under Bermuda law, the Company may declare and pay dividends from time to time unless there are reasonable grounds for believing that the Company is or would, after the payment, be unable to pay its liabilities as they become due or that the realizable value of its assets would thereby be less than the aggregate of its liabilities, its issued share capital, and its share premium accounts. Under the Company's bye-laws, each common share is entitled to dividends if, as and when dividends are declared by the Company's board of directors. There are no restrictions in Bermuda on the Company's ability to transfer funds (other than funds denominated in Bermuda dollars) in or out of Bermuda or to pay dividends to U.S. residents who are holders of common shares. The Company's ability to declare and pay cash dividends is restricted by its debt covenants.

Share Repurchases

In February 2015, the Company's Board of Directors authorized a program to repurchase up to \$250,000 in value of the Company's common shares. The Company's share repurchase program does not obligate it to acquire any specific number of shares. Under the program, shares may be purchased in privately negotiated or open market transactions, including under plans complying with Rule 10b5-1 under the Securities Exchange Act of 1934, as amended. During the year ended December 31, 2015, the Company purchased 9,867,873 of its common shares at a weighted average price of \$23.00 per share for an aggregate cash amount of \$226,917. The purchased shares have been retired. On February 4, 2016, the Company announced that its Board of Directors has approved a \$250 million share repurchase program, bringing the total authorization under the Company's existing program to \$500 million. See Note 30, "Subsequent Events," for information and related disclosures.

On April 8, 2014, the Company purchased 17,292,842 of its common shares at a price of \$17.50 per share for an aggregate cash amount of approximately \$302,625 pursuant to the Company's modified "Dutch Auction" self-tender offer announced on March 5, 2014. Under the terms of the offer, the Company was authorized to purchase up to \$300,000 of its common shares. The number of shares accepted for purchase included the Company's exercise of its right to upsize the offer by up to 2% of the Company's shares then outstanding.

Any purchase by the Company of its common shares is accounted for when the transaction is settled. There were no unsettled share purchases as of December 31, 2014 and December 31, 2015. Shares purchased and

19. Capital stock (Continued)

retired are deducted to the extent of their par value from common stock and from retained earnings for the excess over par value. Direct costs incurred to acquire the shares are included in the total cost of the shares. For the year ended December 31, 2014 and December 31, 2015, \$2,543 and \$197, respectively, was deducted from retained earnings in direct costs related to share purchases.

20. Earnings per share

The Company calculates earnings per share in accordance with FASB guidance on Earnings per Share. Basic and diluted earnings per common share give effect to the change in the number of common shares of the Company. The calculation of basic earnings per common share was determined by dividing net income available to common shareholders by the weighted average number of common shares outstanding during the respective periods. The potentially dilutive shares, consisting of outstanding options on common shares, restricted share units, common shares to be issued under the ESPP and performance units, have been included in the computation of diluted net earnings per share and the weighted average shares outstanding, except where the result would be anti-dilutive.

The number of stock options outstanding but not included in the computation of diluted earnings per common share because their effect was anti-dilutive is 2,616,000, 3,758,000 and 2,821,000 for the years ended December 31, 2013, 2014 and 2015, respectively.

	Year ended December 31,		
	2013	2014	2015
Net income available to Genpact Limited common shareholders	\$ 229,717	\$ 192,002	\$ 239,817
Weighted average number of common shares used in computing basic earnings per common share	229,348,411	220,847,098	216,606,542

25. Income taxes (Continued)

Income tax expense (benefit) attributable to income from continuing operations differed from the amounts computed by applying the U.S. federal statutory income tax rate of 35% to income before income taxes, as a result of the following:

	Year ended December 31,		
	2013	2014	2015
Income before income tax expense	\$306,151	\$249,590	\$301,754
Statutory tax rates	35%	35%	35%
Computed expected income tax expense	107,153	87,356	105,614
Increase (decrease) in income taxes resulting from:			
Foreign tax rate differential	(6,704)	(4,703)	(16,550)
Tax benefit from tax holiday	(39,785)	(35,868)	(38,039)
Non-deductible expenses	5,637	3,789	1,884
Effect of change in tax rates	(2,268)	176	1,436
Change in valuation allowance	1,088	(2,880)	(33)
Unrecognized tax benefits	2,304	1,423	6,272
Other	3,675	8,126	1,353
Reported income tax expense (benefit)	<u>\$ 71,100</u>	<u>\$ 57,419</u>	<u>\$ 61,937</u>

A portion of the profits of the Company's operations is exempt from income tax in India. The tax holiday under the STPI Scheme was available for a period of ten consecutive years beginning in the year in which the respective Indian undertaking commenced operations and expired completely as of March 31, 2011. One of the Company's Indian subsidiaries has fourteen units eligible for tax holiday as a Special Economic Zone unit in respect of 100% of the export profits it generates for a period of 5 years from commencement, 50% of such profits for the next 5 years (year 6 to year 10 from commencement) and 50% of the profits for an additional period of 5 years (year 11 to year 15 from commencement), subject to the satisfaction of certain capital investment requirements. The complete tax holiday for the current SEZ units will begin to expire on March 31, 2022 and will not fully expire until March 31, 2029, provided the Company satisfies the capital investment requirements described above.

The effect of the Indian tax holiday on basic earnings per share was \$0.17, \$0.16 and \$0.18, respectively, for the years ended December 31, 2013, 2014 and 2015. The effect of the tax holiday on diluted earnings per share was \$0.17, \$0.16 and \$0.17, respectively, for the years ended December 31, 2013, 2014 and 2015.

25. Income taxes (Continued)

The change in the total valuation allowance for deferred tax assets as of December 31, 2013, 2014 and 2015 is as follows:

	Year ended December 31,		
	2013	2014	2015
Opening valuation allowance	\$23,922	\$24,654	\$21,094
Reduction during the year	(2,643)	(8,662)	(3,499)
Addition during the year	3,375	5,102	2,496
Closing valuation allowance	<u>\$24,654</u>	<u>\$21,094</u>	<u>\$20,091</u>

In assessing the realizability of deferred tax assets, management considers whether it is more likely than not that some or all of the deferred tax assets will not be realized. The ultimate realization of deferred tax assets depends on the generation of future taxable income during the periods in which temporary differences are deductible. Management considers the scheduled reversal of deferred tax liabilities and projected taxable income in making this assessment. In order to fully realize a deferred tax asset, the Company must generate future taxable income prior to the expiration of the deferred tax asset under applicable law. Based on the level of historical taxable income and projections for future taxable income over the periods during which the Company's deferred tax assets are deductible, management believes that it is more likely than not that the Company will realize the benefits of these deductible differences, net of the existing valuation allowances at December 31, 2015. The amount of the Company's deferred tax assets considered realizable, however, could be reduced in the near term if estimates of future taxable income during the carry-forward period are reduced.

In 2014, the Company determined that it was more likely than not that the deferred tax assets of a foreign subsidiary would be partially realized after considering all positive and negative evidence. Prior to 2014, because of significant negative evidence, including a history of losses, an uncertain revenue stream, and potential reorganization activity that could adversely affect the foreign subsidiary's future operations and profitability on a continuing basis in future years, the Company determined that it was more likely than not that the subsidiary's deferred tax assets would not be realized. However, as of December 31, 2014, such subsidiary had realized cumulative pre-tax income for the preceding three years and has forecasted future pre-tax income sufficient to realize a portion of its deferred tax assets. After consideration of the relative impact of all evidence, both negative and positive, and the weight accorded to each, the Company concluded that it was more likely than not that a portion of the subsidiary's deferred tax assets would be realized and that the applicable valuation allowance should be partially released up to \$3,000.

Notes to the Consolidated Financial Statements
(In thousands, except per share data and share count)

25. Income taxes (Continued)

As of December 31, 2015, the Company's deferred tax assets related to net operating loss carry-forwards amounted to \$48,626. Net operating losses of subsidiaries in the United Kingdom, Hungary, Singapore, Malaysia, Hong Kong, Spain, Northern Ireland, Australia, Morocco, South Africa, Colombia, Brazil, India (unabsorbed depreciation) and Luxembourg amounting to \$134,959 can be carried forward for an indefinite period. The remaining tax loss carry-forwards expire as set forth in the table below:

Year ending December 31,	US - Federal	Europe	Others
2016	\$ —	\$ 639	\$ —
2017	—	67	81
2018	—	790	255
2019	—	2	48
2020	—	4,474	652
2021	—	—	812
2022	—	2,644	29
2023	—	10,042	1,027
2024	—	6,458	10,632
2025	—	4,042	1,133
2026	—	363	—
2030	—	205	—
2031	68,084	196	—
2032	—	68	—
2033	4,575	—	—
	\$ 72,659	\$29,990	\$14,669

The Company's total U.S. federal net operating loss carry-forwards of approximately \$72,659 relate to excess tax deductions resulting from share-based compensation as of December 31, 2015. No federal deferred tax benefit has been recognized for this deduction. If and when realized, the tax benefit associated with this excess deduction will be credited to additional paid-in capital. Excess tax benefits of \$0, \$0 and \$6,560 were realized during the years ended December 31, 2013, 2014 and 2015, respectively, and were recorded through additional paid-in capital.

As of December 31, 2015, the Company had additional deferred tax assets on U.S. state and local tax loss carry-forwards amounting to \$7,502 with varying expiration periods between 2016 and 2034.

As of December 31, 2015, the company had a total alternative minimum tax credit of \$28,476, of which \$11,055, \$10,757 and \$3,106, all attributable to India, will expire in 2024, 2025 and 2026, respectively, and the balance, attributable to the United States, can be carried forward for an indefinite period.

GENPACT LIMITED AND ITS SUBSIDIARIES
Notes to the Consolidated Financial Statements
(In thousands, except per share data and share count)

25. Income taxes (Continued)

As of December 31, 2015, the company had a total foreign tax credit of \$25,583, which will expire as set forth in the table below:

Year ending December 31,	Amount
2022	\$ 893
2023	1,202
2024	15,552
2025	7,936
	<u>\$ 25,583</u>

Undistributed earnings of the Company's foreign (non-Bermuda) subsidiaries amounted to approximately \$706,048 as of December 31, 2015. The Company plans to indefinitely reinvest such undistributed earnings, except for those earnings for which a deferred tax liability has already been accrued or which can be repatriated in a tax-free manner. Accordingly, with limited exceptions, the Company does not accrue any income, distribution or withholding taxes that would arise if such earnings were repatriated. Due to the Company's changing corporate structure, the various methods that are available to repatriate earnings, and uncertainty relative to the applicable taxes at the time of repatriation, it is not practicable to determine the amount of tax that would be imposed upon repatriation. If undistributed earnings are repatriated in the future, or are no longer deemed to be indefinitely reinvested, the company will accrue the applicable amount of taxes associated with such earnings at that time.

As of December 31, 2015, \$431,897 of the Company's \$450,907 in cash and cash equivalents was held by the Company's foreign (non-Bermuda) subsidiaries. \$11,707 of this cash is held by foreign subsidiaries for which the Company expects to incur and has accrued a deferred tax liability on the repatriation of \$8,000 of retained earnings. \$71,573 of the cash and cash equivalents held by our foreign subsidiaries is held in jurisdictions where no tax is expected to be imposed upon repatriation.

The following table summarizes activities related to our unrecognized tax benefits for uncertain tax positions from January 1 to December 31 for each of 2013, 2014 and 2015:

	Year Ended December 31,		
	2013	2014	2015
Opening balance at January 1	\$21,024	\$21,832	\$22,718
Increase related to prior year tax positions, including recorded in acquisition accounting	1,685	2,472	2,000
Decrease related to prior year tax positions	(1,952)	(1,002)	—
Decrease related to prior year due to lapse of applicable statute of limitation	—	(753)	(820)
Increase related to current year tax positions, including recorded in acquisition accounting	2,905	442	3,544
Decrease related to settlements with tax authorities	—	—	—
Effect of exchange rate changes	(1,830)	(273)	(1,085)
Closing balance at December 31	<u>\$21,832</u>	<u>\$22,718</u>	<u>\$26,357</u>

As of December 31, 2013, 2014 and 2015, the Company had unrecognized tax benefits amounting to \$20,901, \$21,268 and \$24,935, respectively, which, if recognized, would impact the effective tax rate.

GENPACT LIMITED AND ITS SUBSIDIARIES
Notes to the Consolidated Financial Statements
(In thousands, except per share data and share count)

25. Income taxes (Continued)

As of December 31, 2013, 2014 and 2015, the Company has accrued approximately \$3,373, \$3,417 and \$4,223, respectively, for interest relating to unrecognized tax benefits. During the years ended December 31, 2013, 2014 and 2015, the Company recognized approximately \$(50), \$44 and \$1,152, respectively, excluding exchange rate differences, in interest expense. As of December 31, 2013, 2014 and 2015 the company has accrued \$350, \$561 and \$958, respectively, for penalties.

In the next twelve months and for all tax years that remain open to examinations by U.S. federal and various state, local, and non-U.S. tax authorities, the Company estimates that it is reasonably possible that the total amount of its unrecognized tax benefits will vary. However, the Company does not expect significant changes within the next twelve months other than depending on the progress of tax matters or examinations with various tax authorities, which are difficult to predict.

With exceptions, the Company is no longer subject to U.S. federal, state and local or non-U.S. income tax audits by taxing authorities for years prior to 2010. The Company's subsidiaries in India and China are open to examination by the relevant taxing authorities for tax years beginning on or after April 1, 2009, and January 1, 2000, respectively. The Company regularly reviews the likelihood of additional tax assessments and adjusts its reserves as additional information or events require.

26. Segment reporting

The Company manages various types of business process and information technology services in an integrated manner for clients in various industries and geographic locations. The Company's Chief Executive Officer, who has been identified as the Chief Operation Decision Maker (CODM), reviews financial information prepared on a consolidated basis, accompanied by disaggregated information about revenue and adjusted operating income by identified business units. The identified business units are organized for operational reasons and represent either services-based, customer-based, industry-based or geography-based units. There is significant overlap between the manner in which the business units are organized. Additionally, the composition and organization of the business units is fluid and the structure changes regularly in response to growth of the overall business, acquisitions and changes in the reporting structure, clients, services, industries served, and delivery centers.

Based on an overall evaluation of all facts and circumstances, and after combining operating segments with similar economic characteristics that comply with other aggregation criteria specified in the FASB guidance on Segment Reporting, the Company has determined that it operates as a single reportable segment.

Net revenues by service type are as follows:

	Year ended December 31,		
	2013	2014	2015
Business process outsourcing	\$ 1,608,224	\$ 1,736,716	\$ 1,933,095
Information technology services	523,773	542,722	527,949
Total net revenues	\$ 2,131,997	\$ 2,279,438	\$ 2,461,044

GENPACT LIMITED AND ITS SUBSIDIARIES
Notes to the Consolidated Financial Statements
(In thousands, except per share data and share count)

26. Segment reporting (Continued)

Revenues from clients based on the industry serviced are as follows:

	Year ended December 31,		
	2013	2014	2015
Banking, financial services and insurance	\$ 888,916	\$ 940,345	\$ 1,030,584
Manufacturing, including pharmaceuticals and medical equipment manufacturing	711,184	796,872	878,570
Technology, healthcare and other services	531,897	542,221	551,890
Total net revenues	\$ 2,131,997	\$ 2,279,438	\$ 2,461,044

Net revenues from geographic areas based on the location of service delivery centers are as follows. A portion of net revenues attributable to India consists of net revenues for services performed by delivery centers in India or at clients' premises outside of India by business units or personnel normally based in India.

	Year ended December 31,		
	2013	2014	2015
India	\$ 1,328,201	\$ 1,505,960	\$ 1,687,699
Asia, other than India	224,657	232,349	238,529
Americas	359,774	302,515	304,879
Europe	219,365	238,614	229,937
Total net revenues	\$ 2,131,997	\$ 2,279,438	\$ 2,461,044

Revenues from GE comprised 23%, 20% and 19% of the consolidated total net revenues in 2013, 2014 and 2015, respectively. No other customer accounted for 10% or more of the Company's consolidated total net revenues during these periods.

Property, plant and equipment, net by geographic region are as follows:

	As of December 31,	
	2014	2015
India	\$ 116,734	\$ 112,911
Asia, other than India	13,461	11,700
Americas	36,617	41,561
Europe	9,124	9,224
Total	\$ 175,936	\$ 175,396

27. Related party transactions

The Company has entered into related party transactions with its non-consolidating affiliates. The Company has also entered into related party transactions with a significant shareholder and its affiliates.

The Company's related party transactions can be categorized as follows:

Revenue from services

In the year ended December 31, 2013, the Company recognized net revenues of \$938 from clients that are affiliates of a significant shareholder of the Company.

In the years ended December 31, 2014, and 2015, the Company recognized net revenues of \$285 and \$326, respectively, from a client that is also a significant shareholder of the Company.

In the years ended December 31, 2014 and 2015, the Company recognized net revenues of \$5,580 and \$7,826, respectively, from a client that is a non-consolidating affiliate of the Company. \$1,955 of such revenue is receivable as of December 31, 2015.

Cost of revenue from services

The Company purchases certain services from its non-consolidating affiliates, mainly relating to training and recruitment, the costs of which are included in cost of revenue. For the years ended December 31, 2013, 2014 and 2015, cost of revenue includes an amount of \$2,140, \$2,126 and \$2,173, respectively.

Selling, general and administrative expenses

The Company purchases certain services from its non-consolidating affiliates, mainly relating to training and recruitment, the costs of which are included in selling, general and administrative expenses. For the years ended December 31, 2013, 2014 and 2015, selling, general and administrative expenses includes an amount of \$505, \$613 and \$384, respectively, attributable to the cost of services provided by the Company's non-consolidating affiliates.

During the years ended December 31, 2014 and 2015, the Company engaged a significant shareholder of the Company to provide services to the Company at a cost of \$900 and \$421, respectively, of which \$40 is payable as of December 31, 2015.

Investment in equity affiliates

During the years ended December 31, 2014 and 2015, the Company made investments of \$5,146 and \$17,013, respectively, in its non-consolidating affiliates. As of December 31, 2014 and 2015, \$5,146 and \$3,736, respectively, of such amounts were outstanding and have been included in accrued expenses and other current liabilities in the Company's consolidated balance sheet. In the first quarter of 2013, the Company acquired the balance of the outstanding interest in its non-consolidating affiliate, NGEN Media Services Private limited, for contingent consideration amounting to \$158, which resulted in such affiliate becoming a wholly-owned subsidiary. The results of operations and the fair value of the assets and liabilities of such wholly-owned subsidiary are included in the Company's Consolidated Financial Statements as of the date of the acquisition.

As of December 31, 2014 and 2015, the Company's investments in its non-consolidating affiliates amounted to \$494 and \$6,677, respectively.

Notes to the Consolidated Financial Statements
(In thousands, except per share data and share count)

27. Related party transactions (Continued)

Others

During the years ended December 31, 2014 and 2015, the Company also entered into transactions with one of its non-consolidating affiliates for certain cost reimbursements amounting to \$1,530 and \$2,077, respectively, of which \$853 is receivable as of December 31, 2015.

28. Commitments and contingencies

Capital commitments

As of December 31, 2014 and 2015, the Company has committed to spend \$6,073 and \$8,237, respectively, under agreements to purchase property, plant and equipment. This amount is net of capital advances paid in respect of such purchases.

Bank guarantees

The Company has outstanding bank guarantees amounting to \$10,362 and \$11,748 as of December 31, 2014 and 2015, respectively. Bank guarantees are generally provided to government agencies and excise and customs authorities for the purposes of maintaining a bonded warehouse. These guarantees may be revoked by the government agencies if they suffer any losses or damage through the breach of any of the covenants contained in the agreements governing such guarantees.

Other commitments

The Company's business process delivery centers in India are 100% export oriented units or Software Technology Parks of India ("STPI") units under the STPI guidelines issued by the Government of India. These units are exempt from customs, central excise duties, and levies on imported and indigenous capital goods, stores, and spares. The Company has undertaken to pay custom duties, service taxes, levies, and liquidated damages payable, if any, in respect of imported and indigenous capital goods, stores, and spares consumed duty free, in the event that certain terms and conditions are not fulfilled.

Consent of Independent Registered Public Accounting Firm

The Board of Directors
Genpact Limited:

We consent to the incorporation by reference in the registration statements (No. 333-187707) on Form S-3, (No. 333-184296) on Form S-8, (No. 333-153113) on Form S-8 and (No. 333-145152) on Form S-8/A of Genpact Limited of our reports dated February 26, 2016, with respect to the consolidated balance sheets of Genpact Limited as of December 31, 2014 and 2015, and the related consolidated statements of income, comprehensive income (loss), equity and cash flows for each of the years in the three-year period ended December 31, 2015, and the effectiveness of internal control over financial reporting as of December 31, 2015, which reports appear in the December 31, 2015 annual report on Form 10-K of Genpact Limited.

Our report dated February 26, 2016, on the effectiveness of internal control over financial reporting as of December 31, 2015, contains an explanatory paragraph that states that Genpact Limited acquired certain wealth management operations from Citibank, N.A. in the United Kingdom and management excluded from its assessment of the effectiveness of the Company's internal control over financial reporting as of December 31, 2015, certain wealth management operations acquired from Citibank, N.A. in the United Kingdom's internal control over financial reporting associated with total assets of \$13,318 thousands (of which \$3,242 thousands represent goodwill and intangible assets included within the scope of the assessment) and total revenues of \$8,818 thousands included in the consolidated financial statements of the Company as of and for the year ended December 31, 2015. Our audit of internal control over financial reporting of the Company also excluded an evaluation of the internal control over financial reporting of certain wealth management operations acquired from Citibank, N.A. in United Kingdom.

CHIEF EXECUTIVE OFFICER CERTIFICATION

I, N.V. Tyagarajan, certify that:

1. I have reviewed this Annual Report on Form 10-K of Genpact Limited for the period ended December 31, 2015, as filed with the Securities and Exchange Commission on the date hereof;
2. Based on my knowledge, this report does not contain any untrue statement of a material fact or omit to state a material fact necessary to make the statements made, in light of the circumstances under which such statements were made, not misleading with respect to the period covered by this report;
3. Based on my knowledge, the financial statements, and other financial information included in this report, fairly present in all material respects the financial condition, results of operations and cash flows of the registrant as of, and for, the periods presented in this report;
4. The registrant's other certifying officer and I are responsible for establishing and maintaining disclosure controls and procedures (as defined in Exchange Act Rules 13a-15(e) and 15d-15(e)) and internal control over financial reporting (as defined in Exchange Act Rules 13a-15(f) and 15d-15(f)) for the registrant and have:
 - a. Designed such disclosure controls and procedures, or caused such disclosure controls and procedures to be designed under our supervision, to ensure that material information relating to the registrant, including its consolidated subsidiaries, is made known to us by others within those entities, particularly during the period in which this report is being prepared;
 - b. Designed such internal control over financial reporting, or caused such internal control over financial reporting to be designed under our supervision, to provide reasonable assurance regarding the reliability of financial reporting and the preparation of financial statements for external purposes in accordance with generally accepted accounting principles;
 - c. Evaluated the effectiveness of the registrant's disclosure controls and procedures and presented in this report our conclusions about the effectiveness of the disclosure controls and procedures, as of the end of the period covered by this report based on such evaluation; and
 - d. Disclosed in this report any change in the registrant's internal control over financial reporting that occurred during the registrant's most recent fiscal quarter (the registrant's fourth fiscal quarter in the case of an annual report) that has materially affected, or is reasonably likely to materially affect, the registrant's internal control over financial reporting; and
5. The registrant's other certifying officer(s) and I have disclosed, based on our most recent evaluation of internal control over financial reporting, to the registrant's auditors and the audit committee of the registrant's board of directors (or persons performing the equivalent functions):
 - a. All significant deficiencies and material weaknesses in the design or operation of internal control over financial reporting which are reasonably likely to adversely affect the registrant's ability to record, process, summarize and report financial information; and
 - b. Any fraud, whether or not material, that involves management or other employees who have a significant role in the registrant's internal control over financial reporting.
